DEPARTMENT OF ANTHROPOLOGY (GRAD)

The Ph.D. program in anthropology draws on the intellectual strengths of the department's faculty and a tradition of excellence in scholarly and applied approaches to train students to become leading researchers, teachers, and practitioners of anthropological knowledge. We only admit students pursuing a Ph.D. degree and offer specialized training to support their work. Students may earn an optional master's degree as part of their progress toward a Ph.D., should they desire.

Our graduate program offers intensive training in the methods and debates of contemporary anthropology, while also valuing interdisciplinary study. The Department of Anthropology and its doctoral program remain integrally connected to a range of interdisciplinary programs, centers, and research initiatives across the university and beyond. Up-to-date lists of anthropology faculty members and courses, along with additional information about the graduate program, faculty research projects, interdisciplinary affiliations, and other information are available on the department's website (http://anthropology.unc.edu/).

The Ph.D. program offers advanced training in archaeology, biological, medical, and sociocultural anthropology. The topics and structures of graduate students’ dissertational research are flexible, provided they meet the formal approval of the student’s advisor, Ph.D. committee, and the faculty. Recognizing the wide array of issues that anthropologists study today, the doctoral program aims to provide the specialization and accommodation that doctoral students require for their Ph.D. projects, while also facilitating generative exchange and awareness across the subfields of contemporary anthropology.

During the first year in the program, students are required to take an integrated three-field ‘Core’ proseminar (ANTH 701), during the fall semester. Students subsequently are required to take a specialized Core proseminar in their respective subfield.

Our doctoral program puts a premium on professionalization and career development. First-year students are required to enroll in our Monday afternoon seminar “The Practice of Anthropology”, which focuses on developing the skills and credentials necessary for a successful career in anthropology. Though required for first-year students, all doctoral students are encouraged to attend this fall-spring seminar—as it is a locus of our departmental culture. The program also relies on a portfolio model to organize student’s professional development. Assembled throughout one’s time in the program, these portfolios provide a repository of key credentials, achievements, and resources for advancement in academic and/or non-academic careers. The internal components of these portfolios will vary by subfield and student, and should be developed in regular consultation with the student’s advisor.

During the second year, graduate students are required to produce a substantial piece of independent research/writing, advised by a three-member faculty committee (also constituted during the second year). The nature of this requirement varies by subfield. At the end of Year 2, the committee will assess this work and make a recommendation whether the student is to move forward with preparing for their comprehensive exams in Year 3.

During the third year, students should be preparing for fieldwork, applying for funding, writing their dissertational proposal, and progressing toward their comprehensive exams. Prior to their exams, students are required to constitute their 5-person dissertation committee, with whom they will work closely for the duration of their time in the program. Ensuring competency in one’s field-language is an important facet of anthropological research. Students, in collaboration with their committee, will ensure these needs are met prior to their PhD exams. Graduate students are recommended to take their written and oral Ph.D. exams by the end of Year 3. Upon successfully completing their exams, students advance to Ph.D. candidacy (becoming ‘ABD’) and may formally begin their dissertational research. ABD students may register for dissertation hours (ANTH 994), while completing their thesis.

Dissertational fieldwork in anthropology varies by subfield. Sociocultural anthropologists typically conduct a minimum of one year’s field work, which provides the context for the dissertation data. Students of archaeology or biological anthropology may combine fieldwork with analysis of preexisting collections and data.

Following dissertational fieldwork, students typically take one to two years to write and defend their dissertation. The successful defense of one’s dissertation confers the Ph.D. degree, thus completing the doctoral program.

Any exceptions to these requirements must be approved by the director of graduate studies.

Following the faculty member’s name is a section number that students should use when registering for independent studies, reading, research, and thesis and dissertation courses with that particular professor.

How is psychiatry predicated on cultural ideas about self and society? What does this contingency mean for the movement for global mental health?
