Nilda Peragallo Montano, Dean
Margaret C. Wilmoth, Executive/Associate Dean for Academic Affairs
Cheryl Giscombe, Assistant Dean, MSN Program
Jennifer D'Auria, Assistant Dean, DNP Program
Linda Beeber, Assistant Dean, Ph.D. and Postdoctoral Programs

At the graduate level, the School of Nursing offers the master of science in nursing (M.S.N.), the doctor of philosophy in nursing (Ph.D.), and the doctor of nursing practice (D.N.P.).

Master of Science in Nursing
The master of science in nursing (M.S.N.) program prepares nurses for advanced practice nursing focused on direct patient care or as advanced specialists in health care systems.

Length of Program
The program of study varies from 36 to 49 credits of academic coursework, including clinical practice, a professional portfolio as a substitute for the oral comprehensive examination, and a master’s paper (or in some cases, a thesis). Students may pursue the M.S.N. degree on a full-time or part-time basis.

Master’s Program Curriculum
The curriculum consists of four components: the professional core, the research core, the clinical core, and the advanced nursing practice core courses. The professional core courses (NURS 746, NURS 815, NURS 835) and research core courses (NURS 778, NURS 779, NURS 992 or NURS 993) are required of most M.S.N. students. The clinical core courses and advanced clinical courses focus on the student’s selected area of specialization and role preparation.

The program options offered reflect a combination of current practice trends as well as available faculty resources. In some advanced practice specialty areas, electives in nursing or other disciplines or courses to support a focus area are required. Each student is admitted to a specific advanced practice area and assigned a faculty advisor to design a program of study that is appropriate to the student’s educational and career goals. Upon completion of the program, students are eligible to sit for national certification examinations appropriate to their advanced area of preparation.

The current advanced practice nursing population foci include adult-gerontology primary care nurse practitioner, family nurse practitioner, pediatric nurse practitioner/primary care, and psychiatric-mental health nurse practitioner. The advanced specialties in health care systems include administration, clinical nurse leader, education, informatics, and outcomes management. The M.S.N. program also includes advanced practice courses in adult oncology. Master’s students may elect to take these offerings as electives or declare an oncology focus in addition to their primary population of interest. For students in the health care systems informatics option, dual M.S.N./M.S.I.S. and M.S.N./M.S.L.S. degree options are available through the School of Nursing and the School of Information and Library Science. A graduate certificate in nursing education (additional nine credits) is available for students who desire concurrently to develop these skills in teaching and learning along with their advanced nursing preparation.

Doctor of Philosophy in Nursing
The Ph.D. program of the University of North Carolina at Chapel Hill is grounded in our commitment to enhancing the health of individuals, families, and communities; increasing the effectiveness of health care systems; and furthering the translation of research into practice. Graduates of the program are prepared to advance the theoretical and empirical underpinnings of nursing science, engage in interdisciplinary inquiry, and disseminate knowledge. The Ph.D. curriculum reflects the goals of the National Institutes of Health to foster discovery and increase the knowledge base for improving the health of all populations and to reduce health disparities. The program emphasizes the integration of the biological and behavioral sciences; the development and testing of evidence-based, theoretically grounded interventions; and the improvement of health care quality and outcomes. Faculty research addresses three areas of emphasis: enhancing health in vulnerable populations, managing chronic health problems, and strengthening health care systems. Students work closely with internationally renowned faculty from nursing and other disciplines to develop the skills and expertise needed to launch their program of research and pursue a successful career in academic and health care settings.

Length of Ph.D. Program
The Ph.D. program of study is a minimum of 50 credits of academic coursework including a qualifying examination and a dissertation. Students may pursue the Ph.D. degree on a full-time or part-time basis.

Ph.D. Program Curriculum
The Ph.D. curriculum in the School of Nursing includes the following components: coursework, a written qualifying exam, and the dissertation. The program of study for students incorporates both required and menu-driven courses distributed as follows: core knowledge and competencies (16 credits), research methods (13 credits), elective courses in the student’s substantive area or courses that support the development of methods or additional research practicum (nine credits), courses from a secondary area of concentration outside the School of Nursing (six credits), and a minimum of six dissertation credits.

Doctor of Nursing Practice
The doctor of nursing practice (D.N.P.) program prepares nurses for the highest level of advanced practice nursing focused on direct patient care (e.g., nurse practitioner) or as advanced specialists in health care systems (e.g., administration, outcomes).

Length of Program
The program has a minimum of 65 credits hours for those with baccalaureate preparation and 37 credits hours for those with M.S.N. preparation in certain practice areas. The program includes academic coursework, clinical practice, a qualifying examination, and a practice-focused scholarly project. Students with baccalaureate preparation may pursue the D.N.P. degree on a full-time basis, while students with M.S.N. preparation may pursue the D.N.P. degree on a full-time or part-time basis.
D.N.P. Program Curriculum
The D.N.P. program of study builds upon baccalaureate education and expands current M.S.N. education to prepare nurses for clinical leadership and advanced practice. Graduates of the D.N.P. program receive preparation in such key areas as evidence-based practice, scientific inquiry, organization and systems leadership, finance, health policy, information technology, population health, quality improvement, patient safety, and translational research with the goal of improving patient and population health status and outcomes. The D.N.P. degree provides advanced practice nurses and specialist in health care systems with additional knowledge and skills that better prepare them to address evolving and increasingly complex societal needs.

The D.N.P. program offers two tracks:

a. advanced clinical practice focused on direct patient care (e.g., nurse practitioners)
b. administration and organizational leadership focused on support of clinical practice

The curriculum for the D.N.P. program is based on national accreditation standards. The following nurse practitioner options are available at the D.N.P. level: adult-gerontology nurse practitioner/primary care, family nurse practitioner, pediatric nurse practitioner/primary care, psychiatric-mental health nurse practitioner. The specialty options in health care systems available at the D.N.P. level include administration, informatics, and outcomes management.

Following the faculty member’s name is a section number that students should use when registering for independent studies, reading, research, and thesis and dissertation courses with that particular professor.

Distinguished Professors
Linda Beeber (109), Health Care Environments
Diane Berry (130), Adult and Geriatric Health
Linda R. Cronenwett (105), Health Care Environments
Cheryl Woods Giscombe (31), Adult and Geriatric Health
Kathleen Knafli (48), Research Division
Barbara Mark (124), Health Care Environments
Mary H. Palmer (6), Adult and Geriatric Health
Sheila Santacroce (51), Family Health
Suzanne Thoyre (45), Family Health

Professors
Ruth Anderson (153), Research Division
Donna Havens (123), Health Care Environments
Cheryl Jones (112), Health Care Environments
George Knafli (47), Research Division
Mary Lynn (84), Health Care Environments
Deborah Mayer (28), Adult and Geriatric Health
Nilda Peragallo Montano (050), Family Health
Gwen Sherwood (33), Adult and Geriatric Health
Marcia Van Riper (120), Family Health
Seon Ae Yeo (108), Family Health

Associate Professors
Anna Beeber (14), Adult and Geriatric Health
Beth Black (42), Family Health
Jennifer D’Auria (85), Family Health
Eric Hodges (16), Family Health
Coretta Jenerette (39), Adult and Geriatric Health
Shawn Kneipp (134), Health Care Environments
Debbie Travers (38), Health Care Environments
Hugh Waters (149), Health Care Environments

Assistant Professors
Jada Brooks (141), Family Health
Rebecca Kitzmiller (150), Health Care Environments
Saif Khairat (155), Health Care Environments
Ashley Leak Bryant (143), Health Care Environments
Jennifer Leeman (133), Health Care Environments
Cecelia Roscigno (125), Family Health
Hudson Santos (154), Family Health
Lixin Song (56), Adult and Geriatric Health
Mark Toles (142), Health Care Environments
Jia-Rong Wu (91), Adult and Geriatric Health, Research
Jessica Zegre-Hemsey (144), Health Care Environments

NURS
Advanced Undergraduate and Graduate-level Courses
NURS 456. Discipline of Nursing II. 2 Credits.
Majors only. This course emphasizes professional development through exploration of a variety of roles and practice environments. Students analyze personal and professional goals and values to develop a framework for nursing practice.
Requisites: Prerequisites, NURS 254 and at least one of the following: NURS 470, 472, 477, or 479.
Repeat rules: May be repeated for credit. 2 total credits. 1 total completions.
Grading status: Letter grade.
NURS 470. Public Health Nursing. 5 Credits.
Majors only. Students apply public health concepts to community practice to improve health and reduce disparities across the lifespan, emphasizing interventions using partnership strategies at individual/family, organizational, and policy levels.
Requisites: Prerequisites, NURS 364 and 371. Co-requisites, NURS 472, 477, or 479.
Grading status: Letter grade.

NURS 472. Nursing Care of Infants, Children, and Their Families. 5 Credits.
Majors only. Nursing care of infants, children, and their families is explored. Knowledge from a variety of disciplines is applied through the nursing process to the direct care of infants and children.
Requisites: Prerequisite, NURS 364.
Grading status: Letter grade.

NURS 477. Psychiatric Mental Health Concepts for Broad Clinical Application in Nursing. 5 Credits.
Majors only. Using theories of psychosocial development, psychopathology, therapeutic communication, and psychotherapy, this course requires students to examine the range and complexities of human emotional suffering and methods of effective intervention.
Requisites: Prerequisites, NURS 253, 361, and 362. Corequisites, NURS 364 and 382.
Grading status: Letter grade.

NURS 479. Maternal/Newborn Nursing. 5 Credits.
Majors only. The course focuses on application of caring and critical thinking skills in providing evidence-based nursing care to childbearing families.
Requisites: Prerequisite, NURS 364.
Grading status: Letter grade.

NURS 487. Practicum in Nursing: Work-Study Experience. 3 Credits.
Certification as Nurse Aide I and II also required as pre- or corequisite. Majors only. This course provides the student an opportunity to participate in a work-study experience in participating health care agencies. Students participate in a reflective experience that integrates classroom and experiential learning.
Requisites: Prerequisites, NURS 254 and 364.
Grading status: Letter grade.

NURS 488. Practicum in Nursing: Health Services Improvement Work Experience. 3 Credits.
Majors only. Certification as a Nurse Aide I and Nurse Aide II are recommended. Practice in health care settings is the course focus. Students participate in a reflective experience that provides the context to integrate classroom and experiential learning into an evolving professional identity.
Requisites: Prerequisites, NURS 254 and 364.
Grading status: Letter grade.

NURS 489. Practicum in Nursing: Global Health Experience. 3 Credits.
Majors only. Certifications as a Nurse Aide I and Nurse Aide II are recommended. Practice in global health care settings is the course focus. Students participate in a reflective experience that provides the context to integrate classroom and experiential learning into an evolving professional identity.
Requisites: Prerequisites, NURS 254, 364, and two of the following: NURS 470, 472, 477, 479, 591.
Grading status: Letter grade.

NURS 491. Improving Nursing Practice: Application of Concepts, Theories, and Research. 3 Credits.
Majors only. This course emphasizes analysis of clinical problems that affect the nursing care of selected populations. Students also apply the nursing process, therapeutic communication skills, and teaching-learning principles in clinical situations.
Grading status: Letter grade.

NURS 492. Conceptual Bases of Professional Nursing Practice. 3 Credits.
Majors only. Selected concepts, theories, and models are synthesized, appraised, and applied as a basis for making judgments and decisions in nursing practice.
Grading status: Letter grade.

NURS 494. Community Health Nursing for the Public’s Health. 3-6 Credits.
Majors only. The focus of this course is the development of knowledge and experience related to research or service learning and its application to the practice of nursing and health care.
Repeat rules: May be repeated for credit.
Grading status: Letter grade.

NURS 496. Advanced Practicum in Nursing. 1-3 Credits.
Majors only. The focus of this course is the development of knowledge and experience related to research or service learning and its application to the practice of nursing and health care.
Repeat rules: May be repeated for credit. 3 total credits. 3 total completions.
Grading status: Letter grade.

NURS 585. Alternative Paradigms for Nursing Practice. 3 Credits.
Majors only. Concepts and principles underlying biomedical and biopsychosocial approaches to health care delivery are analyzed to determine their impact on health and to provide a framework for integrating both approaches to care.
Grading status: Letter grade.

NURS 586. Contemporary Issues in Nursing Practice. 3 Credits.
Majors only. The context of professional nursing practice will be analyzed from a social, economic, and policy perspective. Analysis will include projections for the future of the profession.
Grading status: Letter grade.

NURS 588. Leadership in Health Care Organizations. 4 Credits.
Majors only. This course explores organizational leadership and management practices and theories. Current social, economic, legal, ethical, and policy issues affecting practice, education, and the profession of nursing are examined.
Requisites: Prerequisites, NURS 364, 371, and 487 or 489, and 472 or 477 or 479. Corequisite, NURS 488.
Grading status: Letter grade.
NURS 591. Nursing Care of Adults with Major Health Problems, II. 8 Credits.
Majors only. This senior-level course focuses on applying critical thinking, clinical decision making, and evidence-based nursing practice to complex health problems of adults. Unique health needs of older adults are addressed.
Requisites: Prerequisites, NURS 364 and 371; co-requisite, NURS 456.
Gen Ed: EE-Field Work.
Grading status: Letter grade.

NURS 600. SHAC: Student Health Action Coalition. 0 Credits.
This course provides service-learning opportunities to apply nursing practice within the context of interprofessional care for vulnerable populations by participating with Student Health Action Coalition (SHAC) activities.
Repeat rules: May be repeated for credit. 0 total credits. 0 total completions.
Grading status: Pass/Fail.

NURS 607I. Interprofessional Team Work and Communication - Key to Patient Safety. 3 Credits.
Majors only. This interprofessional course focuses on understanding roles, teamwork, and communication to improve patient safety within the health care environment. National standards and initiatives will be the foundation of the course. Pass/Fail only.
Grading status: Pass/Fail.

NURS 609. Health Care in the Global Context. 1 Credit.
Majors only or permission of the instructor. A faculty-led experiential learning opportunity focusing on development and knowledge related to research, health care systems, or service learning and its application to nursing and health care.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 8 total credits. 8 total completions.
Grading status: Letter grade.

NURS 611. Supporting the Childbearing Family. 2 Credits.
Application required. An interprofessional, service-learning approach to studying maternity care. Students will receive professional doula training and volunteer as birth doulas within the Volunteer Doula Service Program at North Carolina Women's Hospital.
Grading status: Letter grade.

NURS 613I. Intermediate Spanish for Health Care I. 3 Credits.
This intermediate course is the equivalent of the third semester of college Spanish. Students will hone their listening and speaking skills in class primarily through role-playing activities and class discussion. Activities center on an original film set in a health clinic in rural North Carolina.
Grading status: Letter grade
Same as: PUBH 613I, AHSC 613I, PHCY 613I, SOWO 613I.

NURS 614I. Intermediate Spanish for Health Care II. 3 Credits.
Permission of the instructor. This primarily e-learning course provides public health students with the opportunity to improve their oral communication skills in Spanish at the intermediate level via DVD, Web, and workbook. Instructor-led. Online course.
Requisites: Prerequisite, PUBH 613I.
Grading status: Pass/Fail
Same as: PUBH 614I, AHSC 614I, PHCY 614I, SOWO 614I.

NURS 615I. Advanced Spanish for Health Care I. 3 Credits.
Required preparation, third semester Spanish or equivalent. This advanced course reviews the grammar of the third and fourth semester of college Spanish. Students hone their listening and speaking skills through role-playing activities and class discussion. Activities center on an original film set in a Latino-run health clinic.
Grading status: Letter grade
Same as: PUBH 615I, AHSC 615I, DENT 615I, MEDI 615I, PHCY 615I, SOWO 615I.

NURS 642. Health Promotion and Illness Prevention in Advanced Nursing Practice. 2 Credits.

NURS 647. Contemporary Issues in the Role of Advanced Practice Nursing. 3 Credits.
Graduate students only. This course examines the evolution, current issues, and roles in advanced practice nursing within the context of contemporary healthcare delivery.
Grading status: Letter grade.

NURS 671. Nursing Inquiry and Evidence-Based Practice for Advanced Scholarship. 3 Credits.
Students anticipating graduate study are introduced to scientific inquiry and principles of evidence-based practice, including theoretical perspectives related to inquiry; ethics; identification of research problems, development of research questions, and appropriate design; data interpretation with emphasis on statistical analysis; and rigorous appraisal of research reports.
Grading status: Letter grade.

NURS 675. Hillman Scholars in Nursing Innovation: Integrative Seminar. 1 Credit.
Admission to the Hillman Scholars Program in Nursing Innovation is required. This seminar will cultivate personal and professional skills essential for students' development and socialization as nurse innovators, leaders, researchers, and scholars. Content is iterative and progressive in depth and scope.
Repeat rules: May be repeated for credit.
Grading status: Letter grade.

NURS 680. Experimental Courses. 1-3 Credits.
Pilot test for new courses in the nursing program.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

NURS 685. Care of the Dying and Bereaved throughout the Life Span. 3 Credits.
Students from a variety of health sciences-related disciplines gain an understanding of issues in working with dying and bereaved individuals of all ages and their families.
Grading status: Letter grade.

NURS 687. Ethical Issues in Nursing. 2 Credits.
Examination and discussion of major ethical issues arising in the professional practice of nursing in the context of systematic consideration of the nature of ethical choice.
Grading status: Letter grade.

NURS 691H. Honors in Nursing, Part I. 3 Credits.
Permission of the program director. Majors only. Preparation of a two-semester honors project under the direction of department advisors.
Gen Ed: EE-Mentored Research.
Grading status: Letter grade.
NURS 692H. Honors in Nursing, Part II. 3 Credits.
Permission of the program director. Majors only. Preparation of a two-semester honors project under the direction of department advisors.
Gen Ed: EE-Mentored Research.
Grading status: Letter grade.

Graduate-level Courses
NURS 703I. Alternative Medicine. 3 Credits.

NURS 704. Scientific Writing. 1 Credit.
Focuses on the principles and practice of scientific writing, with emphasis on research proposals, theses, research reports, dissertations, and articles for publication.

NURS 710. Developmental Physiology and Pathophysiology. 3 Credits.
This course explores developmental changes in morphological processes and normal and pathologic physiology in humans from conception through adolescence. Physiological differences between infants and children and adults are emphasized.

NURS 715. Pathophysiology for Advanced Nursing Practice. 3 Credits.
This course examines the physiological and pathophysiological responses to injury-effects on cell function, host defense responses, maintenance of vital functions, and neuro-endocrine-immune responses to stress across the lifespan.

NURS 720. Pharmacotherapeutics in Advanced Nursing Practice. 3-4 Credits.
Examines principles of pharmacotherapeutic decision making in advanced nursing practice with application to clinical management of common health problems specific to all age groups, encompassing a lifespan approach.
Requisites: Prerequisite, NURS 710 or 715.

NURS 721. Pediatric Pharmacology. 1 Credit.
The course will examine the principles of pharmacotherapeutic decision making in advanced nursing practice, with application to the clinical management of common health problems specific to pediatrics.
Requisites: Prerequisites, NURS 715 and 720; permission of the instructor for students lacking the prerequisites.

NURS 722. Psychopharmacology in Psychiatric-Mental Health Advanced Practice Nursing. 2 Credits.
Examines the principles of psychopharmacology and neurobiology for safe and effective psychotherapeutic management of individuals with psychiatric and mental health problems across the lifespan.
Requisites: Prerequisites, NURS 715, 726, and 727; co-requisite, NURS 720; permission of the instructor for students lacking the pre- and corequisites.

NURS 725. Advanced Health Assessment and Diagnostic Reasoning in Pediatric Nursing. 4 Credits.
Pre- or This course is designed to prepare the advanced practice nurse to comprehensively assess pediatric clients using a diagnostic reasoning process.
Requisites: co-requisite, NURS 710.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 8 total credits. 2 total completions.

NURS 726. Advanced Health Assessment and Diagnostic Reasoning in Primary Care. 4 Credits.
Pre- or This course examines the process of diagnostic reasoning as a framework to synthesize comprehensive assessment of patients throughout the lifespan.
Requisites: co-requisite, NURS 715.

NURS 727. Advanced Diagnostic Process in Psychiatric-Mental Health Nursing. 4 Credits.
Pre- or This course introduces students to the role of the advanced practice psychiatric-mental health nurse. Models for assessment, intervention, and evaluation are explored and tested clinically.
Requisites: co-requisites, NURS 715 and 726.

NURS 730. Foundations in Clinical Informatics: Data, Information, and Knowledge. 3 Credits.
Required preparation, graduate nursing program admission or instructor permission. This foundational course provides an overview of computer and information science concepts as applied to health care.

NURS 746. Health Care Policy in the United States: Development, Impacts, and Implications for Nurses. 3 Credits.
This course examines health care policy development, impacts, and prospects for change. Content enables nurses to draw implications for nursing practice and advocacy for improving systems.

NURS 776. Research for Advanced Clinical Practice. 3 Credits.
Graduate standing and successful completion of an undergraduate statistics course required. This course explores approaches to research problems in advanced practice nursing. Theories, methods, designs, measurement, ethical conduct, and skills in critical appraisal are emphasized.

NURS 777. Intermediate Statistical Applications in Health Care. 3 Credits.
Graduate standing required. This course provides an introduction to probability, statistical concepts, and analytical techniques useful in health care research and for interpreting the literature.

NURS 778. Interpreting Research Reports. 3 Credits.
For Nursing students admitted to The Graduate School. Focuses on approaches for critical reading of research reports to evaluate the evidence base for practice.

NURS 779. Synthesis and Translation of Evidence. 3 Credits.
Focuses on the translation of research evidence to support improved models of care delivery.
Requisites: Prerequisite, NURS 778; permission of the instructor for students lacking the prerequisite.

NURS 780I. Multidisciplinary Perspectives on Managing Diabetes Mellitus. 2 Credits.
This course examines the current issues involved in managing diabetes mellitus in persons over their life span. Contributions of the multidisciplinary team are an important theme throughout this course.
Same as: PHCY 608I.

NURS 781I. Genomics and Society. 3 Credits.
This multidisciplinary course offers students the opportunity to gain a basic understanding of human genetics and explore the ethical, legal, and social implications of recent advances in genetics.

NURS 782I. Aging and Health. 3 Credits.
Introduction to normal aging, diseases of aging, mental health issues, and the use of health services by older adults.
Same as: SOWO 604I, SOCI 824, DENT 604I, HMSC 904I, MEDI 604I, PHCY 604I, PHYT 904I, PSYC 904I.

NURS 783I. Aging and Public Policy. 3 Credits.
Students learn of social service, health, and income policy with the aged. Issues pertaining to informal support systems and disadvantaged groups are explored in the context of aging policy.
Requisites: Prerequisite, SOWO 530.
Same as: SOWO 607I, DENT 607I, FMME 607I, HMSC 951I, MEDI 607I, PHCY 607I, PSYC 907I.
NURS 786. Advanced Concepts in the Clinical Care of Older Adults. 2 Credits.
Graduate students only. Focuses on advanced concepts for nursing management of older adults and their families with an emphasis on interdisciplinary care.

NURS 788. Advanced Pharmacology in Oncology. 1 Credit.
Focuses on the pharmacologic management of drugs used for therapeutic management and supportive care in adult oncology.
Requisites: Prerequisites, NURS 715 and 720; permission of the instructor for students lacking the prerequisites.

NURS 789. Advanced Concepts in Oncology Nursing. 2 Credits.
Admission to Adult-Gerontology Nurse Practitioner program or permission of the instructor required. This course focuses on an evidence-based approach for the advanced practice nurse, incorporating pathophysiology; prevention/detection; medical treatment; nursing management; and socioeconomic, ethical, and legal issues related to adult cancer care.

NURS 790I. Population Health Interprofessional Management in a Changing Health Care System. 3 Credits.
Admission to the School of Nursing graduate program or graduate students in any of the Health Affairs Schools with permission of instructor. This interprofessional education course focuses on preparing healthcare professionals with the foundational skills needed to work in teams to effectively collaborate and coordinate care in population health.
Same as: SOWO 790.

NURS 799. Special Problems. 1-3 Credits.

NURS 810. Primary Care Management of Adults. 5 Credits.
Focuses on the management of illnesses common to young, middle, and older adults in ambulatory care.
Requisites: Prerequisites, NURS 715 and 726; pre- or co-requisite, NURS 720.

NURS 811. Selected Issues in Adult Health. 5 Credits.
Provides the opportunity for an in-depth examination of management strategies with selected health problems in adults. Also examines issues inherent in the management of women and elderly populations.
Requisites: Prerequisites, NURS 715, 720, 726, and 810; permission of the instructor for students lacking the prerequisites.

NURS 812. Management of Complex Health Problems in Adults. 6 Credits.
This capstone course focuses on the management of complex health problems in adult populations for the adult nurse practitioner.
Requisites: Prerequisites, NURS 715, 720, 726, 810, and 811.

NURS 815. Advanced Practice Nursing Role. 1 Credit.
Examines current advanced practice nursing roles issues, within the context of contemporary healthcare delivery, legal, and sociopolitical systems.
Requisites: Prerequisites, NURS 810, 840, or 860; permission of the instructor for students lacking the prerequisites.

NURS 819. Practicum in Primary Care Management of Adults. 2 Credits.
A precepted practicum in community-based ambulatory care settings that provides experiences in continuity of care in the delivery of personal health services to adult individuals and their families.
Requisites: Prerequisites, NURS 715, 720, 726, and 810.

NURS 820. Clinical Practicum in Advanced Oncology Nursing. 2-4 Credits.
Focuses on the evidence-based management of common acute, episodic, and chronic health problems in adult cancer patients for the oncology nurse practitioner.
Requisites: Prerequisites, NURS 688 and 699; Co-requisite, NURS 821; Permission of the instructor for students lacking the pre- and co-requisites.

NURS 821. Seminar in Advanced Oncology Nursing. 0.5 Credits.
Focuses on evidence-based nursing and medical management issues relevant to the care of patients and their families across the cancer continuum and practice settings.
Requisites: Prerequisites, NURS 788 and 789; co-requisite, NURS 820; permission of instructor for students lacking the co-requisite.

NURS 823. Advanced Practicum in Primary Care Management of Adults. 2 Credits.
This clinical capstone course prepares Adult Gerontology primary care nurse practitioner students to synthesize and apply concepts and knowledge critical for professional primary care advanced practice nursing with individuals, families and communities. Students’ independent practice skills are refined in precepted clinical experiences.
Requisites: Prerequisites, NURS 715, 720, 726, 810, 811, and 812.

NURS 825. Sexual and Reproductive Health. 4 Credits.
Uses a life span approach to examine principles of primary care management of childbearing couples and sexual reproductive health in women and men. Application is is community-based settings.
Requisites: Prerequisites, NURS 715, 720, 726, and 810; permission of the instructor for students lacking the prerequisites.

NURS 826. Introduction to Population Health and Community-Based Practice. 2 Credits.
This course introduces fundamental concepts and models of population-oriented nursing practice and the central issues affecting that practice. Focuses on health disparities and underserved populations.

NURS 827. Child Health Issues in Primary Care. 4 Credits.
Examines the principles of assessment, management, evaluation, and continuing care of children in primary care settings. Developmentally-appropriate, family-centered approaches and management of common medical problems are addressed.
Requisites: Prerequisites, NURS 715, 720, 726, and 810.

NURS 828. Advanced Clinical Practicum in Primary Care of Families. 4 Credits.
This course is the capstone practicum for family nurse practitioner students. It emphasizes the comprehensive clinical management of primary health care needs in the context of the individual, the family, and/ or the community.
Requisites: Prerequisites, NURS 715, 720, 726, 810, 825, and 827.

NURS 833. Specialty Care in the Health of Women. 4 Credits.
Focuses on the primary care of women with complex gynecological problems, reproductive complications, and socially derived health care problems. Emphasis is placed on assessment, diagnosis, management, and clinical decision making.
Requisites: Prerequisites, NURS 715, 720, 726, 810, and 825; permission of the instructor for students lacking the prerequisites.

NURS 835. Population Health and Epidemiology. 3 Credits.
Admission to Nursing graduate program. Focuses on epidemiologic approaches for studying the impact of social, economic, and cultural inequalities on health and illness patterns at population and clinical levels.
NURS 838. Health Care of Women Practicum. 1-5 Credits.
The women’s health care advanced practicum focuses on the synthesis and clinical management of primary health care and specialty health care problems of women.
Requisites: Prerequisites, NURS 715, 726, 810, 825, and 833.

NURS 840. Primary Care of Children. 5 Credits.
This course focuses on advanced practice nursing management of common clinical symptomatology and problems in pediatric primary care.
Requisites: Prerequisites, NURS 710 and NURS 725; Pre- or co-requisite, NURS 720; permission of the instructor for students lacking the prerequisites.

NURS 841. Advanced Concepts in Family-Centered Health Care of Children and Adolescents. 4 Credits.
Focuses on advanced concepts in family-centered health care of selected child and adolescent health problems. Students function in an advanced practice role working with children, adolescents, and their families in primary care, acute, and/or chronic illness settings.
Requisites: Prerequisites, NURS 710, 725, and 840; permission of the instructor for students lacking the prerequisites.

NURS 842. Management of Complex Conditions in Advanced Practice Pediatric Nursing. 4 Credits.
Permission of the instructor for students lacking the pre- or corequisites. This course prepares the advanced practice nurse to design, implement, and evaluate a coordinated system of interventions that aim to promote optimal health and maximize outcomes for infants, children, and adolescents with complex conditions.
Requisites: Pre- or corequisites, NURS 710, 720, and 840;

NURS 849. Clinical Practicum in Advanced Practice Pediatric Nursing. 4 Credits.
Supervised practicum in an advanced practice role in a selected health care setting that provides primary care and/or specialized health care to infants, children, or adolescents.
Requisites: Prerequisites, NURS 710 and 725; Co-requisites, NURS 720 and 840; Permission of the instructor for students lacking the pre- or co-requisites.

NURS 850. Advanced Clinical Practicum in Primary Care of Children. 2-3 Credits.
This course is the capstone practicum for pediatric nurse practitioner students. It emphasizes the comprehensive clinical management of primary health care needs of children in the context of the family.
Requisites: Prerequisites, NURS 710, 720, 725, 840, 841, and 842.

NURS 860. Psychiatric Nursing Interventions with Individuals. 5 Credits.
Focuses on theories, techniques, and research related to providing individual psychotherapy. Contextual factors affecting the delivery of psychiatric-mental health nursing services are analyzed.
Requisites: Prerequisites, NURS 715, 726 and 727; Pre- or co-requisites, NURS 720, 722.

NURS 863. Psychiatric-Mental Health Nursing for Underserved Populations. 3 Credits.
Utilizing epidemiology, psychoeducation, case management, and health policy, students examine the scope of mental health problems and services for underserved populations.
Requisites: Prerequisites, NURS 727 and 860.

NURS 864. Psychiatric-Mental Nursing Interventions: Families and Groups. 4 Credits.
Students will analyze theories, techniques, and research relevant to therapy with groups and families experiencing mental health problems.
Requisites: Prerequisites, NURS 715, 720, 722, 726, 727, 860 and 865; permission of the instructor for students lacking the prerequisites.

NURS 865. Psychiatric-Mental Health Nursing Interventions with Children. 2 Credits.
Students will analyze theories, techniques, and research relevant to therapeutic interventions with children experiencing mental health problems.
Requisites: Prerequisites, NURS 715, 720, 722, 726, 727, and 860; permission of the instructor for students lacking the prerequisites.

NURS 866. Management of Complex Psychiatric-Mental Health Problems Across the Lifespan. 6 Credits.
This course focuses on the management of complex psychiatric-mental health problems across the lifespan for the psychiatric-mental health nurse practitioner.
Requisites: Prerequisites, NURS 715, 720, 722, 726, 727, 860, 864, and 865; permission of the instructor for students lacking the prerequisites.

NURS 869. Practicum in Psychiatric Mental Health Care for Advanced Practice Nurses. 1-3 Credits.
This is the final advanced clinical course for students to apply knowledge and skills in selected domains of the advanced practice of psychiatric-mental health nursing. Supervision, peer evaluation, seminar, and independent readings will enhance the experience.
Requisites: Prerequisites, NURS 727, 860, 863 and 864; permission of the instructor for students lacking the prerequisites.

NURS 870. Health Care Informatics. 3 Credits.
Focuses on developing an understanding of the concepts relevant to health care informatics and the use of computer applications to support clinical and administrative decision making.

NURS 871. Leadership and Advanced Practice Roles in Health Care Organizations. 3 Credits.
This course examines health care and nursing practice organizations, and the influence of the external and internal environment on these organizations. Roles and functions of nurses at different levels and in different types of health care settings are explored.

NURS 872. Developing and Managing Human Resources in Health Systems. 3 Credits.
Explores the knowledge and skills required for effective human resource management. Managerial behaviors that promote and maintain a professional nursing practice environment are emphasized.

NURS 873. Financing for Valued-Based Care. 3 Credits.
Admission to graduate program. This course examines theoretical underpinnings and financial management concepts that pertain to costs, cost analysis, budgeting, variance analysis, staffing, productivity, and forecasting to prepare nurse leaders for decision-making in complex health care organizations.

NURS 874. Improving Quality, Safety, and Outcomes in Healthcare Systems. 3 Credits.
Majors only. Explores theories and methods for improving the quality, safety, and outcomes of care and patient and organizational levels, with emphasis on the quality and patient safety movement, improvement science, and evidence based practice.
NURS 875. Principles of Teaching Applied to Nursing. 3 Credits. Provides students who have had minimal or no teaching experience with the educational principles necessary to teach in nursing programs or health care settings.

NURS 876. Innovations in Nursing and Health Care Curricula. 3 Credits. This online course examines foundations of contemporary nursing and health care education, including academic, staff development, patient education programs, and lifelong learning.

NURS 878. Health Care Residency and Integrative Seminar. 5-6 Credits. Required preparation, all required courses for the HCS specialty or concurrent enrollment in final HCS coursework. Course provides students an opportunity to develop, implement, and evaluate advanced practice and leadership strategies in a Health Care Systems area of focus.

NURS 880. Advanced Assessment for Nursing Leadership. 4 Credits. This course focuses on advanced assessment for identifying evidence-based interventions across a variety of healthcare settings. Emphasis is on the application of tools to implement changes related to care delivery and coordination at the client, unit, and organizational levels.

NURS 881. Evidence Based Care for Clinical Nurse Leaders. 6 Credits. Pre- or Advanced clinical nurse leadership course emphasizing collaboration with key stakeholders to implement evidence-based interventions and improve care delivery in clinical systems. Requisites: co-requisites, NURS 715 and 880.

NURS 882. Clinical Teaching. 3 Credits. Graduate standing required. Prepares nurses for teaching in clinical settings. Focuses on how to develop a clinical course, select clinical settings, work with staff, plan teaching methods and learner activities, and evaluate outcomes.

NURS 899. Special Topics in Nursing. 1-6 Credits. Special topics with an authority in the field. Repeat rules: May be repeated for credit; may be repeated in the same term for different topics.

NURS 901. Clinical Scholars in Nursing Innovation I. 6 Credits. The first of two courses designed to enhance scholars' understanding of nursing practice and care delivery within clinical microsystems. Students engage in individualized, precepted clinical experiences and guided scholarly reflection. Requisites: Prerequisite, students must be Hillman Scholars; licensed as an RN in NC and enrolled full-time in the PhD program.

NURS 902. Clinical Scholars in Nursing Innovation II. 6 Credits. Second sequential course for doctoral students designed to extend scholars' understanding of nursing practice and develop identity as a nurse scientist. Scholars engage in individualized, precepted clinical experiences and guided scholarly reflection. Requisites: Prerequisite, NURS 901.

NURS 912. Theoretical Foundations of Scientific Inquiry. 3 Credits. Critically analyzes historical and current views of knowledge development and scientific development. It examines the underlying ontological and epistemological assumptions of these views and how they influence scientific inquiry. Students will learn to critically evaluate extant theories, concepts, and models for use in research, including their testability and utility.

NURS 915. Health Organization Policy. 3 Credits. Examines interrelated changes in nursing, ethical and legal expectations, and the organization of health care and health policy. Ways that nurse leaders in health care organizations adapt to and challenge public policies throughout the policymaking process and consequences for organizations and for health, practice, research, and education are explored.

NURS 920. Theoretical Foundations of Advanced Practice. 3 Credits. Admission to Nursing graduate program. This course provides a foundation philosophy of science, examines the elements and utility of theory, and explores key theories of practice, including theories from nursing and other disciplines.

NURS 928. Organizational Theories. 3 Credits. Examines the major theoretical paradigms, perspectives, and issues in organization theory, particularly as applied to organizations providing health care services.

NURS 930. Children at Risk: Prenatal Period Through Emerging Young Adulthood. 3 Credits. This course will apply ecological and developmental perspectives to research with children at risk for conditions threatening life/quality of life and resilience under risk. Emphasis is on critically evaluating conceptual models, designs, and methods, and responsible conduct of research aiming to understand, prevent, or manage risk.

NURS 932. Families and Health. 3 Credits. Explores theoretical, methodological, and ethical issues related to research in families and health across the life span. Content includes family research related to health promotion, risk reduction, vulnerability, and health risk, and the family in the context of acute and chronic illness. Cultural, ethnic, and socioeconomic issues are included.

NURS 933. Health Care Quality and Patient Outcomes: Conceptual and Empirical Approaches. 3 Credits. Examines literature on quality of care -- effectiveness, safety, efficiency, equity, timeliness, and patient-centeredness. Critically evaluates conceptual frameworks, research designs, sources of data, analytic approaches, and implications for health care policy. Requisites: Prerequisite, NURS 976; permission of the instructor for students lacking the prerequisite.

NURS 941. Practice Inquiry Seminar I and Residency. 2 Credits. Permission of instructor for students lacking the prerequisite or corequisite. Seminar and residency focused on guiding the development of the DNP project including problem statement and review of literature, and engaging stakeholders, project site, and resources. Requisites: Pre- or corequisite, NURS 778; NURS 942. Practice Inquiry Seminar II and Residency. 2 Credits. Pre- or permission of the instructor for students lacking the prerequisites or corequisites. Seminar and residency focused on design implementation and leadership issues related to planning the DNP project. Requisites: co-requisites, NURS 778, 779, 941, and 994; NURS 943. Practice Inquiry Seminar III and Residency. 2 Credits. Pre- or Seminar and residency focused on issues related to the implementation, evaluation, and dissemination of findings of the DNP project. Requisites: co-requisites, NURS 778, 779, 941, 942, and 994.
NURS 950. Analysis of the Academic Role in Nursing Education. 3 Credits.
Knowledge, theories, and skills necessary for transition into an academic teaching role in university schools of nursing. Particular emphasis on the teaching-learning process as used in higher education.

NURS 953. Ethics and Law in Health Care and Research. 3 Credits.
Focuses on the analysis of contemporary ethical/legal dilemmas in health care and research. Examines nurses' ethical/legal responsibilities, law and the impact of judicial precedent upon clinical practice and research, the interface of law and ethics, and comparative theories/models of ethical reasoning and decision-making.

NURS 957. From Theory to Intervention and Implementation. 3 Credits.
Required preparation, NURS 912 or graduate level theory course. In-depth exploration of selected programmatic research in nursing and related fields on prevention and management of chronic conditions in order to generate and evaluate treatment theory and intervention protocol.

NURS 958. Designing Intervention Studies. 3 Credits.
Examines methodological, ethical, and practical issues in the design and implementation of theory-based intervention studies.
Requisites: Prerequisite, NURS 957; permission of the instructor for students lacking the prerequisite.

NURS 959. Research Grant Writing. 3 Credits.
Course is designed to assist doctoral students and post-docs with preparation of Individual National Research Service Award (NRSA) or other research grant application. All steps in grant writing process will be addressed. Student should have solidified research idea prior to course. Mentor must agree to work with student throughout course.

NURS 960. Proseminar in Nursing. 1-3 Credits.
Proseminars are offered for one, two, or three credits. Topics differ each semester.

NURS 962. Conducting Systematic Reviews and Writing Specific Aims. 4 Credits.
Designed to develop students' skills in conducting systematic reviews of the literature in their area of research focus. In addition, students will gain proficiency in developing aims for a research study and in using findings from their systematic literature reviews to further develop and refine those aims.

NURS 963. Writing for Publication. 3 Credits.
In this course, students apply principles and practices of writing to the preparation of manuscripts for publication.

NURS 965. Issues in Gerontological and Geriatric Research. 3 Credits.
This course is designed to enhance the student's knowledge of relevant issues researchers face when planning, designing, and implementing research with an older adult population.

NURS 966. Implementing Health System Innovations in Complex Organizations. 4 Credits.
Pre- or permission of the instructor for students lacking the prerequisites or co-requisites. Explores the application of implementation science and other relevant theory, focusing on the role of the executive nurse in integrating innovations into complex systems.
Requisites: co-requisites, NURS 779, 871, 873, 874;

NURS 967. Financing and Economics of Health Care Systems. 3 Credits.
Pre- or permission of the instructor for students lacking the prerequisites or co-requisites. Examines economic perspectives addressing health financing and policy questions, including: incentives and tradeoffs in healthcare decisions; healthcare production and provision; health insurance markets; and the role of government.
Requisites: co-requisites, NURS 779, 915 or 646, 871, 873, 874;

NURS 968. Writing the Pre-/Post-Doctoral Training Plan for a Research Intensive Career. 2 Credits.
Explore components of and rationale for a pre-/post-doctoral training plan and its relevance for planning a research intensive career. Students will write a personalized training plan following grant criteria.
Requisites: Prerequisite, Graduate status or permission of the instructor; NURS 959 or equivalent (including postdoctoral status); permission of primary mentor.

NURS 969. Quantitative Data Analysis: Analyzing Health Care Systems. 3 Credits.
Permission of the instructor for students lacking the prerequisite. Focuses on applying statistical concepts to the analysis of real world health care administration problems or issues, including the evaluation and presentation of the results.
Requisites: Prerequisite, NURS 874, 778, or 779.

NURS 972. Statistical Models for Health Research. 4 Credits.
This course will examine principles of bivariate and multiple regression and correlation, as well as univariate ANOVA, multiple ANOVA, ANCOVA, and repeated measures ANOVA. Emphasis is on application of these techniques in the analysis of nursing and health-related data.
Requisites: Prerequisite, NURS 671 or 777; permission of the instructor for students lacking the prerequisite.

NURS 976. Issues in Sampling and Design. 3 Credits.
Systematic and critical analysis of quantitative research designs including experimental, quasi-experimental, longitudinal, comparative, correlational, and descriptive. Examines sampling frameworks, types of samples, sampling errors and biases, and advantages and disadvantages of these designs for the study of nursing and healthcare issues.

NURS 977. Qualitative Approaches to Knowledge Development. 3 Credits.
Examines the philosophical orientation and techniques of qualitative methodologies including qualitative description, grounded theory, ethnography, and narrative. Design issues related to sampling, data collection, data analysis, and data re-presentation, validation, rigor, and ethical concerns are considered.

NURS 978. Principles of Measurement. 3 Credits.
Required preparation, graduate level statistics course in the previous three years. Permission of the instructor for students lacking the required preparation. Examination of measurement and techniques for assessing validity, reliability, and structure of data collection instruments. Instrument construction and procedures for critical evaluation of instruments are included.

NURS 979. Qualitative Analysis. 3 Credits.
Required preparation, doctoral level qualitative methods course or NURS 977. Emphasizes the work of analysis and interpretation. Students apply relevant qualitative techniques to their own data.

NURS 980. Observational Methods. 3 Credits.
Explores quantitative observational research techniques. Strategies for developing coding systems, determining reliability and validity, and analyzing data are included.

NURS 981. Longitudinal Methods and Analysis. 3 Credits.
Examines longitudinal research methods, including conceptualization, design, and analysis. Assumptions and limitations of longitudinal statistics, relationship between design and analyses, and strategies to maintain scientific integrity are covered.
Requisites: Prerequisite, NURS 972; permission of the instructor for students lacking the prerequisite.
NURS 985. Research Seminar and Practicum: Guided Individual Research Experience. 1-6 Credits.
Directs students to develop research skills related to the dissertation and to their future research.
**Repeat rules:** May be repeated for credit; may be repeated in the same term for different topics.

NURS 986. Elective Doctor of Nursing Practice Residency. 1-3 Credits.
This course focuses on the synthesis of knowledge related to advanced practice, practice leadership, and practice inquiry and is composed of a residency related to the DNP project.
**Requisites:** Prerequisites, NURS 941, 942 or 943.
**Repeat rules:** May be repeated for credit. 6 total credits. 3 total completions.

NURS 992. Master's (Non-Thesis). 3 Credits.

NURS 993. Master's Research and Thesis. 3 Credits.

NURS 994. PhD Dissertation/DNP Project. 3 Credits.
