Courses

PHYS 50. First-Year Seminar: Time and the Medieval Cosmos. 3 Credits.
This course introduces first-year students to the basic motions of the solar system as viewed from the Earth along with the mechanical and mathematical models used to reproduce them, while exploring the history of medieval and early modern education, theology, and natural philosophy.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR.
• Making Connections Gen Ed: HS.
• Grading Status: Letter grade.
• Same as: HIST 50.

PHYS 51. First-Year Seminar: The Interplay of Music and Physics. 3 Credits.
How sound is produced in instruments, and how those sounds are used in music making. Wave motion, resonance, sound perception, scales, harmony, and music theory. Collaborative laboratory exercises to investigate the acoustics of string, woodwind, and brass instruments as well as study of the physics of keyboard and percussion instruments. Students will make instruments from found objects and perform compositions on them, and can pursue their areas of special interest in a research paper.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR, FC-AESTH or FC-NATSCI.
• Making Connections Gen Ed: PL.
• Grading Status: Letter grade.
• Same as: MUSC 51.

PHYS 53. First-Year Seminar: Handcrafting in the Nanoworld: Building Models and Manipulating Molecules. 3 Credits.
This seminar provides a general introduction to nanoscience and nanotechnology, focusing on recent advances in molecular electronics, nanomaterials, and biomedical research. Course activities include group model-building projects, presentations, and discussions of reading material.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR.
• Making Connections Gen Ed: PL.
• Grading Status: Letter grade.

PHYS 54. First-Year Seminar: Physics of Movies. 3 Credits.
Students watch and analyze short movie clips that demonstrate interesting, unusual, or impossible physics. Group analysis emphasized.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR.
• Making Connections Gen Ed: PL.
• Grading Status: Letter grade.

PHYS 55. First-Year Seminar: Introduction to Mechatronics. 4 Credits.
Introduction to important skills and knowledge required in the STEM fields of today and tomorrow, from academic, employment, and social perspectives. All students, regardless of their educational goals, will achieve critical introductory skills in numerical reasoning and analysis, engineering design and prototyping, computer programming and electronics, and will demonstrate proficiency and knowledge about topics that increasingly impact society, including Artificial Intelligence, Machine Learning, and Quantum Computing.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR, FC-NATSCI or FC-QUANT, FC-LAB.
• Making Connections Gen Ed: PX, QI.
• Grading Status: Letter grade.

PHYS 63. First-Year Seminar: Catastrophe and Chaos: Unpredictable Physics. 3 Credits.
Physics is often seen as the most precise and deterministic of sciences. Determinism can break down, however. This seminar explores the rich and diverse areas of modern physics in which "unpredictability" is the norm. Honors version available.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR.
• Making Connections Gen Ed: PL, QI.
• Grading Status: Letter grade.
• Same as: ASTR 63.

PHYS 89. First-Year Seminar: Special Topics. 3 Credits.
Special Topics course. Content will vary each semester.

Rules & Requirements
• IDEAs in Action Gen Ed: FY-SEMINAR.
• Making Connections Gen Ed: PL.
• Grading Status: Letter grade.

PHYS 100. How Things Work. 4 Credits.
Demystifying the working of objects such as CD players, microwave ovens, lasers, computers, roller coasters, rockets, light bulbs, automobiles, clocks, copy machines, X-ray and CAT-scan machines, and nuclear reactors.

Rules & Requirements
• IDEAs in Action Gen Ed: FC-CREATE or FC-NATSCI, FC-LAB.
• Making Connections Gen Ed: PX.
• Grading Status: Letter grade.
PHYS 101. Basic Concepts of Physics. 4 Credits.
This is an introductory physics course for non-science majors. This course focuses on basic physics concepts and connections to everyday life. Course topics include Newtonian mechanics, fluids, heat, vibrations, electricity and magnetism, light and sound, quantum phenomenon, nuclear radiation, relativity, and cosmology. Connections to everyday life and society include energy conservation, global warming, nuclear energy, the origin of the universe, pseudoscience, and the search for extraterrestrial life.

Rules & Requirements
IDEAs in Action Gen Ed: FC-NATSCI or FC-QUANT, FC-LAB.
Making Connections Gen Ed: PX.
Grading Status: Letter grade.

PHYS 108. Climate and Energy Transitions: Understanding the Forecasts. 4 Credits.
This course examines uncertainties in projecting future fossil fuel consumption and impact on global climate by quantifying how effectively alternative power-generation and energy-storage technologies can scale to meet needs in developing and developed nations, and by understanding past and present climates. Course previously offered as GEOL 108/MASC 108.

Rules & Requirements
Making Connections Gen Ed: PX, QI.
Same as: EMES 108.

PHYS 114. General Physics I: For Students of the Life Sciences. 4 Credits.
Basic principles of physics, including forces, energy, oscillations, sound, diffusion, and heat transfer, and applications to biological systems. Intended to meet the needs of, but not restricted to, students majoring in the life sciences. Students may not receive credit for PHYS 114 in addition to PHYS 104, 116, or 118.

Rules & Requirements
IDEAs in Action Gen Ed: FY-LAUNCH (only designated sections), FC-NATSCI or FC-QUANT, FC-LAB.
Making Connections Gen Ed: PX, QI.
Requisites: Prerequisite, MATH 129P or 130 or 231.
Grading Status: Letter grade.

PHYS 115. General Physics II: For Students of the Life Sciences. 4 Credits.
Basic principles of physics, including fluids, electricity, magnetism, optics, quantum physics, and nuclear physics, and applications to biological systems. Intended to meet the needs of, but not restricted to, students majoring in the life sciences. Students may not receive credit for PHYS 115 in addition to PHYS 105, 117, or 119.

Rules & Requirements
IDEAs in Action Gen Ed: FY-LAUNCH (only designated sections), FC-NATSCI or FC-QUANT, FC-LAB.
Making Connections Gen Ed: PX, QI.
Requisites: Prerequisite, PHYS 104, 114, 116, or 118.
Grading Status: Letter grade.

PHYS 118. Introductory Calculus-based Mechanics and Relativity. 4 Credits.
Mechanics of particles and rigid bodies. Newton's laws; mechanical and potential energy; mechanical conservation laws; frame-dependence of physical laws; Einstein's Theory of Relativity. Students may not receive credit for PHYS 118 in addition to PHYS 104, 114, or 116. Honors version available.

Rules & Requirements
IDEAs in Action Gen Ed: FY-LAUNCH (only designated sections), FC-NATSCI or FC-QUANT, FC-LAB.
Making Connections Gen Ed: PX, QI.
Requisites: Prerequisite, PHYS 117 or PHYS 118H; Pre- or corequisite, MATH 233; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 119. Introductory Calculus-based Electromagnetism and Quanta. 4 Credits.
Unification of the laws of electricity and magnetism; electromagnetic waves; the particle-wave duality; fundamental principles and applications of quantum mechanics. Students may not receive credit for PHYS 119 in addition to PHYS 105, 115, or 117. Honors version available.

Rules & Requirements
IDEAs in Action Gen Ed: FY-LAUNCH (only designated sections), FC-NATSCI or FC-QUANT, FC-LAB.
Making Connections Gen Ed: PX, QI.
Requisites: Prerequisite, PHYS 118 or PHYS 118H; Pre- or corequisite, MATH 233; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 120. General Physics: Energy: Physical Principles and the Quest for Alternatives to Dwindling Oil and Gas. 3 Credits.
A quantitative exploration of the physical principles behind energy development and use within modern civilization, the stark impact of depleted fossil fuel reserves, and alternative sources.

Rules & Requirements
Requisites: Pre- or corequisite, PHYS 128.
Grading Status: Letter grade.

PHYS 125L. Modern Physics Laboratory. 1 Credits.
Selected modern physics experiments. Written research reports and oral presentations. Three laboratory hours a week.

Rules & Requirements
Requisites: Pre- or corequisite, PHYS 128.
Grading Status: Letter grade.

PHYS 131. Energy: Physical Principles and the Quest for Alternatives to Dwindling Oil and Gas. 3 Credits.
A quantitative exploration of the physical principles behind energy development and use within modern civilization, the stark impact of depleted fossil fuel reserves, and alternative sources.

Rules & Requirements
Making Connections Gen Ed: PX, QI.
Requisites: Corequisite, PHYS 131L.
Grading Status: Letter grade.
PHYS 131L. Energy: Physical Principles and the Quest for Alternatives to Dwindling Oil and Gas. 1 Credits.
Explore renewable and nonrenewable energy sources. Three laboratory hours per week.

Rules & Requirements
Requisites: Corequisite, PHYS 131.
Grading Status: Letter grade.

PHYS 201. Basic Mechanics. 3 Credits.
A one-semester course in statics, kinematics, simple harmonic motion, central forces, and applications from modern physics.

Rules & Requirements
Requisites: Pre- or corequisites, MATH 383 and PHYS 281L; permission of the instructor for students lacking the pre- or co-requisites.
Grading Status: Letter grade.

PHYS 211. Intermediate Electromagnetism. 3 Credits.
Electric fields and potentials, dielectrics, steady currents, magnetic flux and magnetic materials, electromagnetic induction. Emphasis on Maxwell’s equations and their application to electromagnetic waves in bounded and unbounded media.

Rules & Requirements
Requisites: Prerequisites, MATH 233 and PHYS 117 or 119; Pre- or corequisite, MATH 383.
Grading Status: Letter grade.

PHYS 231. Physical Computing. 4 Credits.
Physical Computing is an introduction to the interaction between a computing unit and the outside world, using measurement and control. The tools for this implementation of physical computing are microcontrollers, software, sensors, a variety of analog and digital electronic components, and algorithms that anticipate and respond in ways that humans perceive as NOT inherently computerized. Honors version available.

Rules & Requirements
IDEAs in Action Gen Ed: FC-CREATE or FC-QUANT, FC-LAB, RESEARCH.
Requisites: Pre- or corequisite, PHYS 114 or 118; permission of the instructor for students lacking the pre- or corequisite.
Grading Status: Letter grade.

PHYS 281L. Experimental Techniques in Physics. 3 Credits.
An introductory course centered around 8 lab experiments that include Compton scattering, interferometry, e/m, and photoelectric effect. Students use data analysis tools including MATLAB or Python, uncertainty analysis based on the GUM, and LaTeX for written reports. In this communication-intensive course, students collaborate like physicists through written and oral communication and peer review exercises aimed at general, peer, and expert audiences. They also engage with themes of diversity, equity, and inclusion in the field.

Rules & Requirements
IDEAs in Action Gen Ed: FC-NATSCI, FC-LAB, COMMBEYOND.
Making Connections Gen Ed: CI.
Requisites: Prerequisite, PHYS 117 or 119; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 290. Special Topics in Physics. 1-3 Credits.
Elective topics in the field of Physics. This course has variable content and may be taken multiple times for credit.

Rules & Requirements
Repeat Rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 6 total completions.
Grading Status: Letter grade.

PHYS 293. Internship In Physics and Astronomy. 3 Credits.
The sponsored, off-campus work must involve at least 140 hours. Does not fulfill any requirement in the physics major or minor. Physics majors only. Permission of instructor/department.

Rules & Requirements
IDEAs in Action Gen Ed: HI-INTERN.
Requisites: Pre- or corequisite, PHYS 331.
Grading Status: Letter grade.

PHYS 295. Research with Faculty Mentor I. 1-12 Credits.
Students undertake independent research with a faculty mentor. Approved learning contract required. Mentored research courses (PHYS 295 or PHYS 395) may be used to satisfy degree requirements only for a maximum of 3 credit hours.

Rules & Requirements
IDEAs in Action Gen Ed: RESEARCH.
Repeat Rules: May be repeated for credit. 12 total credits. 12 total completions.
Grading Status: Letter grade.

PHYS 311. Electromagnetism I. 3 Credits.
First semester of a two-semester sequence on electromagnetic theory and applications. This first semester is focused on electrostatic fields and potentials, magnetic fields and potentials, dielectrics, and magnetic fields in matter.

Rules & Requirements
Requisites: Prerequisites, PHYS 331 and one of PHYS 117 or 119; permission of the instructor for students lacking the requisite.
Grading Status: Letter grade.

PHYS 331. Numerical Techniques for the Sciences I. 4 Credits.
Applications of calculus, vector analysis, differential equations, complex numbers, and computer programming to realistic physical systems. Three lecture and two computational laboratory hours per week.

Rules & Requirements
Requisites: Prerequisite, PHYS 104, 114, 116, or 118; pre- or corequisite, MATH 383.
Grading Status: Letter grade.

PHYS 332. Numerical Techniques for the Sciences II. 4 Credits.
Modeling of celestial dynamics, nuclear physics problems, electrostatics; Monte Carlo integration in particle and theoretical physics; data modeling for physics and astronomy; gravitation, electromagnetism, fluid dynamics and quantum mechanics. Three lecture and two computational laboratory hours per week. Previously offered as PHYS 358.

Rules & Requirements
Requisites: Prerequisite, PHYS 331.
Grading Status: Letter grade.

PHYS 358. Applications of Calculus. 3 Credits.
Review of basic concepts in analytic geometry; calculus. Applications to physics, business, and social science. May be taken multiple times for credit.

Rules & Requirements
Repeat Rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 6 total completions.
Grading Status: Letter grade.
PHYS 354. Quantum Mechanics, Weirdness, and Reality. 3 Credits.
An interdisciplinary course on the weirdness of quantum mechanics and the problem of interpreting it. Nonlocality, the measurement problem, superpositions, Bohm's theory, collapse theories, and the many-worlds interpretation.

Rules & Requirements
Making Connections Gen Ed: PH.
Requisites: Prerequisites, MATH 231 and any PHYS course numbered 100 or greater; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.
Same as: PHIL 354.

PHYS 381. Renewable Electric Power Systems. 3 Credits.
Broad and quantitative study of renewable electric power systems: wind systems, photovoltaic cells, distributed generation (concentrating solar power, microhydro, biomass), and the economics of these technologies. Course previously offered as PHYS 581.

Rules & Requirements
Requisites: Prerequisites, PHYS 119 or PHYS 115 and MATH 233.
Grading Status: Letter grade.

PHYS 390. Special Topics in Physics and Astronomy. 1-3 Credits.
Elective topics in the field of Physics and Astronomy. This course has variable content and may be taken multiple times for credit.

Rules & Requirements
Repeat Rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 6 total completions.
Grading Status: Letter grade.

PHYS 391. Senior Seminar. 1-15 Credits.
To be taken by seniors with permission of the department.

Rules & Requirements
Grading Status: Letter grade.

PHYS 395. Research with Faculty Mentor II. 1-12 Credits.
Students undertake independent research with a faculty mentor. Approved learning contract required. A research proposal and/or summary research report is required. Although not mandatory, a submission of a research proposal to an internal or external competition for funding is encouraged. Students must also present their research at an appropriate symposium, conference, or seminar. Mentored research courses (295 or 395) may be used to satisfy degree requirements only for a maximum of 3 credit hours.

Rules & Requirements
 IDEAs in Action Gen Ed: RESEARCH.
Requisites: Prerequisite, PHYS 281L.
Repeat Rules: May be repeated for credit. 12 total credits. 12 total completions.
Grading Status: Letter grade.

PHYS 401. Mechanics I. 3 Credits.

Rules & Requirements
Requisites: Pre- or corequisites, MATH 383 and PHYS 281L and 331; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 405. Biological Physics. 3 Credits.
How diffusion, entropy, electrostatics, and hydrophobicity generate order and force in biology. Topics include DNA manipulation, intracellular transport, cell division, molecular motors, single molecule biophysics techniques, nerve impulses, neuroscience.

Rules & Requirements
Requisites: Prerequisites, PHYS 116 and 117, or PHYS 118 and 119.
Grading Status: Letter grade.
Same as: BIOL 431, BMME 435.

PHYS 410. Teaching and Learning Physics. 4 Credits.
Learning how to teach physics using current research-based methods. Includes extensive fieldwork in high school environments.

Rules & Requirements
 IDEAs in Action Gen Ed: HI-LEARNTA.
Requisites: Prerequisite, PHYS 117 or 119; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 412. Electromagnetism II. 3 Credits.
Electrodynamics: Maxwell's equations and their application to electromagnetic waves, radiation, and relativity.

Rules & Requirements
Requisites: Prerequisites, PHYS 281L, 311 and 332; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 421. Introduction to Quantum Mechanics. 3 Credits.

Rules & Requirements
Requisites: Prerequisites, MATH 383, either MATH 347 or PHYS 331, and one of PHYS 117, or 119; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 422. Physics of the Earth's Interior. 3 Credits.

Rules & Requirements
Requisites: Prerequisites, MATH 383, and either PHYS 201 and 211 or 311 and 401.
Grading Status: Letter grade.
Same as: EMES 422.
PHYS 441. Thermal Physics. 3 Credits.
Equilibrium statistical mechanics; the laws of thermodynamics, internal energy, enthalpy, entropy, thermodynamic potentials, Maxwell's relations.

Rules & Requirements
Requisites: Prerequisites, MATH 233, and PHYS 117 or 119; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.
Same as: BMME 441.

PHYS 447. Quantum Computing. 3 Credits.
Recommended preparation, some knowledge of basic linear algebra. An introduction to quantum computing. Basic math and quantum mechanics necessary to understand the operation of quantum bits. Quantum gates, circuits, and algorithms, including Shor's algorithm for factoring and Grover's search algorithm. Entanglement and error correction. Quantum encryption, annealing, and simulation. Brief discussion of technologies.

Rules & Requirements
Requisites: Prerequisites, MATH 232, and PHYS 116 or 118.
Grading Status: Letter grade.
Same as: COMP 447.

PHYS 451. Electronics I. 4 Credits.
DC and AC circuit analysis and design, construction, test, and measurements. Semiconductors physics and semiconductor devices (diodes and transistors). Signal conditioning and introduction to digital electronics and automated data acquisition and analysis. Previously offered as PHYS 351.

Rules & Requirements
Requisites: Prerequisite, PHYS 115 or 119; Pre- or corequisites, MATH 383 and PHYS 331; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 452. Electronics II. 4 Credits.

Rules & Requirements
Requisites: Prerequisites, PHYS 451 or BMME 207 and BMME 365; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 461. Introduction to Medical Physics. 3 Credits.
This class will introduce how physics principles and techniques have been applied to medical imaging and radiation therapy. Topics will include ionizing radiation and radiation safety, x-ray and computed tomography, ultrasound, magnetic resonance imaging, positron emission tomography, and radiation therapy. Topics such as the career path to become a medical physicist will also be discussed. The class will have lectures given by the instructor and guest lectures by experts and practitioners in this field.

Rules & Requirements
Requisites: Prerequisites, PHYS 119 or PHYS 115 and MATH 233.
Grading Status: Letter grade.

PHYS 471. Physics of Solid State Electronic Devices. 3 Credits.
Properties of crystal lattices, electrons in energy bands, behavior of majority and minority charge carriers, PN junctions related to the structure and function of semiconductor diodes, transistors, display devices.

Rules & Requirements
Requisites: Prerequisite, PHYS 117 or 119; pre- or corequisite, PHYS 211 or 311.
Grading Status: Letter grade.

PHYS 472. Chemistry and Physics of Electronic Materials Processing. 3 Credits.
A survey of materials processing and characterization used in fabricating microelectronic devices. Crystal growth, thin film deposition and etching, and microlithography. Previously offered as APPL 472. Permission of the instructor.

Rules & Requirements
Requisites: Prerequisite, CHEM 482 or PHYS 117 or 119.
Grading Status: Letter grade.
Same as: CHEM 472.

PHYS 481L. Advanced Laboratory I. 2 Credits.
Selected physical problems to be addressed with the use of materials development, device fabrication and experiment design for evaluation.

Rules & Requirements
Requisites: Prerequisites, PHYS 117 or 119. MATH 232, and PHYS 116 or 118.
Grading Status: Letter grade.

PHYS 491L. Materials Laboratory I. 2 Credits.
Structure determination and measurement of the optical, electrical, and magnetic properties of solids. Previously offered as APPL 491L.

Rules & Requirements
Requisites: Prerequisites, APPL 470 and PHYS 351.
Grading Status: Letter grade.

PHYS 492L. Materials Laboratory II. 2 Credits.
Continuation of PHYS 491L with emphasis on low- and high-temperature behavior, the physical and chemical behavior of lattice imperfections and amorphous materials, and the nature of radiation damage. Previously offered as APPL 492L.

Rules & Requirements
Requisites: Prerequisite, APPL 491L or PHYS 491L.
Grading Status: Letter grade.

PHYS 510. Seminar for Physics and Astronomy Teaching Assistants. 1 Credits.
A seminar on how students learn and understand physics and astronomy and how to teach using current research-based methods.

Rules & Requirements
Requisites: Prerequisite, APPL 491L or PHYS 491L.
Grading Status: Letter grade.
PHYS 510L. Practicum for Physics and Astronomy Undergraduate Teaching and Learning Assistants. 1 Credits.
This course is designed to accompany, or subsequently follow, the Seminar for New Physics and Astronomy Teaching and Learning Assistants (PHYS 510) and is for undergraduates serving as Undergraduate Teaching Assistants (UTAs) for the Physics and Astronomy Department. UTAs who receive course credit cannot also be paid.

Rules & Requirements
Requisites: IDEAS in Action Gen Ed: HI-LEARNTA.
Repeat Rules: Pre- or corequisite, PHYS 510.
Grading Status: Letter grade.

PHYS 515. Optics. 3 Credits.
Broad coverage including ray, wave, Gaussian, and Fourier optics. Interference, diffraction, polarization, and coherence. Optical properties of materials, absorption, scattering. Fiber optics, lasers, semiconductors, imaging, and special topics. Previously offered as PHYS 415.

Rules & Requirements
Requisites: Prerequisite, PHYS 211 or PHYS 412; permission of the instructor for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 521. Applications of Quantum Mechanics. 3 Credits.
Emphasizes atomic physics but includes topics from nuclear, solid state, and particle physics, such as energy levels, the periodic system, selection rules, and fundamentals of spectroscopy.

Rules & Requirements
Requisites: Prerequisite, PHYS 421.
Grading Status: Letter grade.

PHYS 529. Introduction to Magnetic Resonance. 3 Credits.
This course will provide a broad coverage of important physics principles behind nuclear magnetic resonance (NMR) spectroscopy, especially the applications of quantum mechanics. Theoretical approaches and tools for grasping the design principles of various important NMR spectroscopic techniques will be discussed. It will show, for instance, how to use NMR spectroscopy to determine molecular structures and dynamics, and how to obtain images and functional information using magnetic resonance imaging (MRI).

Rules & Requirements
Requisites: Prerequisite, PHYS 421 or CHEM 486; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 543. Nuclear Physics. 3 Credits.
Structure of nucleons and nuclei, nuclear models, forces and interactions, nuclear reactions.

Rules & Requirements
Requisites: Prerequisite, PHYS 421; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 545. Introductory Elementary Particle Physics. 3 Credits.
Relativistic kinematics, symmetries and conservation laws, elementary particles and bound states, gauge theories, quantum electrodynamics, chromodynamics, electroweak unification, standard model and beyond.

Rules & Requirements
Requisites: Prerequisites, PHYS 412 and 421.
Grading Status: Letter grade.

PHYS 573. Introductory Solid State Physics. 3 Credits.
Crystal symmetry, types of crystalline solids; electron and mechanical waves in crystals, electrical and magnetic properties of solids, semiconductors; low temperature phenomena; imperfections in nearly perfect crystals. Previously offered as APPL 573.

Rules & Requirements
Requisites: Prerequisite, PHYS 421; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 586. Introduction to Biomedical Imaging Science. 3 Credits.
This course offers an introduction to the most common biomedical imaging modalities, including Magnetic Resonance Imaging (MRI), Computed-Tomography (CT), Positron Emission Tomography (PET), Single-Photon Emission Computed Tomography (SPECT), Ultrasound, and Optical Imaging. Lectures include discussions of imaging hardware, and relevant physics, as well as pre-clinical and clinical applications.

Rules & Requirements
Requisites: Prerequisite, PHYS 119.
Grading Status: Letter grade.

PHYS 594. Nonlinear Dynamics. 3 Credits.
Interdisciplinary introduction to nonlinear dynamics and chaos. Fixed points, bifurcations, strange attractors, with applications to physics, biology, chemistry, finance.

Rules & Requirements
Requisites: Prerequisite, MATH 383; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.
Same as: MATH 594.

PHYS 631. Mathematical Methods of Theoretical Physics. 3 Credits.
Linear vector spaces and matrices, curvilinear coordinates, functions of complex variables, ordinary and partial differential equations, Fourier series, integral transforms, special functions, differential forms.

Rules & Requirements
Requisites: Prerequisites, PHYS 281L and 332.
Grading Status: Letter grade.

PHYS 632. Advanced Research Analytics. 3 Credits.
Required preparation, ability to program in a high-level computer language. Permission of the instructor for students lacking the required preparation. Methods required for the analysis, interpretation, and evaluation of physics measurements and theory. Error analysis, statistical tests, model fitting, parameter estimation, Monte Carlo methods, Bayesian inference, noise mitigation, experimental design, big data, selected numerical techniques including differential equations and Fourier techniques.

Rules & Requirements
Grading Status: Letter grade.
PHYS 633. Scientific Programming. 3 Credits.
Required preparation, elementary Fortran, C, or Pascal programming.
Structured programming in Fortran or Pascal; use of secondary storage
and program packages; numerical methods for advanced problems, error
propagation and computational efficiency; symbolic mathematics by
computer.

Rules & Requirements
Requisites: Prerequisite, MATH 528 or 529, or PHYS 631 or 632.
Grading Status: Letter grade.

PHYS 660. Fluid Dynamics. 3 Credits.
The physical properties of fluids, kinematics, governing equations,
viscous incompressible flow, vorticity dynamics, boundary layers,
irrotational incompressible flow. Course previously offered as GEOL 560/
MASC 560.

Rules & Requirements
Requisites: Prerequisite, PHYS 401; permission of the instructor for
students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 671L. Independent Laboratory I. 3 Credits.
Six laboratory hours a week.

Rules & Requirements
Requisites: Prerequisites, PHYS 401 and 412; permission of the instructor
for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 672L. Independent Laboratory II. 3 Credits.
Six laboratory hours a week.

Rules & Requirements
Requisites: Prerequisites, PHYS 401 and 412; permission of the instructor
for students lacking the prerequisites.
Grading Status: Letter grade.

PHYS 691H. Senior Honor Thesis Research I. 3 Credits.
Permission of the instructor. Readings in physics and directed research
for a senior honor thesis project. Required of all candidates for
graduation with honors in physics.

Rules & Requirements
IDEAs in Action Gen Ed: RESEARCH.
Grading Status: Letter grade.

PHYS 692H. Senior Honor Thesis Research II. 3 Credits.
Readings in physics and directed research for a senior honor thesis
project. Required of all candidates for graduation with honors in physics.

Rules & Requirements
IDEAs in Action Gen Ed: RESEARCH.
Requisites: Prerequisite, PHYS 691H.
Grading Status: Letter grade.

PHYS 701. Classical Dynamics. 3 Credits.
Variational principles, Lagrangian and Hamiltonian mechanics.
Symmetries and conservation laws. Two-body problems, perturbations,
and small oscillations, rigid-body motion. Relation of classical to
quantum mechanics.

Rules & Requirements
Requisites: Prerequisite, advanced undergraduate mechanics.
Grading Status: Letter grade.

PHYS 711. Electromagnetic Theory I. 3 Credits.
Electrostatics, magnetostatics, time-varying fields, Maxwell's equations.

Rules & Requirements
Requisites: Prerequisites, PHYS 631 and 632.
Grading Status: Letter grade.

PHYS 712. Electromagnetic Theory. 3 Credits.
Maxwell's equations, time-varying fields, and conservation laws. Plane
EM waves, polarization, propagation, dispersive media. Wave guides and
resonant cavities. Radiation from slow-moving charges. Special theory
of relativity. Radiation from relativistic charges. Interaction between
radiation and matter.

Rules & Requirements
Grading Status: Letter grade.

PHYS 715. Visualization in the Sciences. 3 Credits.
Computational visualization applied in the natural sciences. For both
computer science and natural science students. Available techniques
and their characteristics, based on human perception, using software
visualization toolkits. Project course.

Rules & Requirements
Grading Status: Letter grade.

PHYS 721. Quantum Mechanics. 3 Credits.
Review of nonrelativistic quantum mechanics. Spin, angular momentum,
perturbation theory, scattering, identical particles, Hartree-Fock method,
Dirac equation, radiation theory.

Rules & Requirements
Requisites: Prerequisite, PHYS 421.
Grading Status: Letter grade.

PHYS 722. Quantum Mechanics. 3 Credits.
Review of nonrelativistic quantum mechanics. Spin, angular momentum,
perturbation theory, scattering, identical particles, Hartree-Fock method,
Dirac equation, radiation theory.

Rules & Requirements
Requisites: Prerequisite, PHYS 421.
Grading Status: Letter grade.

PHYS 741. Statistical Mechanics. 3 Credits.
Classical and quantal statistical mechanics, ensembles, partition
functions, ideal Fermi and Bose gases.

Rules & Requirements
Requisites: Prerequisites, PHYS 701 and 721.
Grading Status: Letter grade.
PHYS 771L. Advanced Spectroscopic Techniques. 3 Credits.
Advanced spectroscopic techniques, including Rutherford backscattering-channeling, perturbed angular correlation, Raman scattering, electron paramagnetic resonance, nuclear magnetic resonance, optical absorption, and Hall effect. Two hours of lecture and three hours of laboratory a week.

Rules & Requirements
Requisites: Prerequisite, PHYS 401 or 412; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 772L. Advanced Spectroscopic Techniques. 3 Credits.
Advanced spectroscopic techniques, including Rutherford backscattering-channeling, perturbed angular correlation, Raman scattering, electron paramagnetic resonance, nuclear magnetic resonance, optical absorption and Hall effect. One hour of lecture and five hours of laboratory a week.

Rules & Requirements
Requisites: Prerequisite, PHYS 401 or 412; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 780. Advanced Materials Science. 3 Credits.
This course covers the physical fundamentals of material science with an in-depth discussion of structure formation in soft and hard materials and how structure determines material mechanical, electrical, thermal, and optical properties. Topics include amorphous and crystal structures, defects, dislocation theory, thermodynamics and phase diagrams, diffusion, interfaces and microstructures, solidification, and theory of phase transformation. Special emphasis will be on the structure-property relationships of (bio)polymers, (nano)composites, and their structure property relationships.

Rules & Requirements
Grading Status: Letter grade.
Same as: MTSC 780, BMME 780, CHEM 780.

PHYS 821. Advanced Quantum Mechanics. 3 Credits.
Advanced angular momentum, atomic and molecular theory, many-body theory, quantum field theory.

Rules & Requirements
Requisites: Prerequisite, PHYS 722.
Grading Status: Letter grade.

PHYS 822. Field Theory. 3 Credits.
Quantum field theory, path integrals, gauge invariance, renormalization group, Higgs mechanism, electroweak theory, quantum chromodynamics, Standard Model, unified field theories.

Rules & Requirements
Requisites: Prerequisite, PHYS 722.
Grading Status: Letter grade.

PHYS 823. Field Theory. 3 Credits.
Quantum field theory, path integrals, gauge invariance, renormalization group, Higgs mechanism, electroweak theory, quantum chromodynamics, Standard Model, unified field theories.

Rules & Requirements
Requisites: Prerequisite, PHYS 722.
Grading Status: Letter grade.

PHYS 824. Group Theory and its Applications. 3 Credits.

Rules & Requirements
Grading Status: Letter grade.

PHYS 829. Principles of Magnetic Resonance. 3 Credits.

Rules & Requirements
Requisites: Prerequisite, PHYS 701, 711, and 712.
Grading Status: Letter grade.

PHYS 831. Differential Geometry in Modern Physics. 3 Credits.
Applications to electrodynamics, general relativity, and nonabelian gauge theories of methods of differential geometry; including tensors, spinors, differential forms, connections and curvature, covariant exterior derivatives, and Lie derivatives.

Rules & Requirements
Requisites: Prerequisites, PHYS 701, 711, and 712.
Grading Status: Letter grade.

PHYS 832. General Theory of Relativity. 3 Credits.

Rules & Requirements
Requisites: Prerequisite, PHYS 831; permission of the instructor for students lacking the prerequisite.
Grading Status: Letter grade.

PHYS 851. Nuclear Physics. 3 Credits.
Nuclear reactions, scattering, nuclear structure, nuclear astrophysics.

Rules & Requirements
Requisites: Prerequisites, PHYS 543 and 721.
Grading Status: Letter grade.

PHYS 862. Nuclear Physics. 3 Credits.

Rules & Requirements
Requisites: Prerequisites, PHYS 543 and 721.
Grading Status: Letter grade.

PHYS 871. Solid State Physics. 3 Credits.
Topics considered include those of PHYS 573, but at a more advanced level, and in addition a detailed discussion of the interaction of waves (electromagnetic, elastic, and electron waves) with periodic structures, e.g., X-ray diffraction, phonons, band theory of metals and semiconductors.

Rules & Requirements
Requisites: Prerequisite, PHYS 421; equivalent experience for students lacking the prerequisite.
Grading Status: Letter grade.
Same as: MTSC 871.
PHYS 872. Solid State Physics II. 3 Credits.
Topics considered include quantum and thermal fluctuations, and thermodynamics of phase transitions in a broad variety of condensed matter systems, their kinetic theory and hydrodynamics, novel materials (two-dimensional electron gas, graphene, topological insulators and superconductors, Dirac/Weyl/nodal line semimetals), condensed matter applications of modern field-theoretical methods (path integral, renormalization group, holography).

Rules & Requirements
Requisites: Prerequisite, PHYS 871.
Grading Status: Letter grade.
Same as: MTSC 872.

PHYS 873. Theory of the Solid State. 3 Credits.

Rules & Requirements
Requisites: Prerequisite, PHYS 722.
Grading Status: Letter grade.

PHYS 883. Current Advances in Physics. 3 Credits.
Permission of the instructor. In recent years, elementary particle physics, amorphous solids, neutrinos, and electron microscopy have been among the topics discussed.

Rules & Requirements
Grading Status: Letter grade.

PHYS 885. Introductory Graduate Seminar in Physics and Astronomy. 1 Credits.
Introduction to skills needed for success in graduate courses and research, including practice using general-purpose mathematical/computational tools, assessment of the research landscape and research project design, preparing a proposal, and participating in peer review. Professional development topics such as ethics and etiquette, time management, and career planning are also covered.

Rules & Requirements
Grading Status: Letter grade.

PHYS 893. Seminar in Solid State Physics. 1-21 Credits.
Research topics in condensed-matter physics, with emphasis on current experimental and theoretical studies.

Rules & Requirements
Grading Status: Letter grade.

PHYS 895. Seminar in Nuclear Physics. 1-21 Credits.
Current research topics in low-energy nuclear physics, especially as related to the interests of the Triangle Universities Nuclear Laboratory.

Rules & Requirements
Grading Status: Letter grade.

PHYS 896. Seminar in Particle Physics. 1-21 Credits.
Symmetries, gauge theories, asymptotic freedom, unified theories of weak and electromagnetic interactions, and recent developments in field theory.

Rules & Requirements
Grading Status: Letter grade.
