Anthropology is the integrative study of human beings at all times and in all places. Anthropological expertise has special application for hidden histories and the ancient past; the intersection of human biology and ecology; and the way communities create and use meaning, values, and history in everyday life. We support studies, research, and professional applications in these areas with three programs of foundational training:

1. archaeology  
2. human biology, ecology, and evolution  
3. sociocultural anthropology
