PUBLIC HEALTH (PUBH)

PUBH 89. First-Year Seminar: Special Topics. 3 Credits.
Content varies by semester.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 2 total completions.
Grading status: Letter grade.

PUBH 420. The HIV/AIDS Course. 1 Credit.
This course offers participants a multidisciplinary perspective on HIV/AIDS -- its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Letter grade.

PUBH 500. Global Health Discussion Series. 0.5 Credits.
Provides opportunities for students to get to know each other through an exchange and discussion. Students exchange points of view with globally experienced faculty at UNC-Chapel Hill.
Grading status: Letter grade.

PUBH 510. Interdisciplinary Perspectives in Global Health. 3 Credits.
Explores issues, problems, and controversies in global health through an interdisciplinary perspective; examines the complex tapestry of social, economic, political, and environmental factors that affect global health; analyzes global health disparities through a social justice and human rights lens; and exposes students to opportunities in global health work and research.
Repeat rules: May be repeated for credit.
Grading status: Letter grade.

PUBH 610. Introductory Spanish for Health Professionals. 3 Credits.
This course is intended for students who know no Spanish or so little that they feel the need to start over. Students with more than two semesters of college Spanish are not eligible. The course covers the curriculum of first-semester Spanish taught within a health context, with a focus on speaking.
Grading status: Letter grade.

PUBH 613. Intermediate Spanish for Health Care I. 3 Credits.
This intermediate course is the equivalent of the third semester of college Spanish. Students will hone their listening and speaking skills in class primarily through role-playing activities and class discussion. Activities center on an original film set in a health clinic in rural North Carolina.
Grading status: Letter grade
Same as: AHSC 613I, NURS 613I, SOWO 613I.

PUBH 614I. Intermediate Spanish for Health Care II. 3 Credits.
Permission of the instructor. This primarily e-learning course provides public health students with the opportunity to improve their oral communication skills in Spanish at the intermediate level via DVD, Web, and workbook. Instructor-led. Online course.
Requisites: Prerequisite, PUBH 613.
Grading status: Pass/Fail
Same as: AHSC 614I, NURS 614I, SOWO 614I.

PUBH 615. Advanced Spanish for Health Care I. 3 Credits.
Required preparation, third semester Spanish or equivalent. This advanced course reviews the grammar of the third and fourth semester of college Spanish. Students hone their listening and speaking skills through role-playing activities and class discussion. Activities center on an original film set in a Latino-run health clinic.
Grading status: Letter grade
Same as: AHSC 615I, NURS 615I, SOWO 615I.

PUBH 616I. Health Care Informatics. 2 Credits.
Course designed to provide a multimodal learning experience that prepares health sciences students to learn to become proficient at selecting/using technology for organizing, analyzing, and managing information in health care settings.
Grading status: Letter grade.

PUBH 690. Special Topics in Public Health Leadership. 1-3 Credits.
Permission of the instructor. Sections will focus on specific topics of current interest to health workers. Fliers describing the section offering will be distributed prior to registration each semester. Lecture hours per week dependent upon credit.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

PUBH 696. Independent Study. 1-3 Credits.
Independent Study to address goals and objects of student. Prior faculty agreement is required. Registration for an independent study course must be completed after the learning contract has been approved and no later than the last day of "late registration" (the end of the first week of classes in F/S).
Grading status: Letter grade.

PUBH 701. Cost-Effectiveness in Health and Medicine. 2 Credits.
Overview of economic evaluations of public health and health care interventions, understanding basic methods of cost-effectiveness analyses (CEA) and use of CEA to inform resource allocation decisions. Critically appraise CEA for internal validity and applicability. Explore controversial CEA issues, including methodological controversies and ethical issues for the prioritization of resources.
Grading status: Letter grade.

PUBH 702. Systematic Review. 1 Credit.
Course gives students background in assessing and conducting systematic reviews. Focuses on 1) reading, discussing, and critiquing systematic reviews on various topics; 2) reading background and methods articles on systematic reviews; 3) developing a focused question for systematic review; and 4) working on the systematic review over the semester.
Grading status: Letter grade.

PUBH 704. Foundations of Global Health. 2-3 Credits.
Students will gain a broader understanding of population-based global health issues. Critically examines global health topics with learning from on-line modules and learning assignments and interactive seminars with student presentations.
Grading status: Letter grade.

PUBH 705. One Health: Philosophy to Practical Integration. 1-3 Credits.
This course explores the intersection of human, animal, and environmental health and facilitates the understanding of health as an inexorably linked system requiring multidisciplinary collaborative efforts. The One Health concept demonstrates the importance of a holistic approach to disease prevention and the maintenance of human, animal, and environmental health.
Grading status: Letter grade
Same as: ENVR 705.
PUBH 706. Advanced Health Policy for Clinicians. 3 Credits.
An introduction to the fundamental organization, behavior, financing, and challenges of the health system of the United States. The course treats the entire edifice of American health care as "the American health system," and intends to examine it in toto, including by comparing it to other national health systems, and in part, by examining critical components of the system. Students must be enrolled in the Population Health for Clinicians Concentration or permission of the instructor.
Grading status: Letter grade.

PUBH 710. Introduction to Global Health Ethics. 1 Credit.
This course is designed to give students the skills to identify and effectively address ethical issues that arise in global health research and practice.
Grading status: Letter grade.

PUBH 711. Critical Issues in Global Health. 3 Credits.
Explores contemporary issues/controversies in global health through an interdisciplinary perspective; examines complexity of social, economic, political, and environmental factors affecting global health; analyzes global health disparities through a social justice lens; and exposes students to opportunities in global health work and research.
Grading status: Letter grade.

PUBH 712. Global Health Ethics. 3 Credits.
This course will introduce students to the theoretical and practical aspects of public health ethics. Develop student’s analytical skills to evaluate ethical issues related to public health policy, prevention, treatment, and research. Topics include: ethical reasoning, concepts of justice, principles of interacting with communities; professional conduct and research. Online course.
Grading status: Letter grade.

PUBH 714. Introduction to Monitoring and Evaluation of Global Health Programs. 3 Credits.
Fundamental concepts/tools for monitoring/evaluating public health programs including HIV/AIDS/STDs, maternal/child health, environment, and nutrition. Concepts and practices in M&E will be covered: logic models, theory of change, indicators, data collection methods, process evaluation, research design, and mixed methods. Small group work to create M&E plan for global health case-study. Online.
Grading status: Letter grade.

PUBH 716. Applied Quality Improvement Methods for Healthcare and Public Health. 3 Credits.
The course objective is to develop, implement, and test a solution to improve health care or public health delivery, using a model called the Model for Improvement (or MFI). The model uses three questions to scope the improvement project and four steps, Plan-Do-Check-Act, to implement and test solutions.
Grading status: Letter grade
Same as: MHCH 816, HPM 716.

PUBH 717. Designing Public Health Systems. 3 Credits.
Using powerful tools from engineering and management, this course equips students to conceptualize, design, and analyze public health and healthcare delivery systems for successful implementation.
Grading status: Letter grade.

PUBH 719. Introduction to Implementation Research and Practice in Public Health. 3 Credits.
This course introduces the concepts, frameworks, and methods of implementation research and practice. By the end of this course, students will be able to explain the rationale for this field, identify guiding frameworks, assess multilevel barriers and facilitators, and address barriers and facilitators with implementation strategies tailored to specific contexts.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 9 total credits. 99 total completions.
Grading status: Letter grade
Same as: HPM 719.

PUBH 720. The HIV/AIDS Course. 1 Credit.
This course offers participants a multidisciplinary perspective on HIV/AIDS – its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Letter grade.

PUBH 725. The HIV/AIDS Course Online. 1 Credit.
This online course offers a multidisciplinary perspective on HIV/AIDS – its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Letter grade.

PUBH 726. Western North Carolina Place-Based Approach to Public Health. 1 Credit.
Introduces concepts, issues, and examples related to public health in Western NC. We will explore "place", i.e. the histories, contexts, peoples, landscapes, and other aspects of what contributes to the current wellbeing of communities for developing and building on existing approaches to improving the public’s health. Integrates critical reading and media with visits to and experiences with people/health institutions in Western NC, to better understand and plan relevant public health interventions. Asheville Cohort students only.
Grading status: Letter grade.

PUBH 727. Community Health Transformation. 3 Credits.
Community is a key aspect of place-based public health. Key components are Community Based and Participatory Research and Action (CBPRA) and Communities of Solution (COS), and the ways that these approaches may improve community health in WNC communities. Community engagement and CBPRA principles will be applied to the health promotion program planning process, from situation analysis/needs assessment to program evaluation, including Results-Based Accountability (RBA). Intended for students who have completed the MPH core. Enrollment restricted to students who have completed the MPH Core courses; Course is held in Asheville NC and includes a community project.
Grading status: Letter grade.

PUBH 728. Place-Based Systems Transformation. 3 Credits.
This course provides and introduction to systems transformation of health-related systems in Western North Carolina, including health care, food access, and environmental systems. The course examines disparities in the Western NC context that are due to intercultural interactions, structural bias, and historical factors, as well as other contributing factors like food networks, education, and relational networks. Concepts such as syndemics, ACEs, allostatic load, systemic oppression and racism will also be part of the inquiry.
Grading status: Letter grade.
PUBH 730. Leading Quality Improvement in Public Health. 3 Credits.
Overview of quality improvement (QI) and its important relationship to leadership. Focus on practical skills with sufficient theory to understand the origins of the philosophy and processes encompassed by QI. For working practitioners with current or future management/leadership responsibilities within their organizations.
Grading status: Letter grade.

PUBH 731. Public Health Social Marketing. 3 Credits.
Course will orient students to market-based strategies, models, and tactics for improving individual and community health status within the framework of marketing, strategic communication, and advocacy. Online course.
Grading status: Letter grade.

PUBH 734. Place-based Theory in Public Health. 2 Credits.
Concepts of place-based PH including community beliefs, behaviors, system structures, culture, art, geography and how they provide assets/barriers for the community’s health will be addressed. The impact of rurality, person, race, poverty, gender, ethnicity, culture, behavior and society on health outcomes, will be examined and the concept of place-based from public health, sociology, anthropology and economic perspectives. Students will explore/integrate concepts with visits to and experiences with people and health institutions in Western NC.
Grading status: Letter grade.

PUBH 736. Individual Transformation Applied to Public Health and Place. 3 Credits.
Students work through the place-based principle of understanding oneself, one’s values and place in and relationship to identity and values of the community. Students assess personality, leadership style and its application to improve public health. Students will examine social location, implicit bias, their effects on public health and one’s personal health. Students will assimilate personality preference, personal strengths and weaknesses, group inclusion, change leadership style into understanding how to engage effectively in groups and communities.
Grading status: Letter grade.

PUBH 737. Place-based Research & Evaluation Methods. 2 Credits.
A research workshop teaching foundational tools and uses of research methods and how to appropriately apply them to improve the community health and place.
Grading status: Letter grade.

PUBH 738. Place-based Community Transformation. 3 Credits.
Community engagement and CBPRA principles will be applied to the health promotion program planning process, from situation analysis/needs assessment to program evaluation, including Results-Based Accountability (RBA). This course will show students how to follow principles of collaboration to build interdisciplinary teams using the Communities of Solution model, discuss the ethics of community engagement and the role of policy in place-based approaches to public health. Students will work on a community-collaborative project to apply course concepts.
Requisites: Prerequisites, SPHG 711, 712 and 713.
Grading status: Letter grade.

PUBH 739. Place-Based Systems Transformation. 3 Credits.
This course will discuss and review health transformation as it relates to complex and rapidly changing health care systems (noting areas of disparity), food access, environmental systems and structural policy, intercultural interactions, structural bias, and historical context in WNC. We will evaluate WNC health systems and how health transformation is changing these health care systems and the place of public health to help improve the process.
Grading status: Letter grade.

PUBH 740. Implementation of Place-based Theory and Design in Public Health. 3 Credits.
Students will apply place-based theory to design community-based intervention and engage with local community partners to develop multi-sectoral strategies and employ qualitative techniques to understand community concerns regarding the public health issue. Students will determine key stakeholders, bring them together and create a community of solution to address the public health issue, while discussing financial development and sustainability for the proposed community interventions.
Grading status: Letter grade.

PUBH 741. Quantitative Methods for Health Care Professionals I. 4 Credits.
Course is designed to meet the needs of health care professionals to appraise the design and analysis of medical and health care studies and who intend to pursue academic research careers. Covers basics of statistical inference, analysis of variance, multiple regression, categorical data analysis. Permission of instructor.
Grading status: Letter grade.

PUBH 742. Quantitative Methods for Health Care Professionals II. 4 Credits.
Continuation of PUBH 741. Main emphasis is on logistic regression; other topics include exploratory data analysis and survival analysis.
Requisites: Prerequisite, PUBH 741; Permission of the instructor for students lacking the prerequisite.
Grading status: Letter grade.

PUBH 745. Leadership Across the Program Development Continuum. 3 Credits.
Introduces concepts and methods for leading community health improvement efforts; implementing public health programs; evaluating their process and effectiveness. Grounded in public health practice, students will complete the course with the skills necessary to lead the design of a community health assessment and improvement process, and conceptualize and develop a program and evaluation plan. Working in interdisciplinary teams, students discuss and practice skills for building effective teams and accomplishing individual and group objectives through teamwork.
Grading status: Letter grade.

PUBH 746. Applied Public Health Leadership in Program Planning and Evaluation. 3 Credits.
SPH majors or permission of the instructor. Fundamentals of public health program planning and monitoring, with emphasis on applications in community settings and proposal development for program funding.
Grading status: Letter grade
Same as: PHNU 746.
PUBH 747. Project Management Principles and Practices. 3 Credits.
Graduate students only. Provides an overview of knowledge and skills required for effective project/team leadership and management. Includes modules on leadership, management techniques, application of continuous quality improvement, and organizational designs that complement team-based organizations. Online course.
Grading status: Letter grade.

PUBH 748. Leadership in Health Policy for Social Justice. 3 Credits.
This course will provide students with the knowledge and skills to develop policies that address public health challenges, with an emphasis on improving health equity, promoting social justice, and creating systems in which the human right to health is given full effect.
Grading status: Letter grade.

PUBH 749. MPH Year & Career. 1 Credit.
Designed for students in the Population Health for Clinicians concentration in the MPH program who are actively working on their practicum/master’s paper. Ten required evening sessions are scheduled in the fall and ten required evening sessions are scheduled in the spring.
Repeat rules: May be repeated for credit. 2 total credits. 2 total completions.
Grading status: Letter grade.

PUBH 750. Strategies of Prevention for Clinicians. 3 Credits.
Designed for those interested in the clinical arena. Establishes a framework for examining prevention activities for clinicians, and then considers a number of important health problems and the evidence for applying prevention strategies to these health problems. Encourages active student participation and involves a multidisciplinary faculty. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.

PUBH 751. Critical Appraisal of Health Literature I. 2 Credits.
Emphasizes the process of critical appraisal of existing medical research literature, with examples from a variety of subject areas. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.

PUBH 752. Critical Appraisal of Health Literature II. 1 Credit.
Emphasizes the process of critical appraisal of existing medical research literature, with examples from a variety of subject areas. Student presentations of structured critical appraisals constitute about 50 percent of sessions. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.

PUBH 754. Research Frameworks and Methods for Assessing and Improving Population Health. 3 Credits.
This course is designed to provide students with the fundamental research and analytic methods needed by public health leaders to assess the effectiveness, efficiency, and equity of healthcare in order to improve population health. The focus will be on research skills needed by practitioners with the objective of improving health outcomes.
Grading status: Letter grade.

PUBH 755. Translating Evidence into Practice for Population Health. 2 Credits.
The course provides an engaging, intellectual environment for students to discuss conceptual frameworks, study designs, and population outcome measures for closing the gap between evidence and daily practice across important population subgroups and in diverse clinical settings. Students complete a series of assignments, including a final paper and presentation.
Grading status: Letter grade.

PUBH 756. Addressing Health Inequalities in the United States. 3 Credits.
Disparities in morbidity/mortality in sub-populations continue compared to other United States populations. Course explores contributors to inequalities and identifies strategies to counterbalance contributors to correct inequalities using public health resources.
Grading status: Letter grade
Same as: MHCH 756.

PUBH 760. Clinical Measurement and Evaluation. 3 Credits.
Focuses on work, workplace exposures and hazards, and their effect on health. Interdisciplinary approaches to risk identification, reduction, and communication will be emphasized within regulatory and ethical contexts.
Grading status: Letter grade
Same as: EPID 711.

PUBH 763. The Politics of Health Reform, Quality, Outcomes, and Effectiveness. 3 Credits.
Systematic analysis of recent reforms to the U.S. health care system, including passage and initial implementation of the Affordable Care Act, with particular attention to how reform is intended to improve access, quality, equity, and effectiveness and whether reform can accomplish this while controlling cost.
Grading status: Letter grade.

PUBH 764. Interdisciplinary Seminar in Refugee Health and Wellness. 1-3 Credits.
Academic year-long seminar for health profession students to engage in inter-professional teams, providing healthcare access and mental health assessment, case management, and health promotion to refugees resettled in the Triangle. Graduate course open to undergraduates. MUST enroll in both fall and spring semesters.
Repeat rules: May be repeated for credit. 3 total credits. 3 total completions.
Grading status: Letter grade.

PUBH 767. Team Leadership in Research Navigation. 3 Credits.
Team leadership and management practices with an emphasis on successful team leadership in clinical research. Team effectiveness strategies provide framework for development of successful leadership of teams undertaking clinical research.
Grading status: Letter grade.

PUBH 781. Community Engagement and Leadership in Health. 3 Credits.
Students will gain a basic understanding of how to be leaders in applying principles of community engagement in public health programs and organizational settings by engaging different stakeholder sectors, promoting multi-level cohesion among different audiences, communicating strategies, and collaboratively designing community engagement and implementation plans.
Grading status: Letter grade.
PUBH 782. The Public Health Impact of Criminalizing the Marginalized. 2 Credits.
This course will define criminalization and describe how this phenomenon disproportionately impacts the health of marginalized populations. Students will analyze the social construction of illicit behavior and subsequent criminal involvement and use the principles of life course theory and social ecological framework to explore associations between what is criminalized and health outcomes. The course will also describe the impact of criminalization on emerging health policy and introduce public health tools needed to address these challenges.
Requisites: Pre- or corequisite, SPHG 711, SPHG 712, and SPHG 713; permission from instructor for students lacking the prerequisite.
Grading status: Letter grade.

PUBH 783. Mass Incarceration & Public Health. 2 Credits.
This course examines the public health implications of mass incarceration in the US. Using a public health prevention framework, students will investigate the intersection of the criminal justice system with health outcomes. Students will identify alternative strategies grounded in public health, social justice and human rights principles to create healthier communities.
Requisites: Prerequisite, SPHG 711, 712, 713 preferred but not required; contact instructor for permission if SPHG 711, 712, 713 have not been undertaken.
Grading status: Letter grade.

PUBH 784. Project Management Strategy and Application. 3 Credits.
This course presents classic project management concepts and methods, applicable to research, public health, healthcare, information science and other team projects, with an aim to develop a toolbox of strategies to effectively manage projects using globally accepted theoretical frameworks; practice is gained via assignments, cases, lectures, and course project.
Grading status: Letter grade.

PUBH 790. Fundamentals of Public Health Leadership. 3 Credits.
This course is designed to gain a deeper insight into their own and others’ leadership styles, behaviors, and emotional intelligence. Students will engage in a day-long active-learning workshop every other week and access videos, readings and assignments online. Students will engage with the instructor and peers in person via reflection journals, large and small group activities, leadership assessments. Students will produce a leadership development plan and generate a set of professional goals.
Grading status: Letter grade.

PUBH 791. Core Principles in Public Health Leadership. 3 Credits.
Course will introduce students to leadership theories and research, provide a context for leadership in public health, and help students learn core leadership skills.
Grading status: Letter grade.

PUBH 804. Issues in Public Health Leadership. 1 Credit.
This course will provide a case-based approach to the approaches different public health leaders have used to deal with a variety of public health issues. The course will focus on identifying the public health competencies used in real-world situations and how students can apply those competencies to their own work in public health.
Grading status: Letter grade.
