MICROBIOLOGY (MCRO)

MCRO 251. Introductory Medical Microbiology. 4 Credits.
Required preparation, one semester of a basic undergraduate science class. An introductory course in microbiology that focuses on the structure, biology, and genetics of microbes in relation to human disease and the immune system. For students planning careers in pharmacy, nursing, dental hygiene, and related fields. A laboratory is required. Students may not receive credit for both MCRO 251 and MCRO 255.
Grading status: Letter grade.

MCRO 449. Introduction to Immunology. 3 Credits.
This course provides a general overview of the evolution, organization, and function of the immune system. Instruction will be inquiry-based with extensive use of informational and instructional technology tools.
Requisites: Prerequisite, BIOL 205; permission of the instructor for students lacking the prerequisite.
Grading status: Letter grade
Same as: BIOL 449.

MCRO 614. Immunobiology. 3 Credits.
A strong background in molecular biology, eukaryotic genetics, and biochemistry is required. Advanced survey course with topics that include molecular recognition, genetic mechanisms of host resistance, development of cells and cell interactions; hypersensitivity, autoimmunity, and resistance to infection. Course material from textbook and primary literature.
Grading status: Letter grade

MCRO 630. Virology. 3 Credits.
Required preparation, coursework in molecular biology and cell biology. Current concepts of the chemistry, structure, replication, genetics, and the natural history of animal viruses and their host cells.
Grading status: Letter grade
Same as: GNET 630, BIOC 630, BIOL 630.

MCRO 632. Advanced Molecular Biology I. 3 Credits.
Required preparation for undergraduates, at least one undergraduate course in both biochemistry and genetics. DNA structure, function, and interactions in prokaryotic and eukaryotic systems, including chromosome structure, replication, recombination, repair, and genome fluidity. Three lecture hours a week.
Grading status: Letter grade
Same as: GNET 631, BIOC 631, BIOL 631.

MCRO 635. Microbial Pathogenesis I. 3 Credits.
Permission of the instructor. Required preparation, coursework in molecular biology and genetics. Topics will include aspects of basic bacteriology as well as bacterial and fungal pathogens and mechanisms of disease.
Grading status: Letter grade.

MCRO 640. Microbial Pathogenesis II. 3 Credits.
Permission of the instructor or a fundamental understanding of molecular virology and immunology. Molecular pathogenesis, with a primary focus on viral pathogens. Additional topics include vaccines and genetics of host-pathogen interactions.
Grading status: Letter grade.

MCRO 690. Special Topics in Microbiology or Immunology. 1-15 Credits.
Permission of the department except for department majors. Designed to introduce the student to research methods. Minor investigative problems are conducted with advice and guidance of the staff. Hours and credit to be arranged, any term. May be repeated for credit two or more semesters.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 15 total credits. 99 total completions.

MCRO 691. Directed Readings in Prokaryotic Molecular Biology. 1-15 Credits.
One or two faculty and a small number of students will consider current research of importance in depth. Emphasis is on current literature, invited speakers, etc., rather than textbooks.
Repeat rules: May be repeated for credit. 15 total credits. 99 total completions.

MCRO 692. Directed Readings in Immunology. 1 Credit.
Faculty and student seminars on current research in microbiology and immunology.
Repeat rules: May be repeated for credit.

MCRO 701. Seminar in Microbiology and Immunology. 1 Credit.
Seminar on selected topics in microbiology.
Repeat rules: May be repeated for credit.

MCRO 702. Seminar in Microbiology. 1 Credit.
Seminar on selected topics in microbiology.
Repeat rules: May be repeated for credit.

MCRO 710. Seminar/Tutorial in Prokaryotic Molecular Biology. 1-15 Credits.
One or two faculty and a small number of students consider current research of importance in depth. Emphasis is on current literature, invited speakers, etc., rather than textbooks.
Repeat rules: May be repeated for credit. 15 total credits. 99 total completions.

MCRO 711. Seminar/Tutorial in Animal Virology. 1-15 Credits.
One or two faculty and a small number of students consider current research of importance in depth. Emphasis is on current literature, invited speakers, etc., rather than textbooks.
Repeat rules: May be repeated for credit. 15 total credits. 99 total completions.

MCRO 712. Seminar/Tutorial in Immunology. 1-15 Credits.
One or two faculty and a small number of students consider current research of importance in depth. Emphasis is on current literature, invited speakers, etc., rather than textbooks.
Repeat rules: May be repeated for credit.

MCRO 790. Directed Readings in Prokaryotic Molecular Biology. 1 Credit.
Permission of the instructor or one prior prokaryotic molecular biology course. Directed readings in prokaryotic molecular biology under the direction of a member of the graduate faculty. May be repeated for credit.
Repeat rules: May be repeated for credit.

MCRO 791. Directed Readings in Virology. 1 Credit.
Permission of the instructor or one prior virology course. Directed readings in virology under the direction of a member of the graduate faculty. May be repeated for credit.
Repeat rules: May be repeated for credit.

MCRO 792. Directed Readings in Immunology. 1 Credit.
Permission of the instructor or one prior immunology course. Directed readings in immunology under the direction of a member of the graduate faculty. May be repeated for credit.
Repeat rules: May be repeated for credit.
MCRO 795. Research Concepts. 2 Credits.
Permission of the instructor. This course will provide multiple opportunities for the student to write parts of hypothesis-based proposals, receive substantial feedback, and to rewrite the text. There will be approximately twelve single-page writing assignments.

MCRO 901. Research in Microbiology or Immunology. 1-15 Credits.
Permission of the department. Designed to introduce the student to research methods and special techniques. Short-term problems are conducted with the advice and guidance of the staff. May be repeated for credit.
Repeat rules: May be repeated for credit.

MCRO 993. Master's Research and Thesis. 3 Credits.

MCRO 994. Doctoral Research and Dissertation. 3 Credits.
