RUDOLF COLLOREDO-MANSFELD, Chair

The Department of Anthropology offers advanced work leading to the master of arts and doctor of philosophy degrees. Students admitted into the graduate program are admitted for the Ph.D. degree. A master’s degree may be taken as part of the program leading to the Ph.D. degree; however, a master’s degree is not an essential part of the doctoral program.

The Department of Anthropology works closely with the Institute for Research in Social Science, the Institute for the Study of the Americas, the Carolina Population Center, and the Research Laboratories of Archaeology.

Up-to-date lists of anthropology faculty members and courses, along with additional information about the graduate program, faculty research projects, and other information, are available on the department’s Web site (http://anthropology.unc.edu).

In order to organize constellations of research interest, the department curriculum is organized by programs and concentrations. Programs are offered in archaeology, human biology, ecology, and evolution, and sociocultural anthropology and ethnography. Concentrations include health, medicine, and humanity; global engagement; race, difference, and power; heritage and unwritten histories; and social formations and processes. Students are expected to take at least three courses from within their chosen area of concentration or from a set of courses designated by their program.

Programs are distinguished from concentrations by their institutional links to other faculty and administrative units on campus, and by their greater specificity for certain course requirements. Students interested in one or the other program are advised to so declare when they enter the department if they have not yet done so. Graduate students may take courses offered by other departments or institutions such as Duke University. Departmental policy is to help the student select courses that supplement and strengthen the specialization in anthropology.

Incoming graduate students are required to complete the appropriate two-semester core course sequence for their concentration: Sociocultural Theory and Ethnography (ANTH 701, ANTH 702) or Evolution and Ecology (ANTH 703, ANTH 704). In addition, incoming students will either choose to complete the remaining core course sequence, or take one course from that sequence and Archaeological Theory (ANTH 705). Other courses are selected from a list of concentration courses, field research courses, and professional preparation courses.

During the second year of study, graduate students are required to produce a substantial piece of independent research, advised by a three-member faculty committee and presented to the entire faculty at the end of the fourth semester. Graduate students are advised to take their written and oral Ph.D. exams by the end of the sixth semester.

The Ph.D. degree requires specialization in a defined area of study and the completion of an acceptable dissertation treating some problem within this area. The Ph.D. program is quite flexible; any area or problem can be selected for study, provided it meets the approval of the student’s advisor, the Ph.D. committee, and the faculty. Part of the training of a professional anthropologist is based on a minimum of one year’s field work, which provides the context for the dissertation data in sociocultural anthropology or human ecology. For students concentrating in archaeology or biological anthropology, the Research Laboratories of Archaeology offer opportunities for student-led investigations as well as analysis of existing collections of archaeological material.
