Nancy Bagatell, Director
Nancy_Bagatell@med.unc.edu

The Division of Occupational Science and Occupational Therapy in the Department of Allied Health Sciences offers two graduate programs: a master of science (M.S.) degree with a major in occupational therapy and a doctor of philosophy (Ph.D.) degree in occupational science. The M.S. in occupational therapy program is a two-year program designed for individuals with a baccalaureate degree in a field other than occupational therapy. It is an entry-level program for individuals who wish to become occupational therapists. The Ph.D. program in occupational science accepts applicants with an earned master’s degree in occupational therapy or a related field (see admission requirements below). The doctoral program prepares individuals who wish to pursue academic careers that could include teaching, research, and other scholarly activities related to occupational science and occupational therapy.

Requirements for Admission into the M.S. Program in Occupational Therapy
1. Bachelor’s degree from an accredited institution
2. Submission of Graduate Record Examination (GRE) scores from the Educational Testing Service
3. Academic record that demonstrates potential to do work at the graduate level
4. Completion of the occupational therapy supplemental application

The M.S. program has eight prerequisite courses, four of which are fixed (core body of knowledge) and four of which fall into categories that are "flexible," meaning that a variety of courses can fulfill the requirement in that category. All prerequisites except the occupation course must be taken for credit in an accredited academic institution of higher learning and must be no more than five years old at the time of application. The occupation prerequisite must be no more than three years old.

Fixed Prerequisites
1. Human anatomy with a laboratory
2. Human physiology
3. Abnormal psychology
4. Introductory statistics

Flexible Prerequisites
1. Human/individual behavior (for example: developmental psychology; child development; adulthood and aging; cognitive psychology; neuro-psychology)
2. Modes of reasoning (for example: philosophy; ethics; statistics or data analysis [beyond the introductory course]; comparative religion, art, or music; literature taught in a foreign language; research design or methods)
3. Study of social relationships, institutions, and systems (for example: linguistics; cultural/social anthropology; sociology [beyond intro level]; public health; public policy; leisure studies; political science; minority studies)
4. Occupation: Complete a course in either an academic or community-based setting that requires the skills of your body as well as your mind. The occupation prerequisite must have the following characteristics:
   • new learning/challenge (not something you already do or know how to do)
   • formal (structured) learning context, but does not have to be a "for credit" course
   • at least once a week for a minimum of six weeks
   • social context (other learners present in person; online courses are not accepted)
   • results in an end product or performance
   • learners must be active (not just recipients of information)
   • course content is not designed to be used to benefit, teach, or communicate with others

Examples include creative writing, poetry writing, studio art class, woodworking, jewelry making, theater, dance, music, and some sports.

The master of science program requires a minimum of 63 semester credit hours. The program is 24 months in length and includes substantial field work experience.

Occupational therapy courses are available only to graduate students enrolled in the M.S. program at the University.

Requirements for Admission into the Ph.D. Program in Occupational Science
The Ph.D. program in occupational science accepts academically qualified applicants who have completed master degrees in occupational therapy, relevant social and behavioral sciences, or related health fields. Applicants receive a thorough review for evidence of potential success in a doctoral program in The Graduate School at UNC–Chapel Hill. In order to achieve closely mentored research experiences, only applicants with expressed interests consistent with existing programs of research and scholarly work of the faculty are admitted. Final selection among qualified applicants will be based on an interview with core faculty members in the Ph.D. program in occupational science. Review the UNC–Chapel Hill Web site for information about applying to The Graduate School. In addition to the formal application to The Graduate School, the following information is required:
1. Copies of all undergraduate and graduate transcripts
2. Graduate Record Examination (GRE) scores (taken within the last five years)
3. Results of the TOEFL (Test of English as a Foreign Language, if applicable)
4. A reflective essay detailing personal and professional goals relevant to the pursuit of a Ph.D. in occupational science at UNC–Chapel Hill
5. Three letters of recommendation from individuals who support the applicant’s potential as an educator and scholar

The Ph.D. program requires a minimum of 45 semester credit hours beyond the master’s degree. This course of study covers four domains:

1. Occupational science
2. An interdisciplinary cognate area that complements occupational science
3. Research design and methodology
4. Competencies for an academic career

All graduates must complete a doctoral dissertation in occupational science. Students are also expected to reach satisfactory competence in teaching and research as determined by their career goals.

With approval from the instructor, occupational science courses are open to graduate students interested in

1. The study of people engaged in everyday activities in different situations and
2. How various experiences in an activity or patterns of engagement influence development, health, and quality of life across the lifespan.

### Clinical Professors

**Susan Coppola,** Aging, Interprofessional Education, International Practice, Humanities in Health Care

**Jenny Womack,** Aging, Community-Based Practice, Physical Rehabilitation, Assistive Technology, Universal Design and Environmental Modifications

### Clinical Associate Professors

**Nancy Bagatell,** Adolescents and Adults with Autism and Other Developmental Disabilities: Independent Living and Community Participation

**Lauren Holahan,** School-Based Occupational Therapy

**Linn Wakeford,** Occupation-Centered Services for Infants and Preschoolers with Developmental Delay, Diversity and Inclusion

### Assistant Professor

**Antoine Bailliard,** Social Justice, Mental Health, Sensory Processing

### Clinical Assistant Professor

**Raheleh Tschoepe,** Physical Rehabilitation, Spinal Cord Injury and Other Neurologic Rehabilitation, Seating and Positioning, Community Reintegration

**Katie Sorensen,** Physical Rehabilitation, Disability Rights and Advocacy, Fieldwork

### Professor Emerita

**Ruth Humphry**

**Cathy Nielson**

### Associate Professors Emeritae

**Virginia Dickie**

**Jane Rourk**

### OCCT (Occupational Therapy)

#### Graduate-level Courses

**OCCT 704. Research in Occupational Science and Therapy. 3 Credits.**
Examination of research approaches and issues within occupational science and occupational therapy. Development of skills in writing research proposals and applying research results to insure evidence-based practice.

**Grading status:** Letter grade.

**OCCT 720A. Fieldwork II. 6 Credits.**
Direct experience with clients/patients in varied service treatment settings. Experience will include adult disabilities.

**Grading status:** Letter grade.

**OCCT 720B. Fieldwork II. 6 Credits.**
Direct experience with clients/patients in varied service treatment settings. Experience will include adult disabilities.

**Grading status:** Letter grade.

**OCCT 725. Human Capacities: Body Structures and Functions I. 3 Credits.**
An introduction to the structures, functions, and processes of the human body that support participation. Mental and sensory processing, digestion, reproduction, endocrine, and immune responses that support occupation are explored.

**Grading status:** Letter grade.

**OCCT 726. Human Capacities: Body Structures and Functions II. 3 Credits.**
An introduction to the structures, functions, and processes of the human body that support participation. The focus is on motor and somatosensory capacities and the structures related to those functions.

**Grading status:** Letter grade.

**OCCT 727. Perspectives on Disability and Health I. 2 Credits.**
An exploration of the biological and phenomenological aspects of specific mental and physical health conditions that may be experienced by children, adolescents, and young adults.

**Grading status:** Letter grade.

**OCCT 728. Perspectives on Disability and Health II. 2 Credits.**
This course addresses the biological and phenomenological aspects of specific mental and physical health conditions that may be experienced by adults.

**Requisites:** Prerequisite, OCCT 727.

**Grading status:** Letter grade.

**OCCT 729. Perspectives on Disability and Health III. 2 Credits.**
Complex health conditions and changes affecting older adults’ capacity to engage in meaningful occupations. Biomedical and narrative perspectives.

**Requisites:** Prerequisite, OCCT 727.

**Grading status:** Letter grade.

**OCCT 736. Occupational Therapy Practice Environments. 3 Credits.**
Overview of OT practice settings, professional organizations, and regulatory bodies. Factors influencing practice, including legislation, reimbursement, documentation, and culture of communities. Ethics, confidentiality, self-awareness, teamwork, and professionalism in practical settings.

**Grading status:** Letter grade.
OCCT 755. Foundations of Occupational Therapy Practice. 3 Credits.
Introduction of core foundations for occupation-centered occupational
therapy practice. Students learn fundamentals of professional
communication and behavior, therapeutic use of self, clinical reasoning,
activity analysis, theory, and evidence-based practice.
Grading status: Letter grade.

OCCT 756. Therapeutic Processes I. 3 Credits.
Occupational therapy majors only. This course focuses on occupational
therapy practice with children, adolescents, and young adults who have
disabilities or health problems that inhibit occupational performance and/
or social participation, across a variety of situations.
Requisites: Prerequisites, OCCT 755 and 765L.
Grading status: Letter grade.

OCCT 757. Therapeutic Processes II. 3 Credits.
A focus on occupational therapy practice with adults that have physical
and/or mental health conditions that impact their participation in
occupations.
Requisites: Prerequisite, OCCT 727.
Grading status: Letter grade.

OCCT 765L. Foundations of Occupational Therapy Practice Lab. 2
Credits.
Provides opportunities for students to practice and begin developing
key clinical skills in observation, analysis, interpersonal interactions/
communication, documentation, and applying concepts related to theory-
based and evidence-based practice.
Grading status: Letter grade.

OCCT 766L. Therapeutic Processes Lab I. 2 Credits.
Occupational therapy majors only. Provides opportunities for students
to practice and begin developing key clinical skills in assessment,
intervention planning, intervention strategies, and documentation in
practice with children, adolescents, and young adults.
Requisites: Prerequisites, OCCT 755 and 765L.
Grading status: Letter grade.

OCCT 767L. Therapeutic Processes Lab II. 1 Credit.
This applied lab addresses the content and technical skills of practice
with adults who encounter occupational therapy due to various life and
health conditions.
Requisites: Prerequisite, OCCT 766L.
Grading status: Letter grade.

OCCT 770. Occupational Science. 3 Credits.
Introduction to the philosophical tenets of occupational science and their
application to occupational therapy. The course highlights the multiplicity
of interconnected factors which generate participation in occupational
situations.
Grading status: Letter grade.

OCCT 771. Life Course I: Early Years. 2 Credits.
Changing capacities for engagement with occupations and occupational
opportunities during childhood, adolescents, and early adulthood.
Grading status: Letter grade.

OCCT 772. Life Course II: Adulthood. 1 Credit.
Examination of the patterns of participation through occupational
engagement with families, communities, workplace, and other social
structures in the middle years of the life course.
Requisites: Prerequisite, OCCT 771.
Grading status: Letter grade.

OCCT 773. Life course III: Older Adults. 3 Credits.
Changing capacities for engagement with occupations and occupational
opportunities during older adulthood. Strategies for compensation and
adaptation.
Requisites: Prerequisites, OCCT 771, 772.
Grading status: Letter grade.

OCCT 781. Environments and Technologies. 2 Credits.
Occupational therapy majors only. Exploration of environmental
dimensions of performance. Learn to use assistive and rehabilitation
technologies in practice. Students assess situational impact on
performance, modify the environment for therapeutic effect, and utilize
technology.
Grading status: Letter grade.

OCCT 836. Community Level OT Practice. 3 Credits.
This course develops the students' understanding of social systems, how
they function, and are perpetuated through everyday practices. Students
partner with community entities to identify strengths, resources, and
service gaps and develop a response.
Requisites: Prerequisites, OCCT 727, 728, 757.
Grading status: Letter grade.

OCCT 837. Professional Development and Transition to Practice. 2
Credits.
Professional understanding and skills to assess practice context, plan
programs, and management of profession interpersonal relationship for
collaboration and service delivery.
Requisites: Prerequisite, OCCT 736.
Grading status: Letter grade.

OCCT 896. Independent Study: Occupational Therapy and Science. 1-15
Credits.
Elective. Independent study to pursue specific interests and topics.
Faculty supervision. May be repeated for credit.
Grading status: Letter grade.

OCCT 990. Applied Research Seminar I. 1 Credit.
Applied Research Seminar with particular focus on the application of the
scientific process to address an identified clinical problem.
Requisites: Prerequisite, OCCT 704.
Grading status: Letter grade.

OCCT 992. Master's Applied Research Experience. 3 Credits.
Collaborative research projects in occupational science or occupational
therapy. Emphasis on data collection, analysis, and professional
communications of research findings.

OCCT 993. Master's Research and Thesis. 3 Credits.
Permission of the department.
Repeat rules: May be repeated for credit.

OCSC (Occupational Science)
Graduate-level Courses

OCSC 845. Conceptual Introduction to Occupational Science. 3 Credits.
Deconstruction of the original precepts of occupational science while
examining several works from other disciplines. Study of early and recent
trends and critiques of occupational science to develop an assessment of
the state of the discipline and future directions.
Grading status: Letter grade.

OCSC 855. Action Theories. 3 Credits.
A reading and discussion of major theories of action from various
disciplines. Works read will also entail associated issues such as identity,
place, culture, and social relations
Grading status: Letter grade.
OCSC 890. Seminar on Special Topics in Occupational Science. 3 Credits.
Discussion and critical evaluation of philosophy, theory, and scientific issues associated with the study of people’s activities in the context of their everyday lives. Topics differ each semester.
Grading status: Letter grade.

OCSC 896. Independent Study in Occupational Science. 3 Credits.
Independent study to pursue specific interests and topics under faculty supervision.
Grading status: Letter grade.

OCSC 994. Doctoral Research and Dissertation. 3 Credits.
Doctoral dissertation in occupational science.
