Anna P. Schenck, Director

The Public Health Leadership program (PHLP) (https://sph.unc.edu/phlp/phlp/), which is housed in the Gillings School of Global Public Health, is an interdisciplinary academic unit dedicated to providing public health professionals with leadership education to meet the challenges inherent in assuring and improving population health. PHLP’s mission is to create public health leaders with the vision and ability to anticipate and solve future health challenges wherever they occur throughout the world.

Master of Public Health (M.P.H.)

The Leadership in Practice (https://sph.unc.edu/resource-pages/master-of-public-health/leadership-in-practice-concentration/) concentration is designed to support professionals in all areas of public health practice, at every level of their leadership journey whether they are entry-level public health practitioners, public health executives, or in between. This concentration provides students with the knowledge and skills necessary to lead teams, projects, organizations, and systems to eliminate inequities, improve conditions, and foster change in local and global communities. Through this concentration, students will be prepared to empower populations to live their best lives — no matter their location. The Leadership in Practice concentration is available in residential or online format, as a full-time or part-time course of study.

The Population Health for Clinicians (https://sph.unc.edu/resource-pages/master-of-public-health/population-health-for-clinicians-concentration/) concentration is designed for medical students, practicing physicians, and other clinicians who wish to increase their knowledge in public health and population science to better serve their communities. This concentration offers a unique interdisciplinary focus on clinical, prevention, population, and policy sciences which enable students to improve clinical environment when they complete the program. This concentration is available only in a full-time, residential format.

The Place-Based Health (https://sph.unc.edu/resource-pages/master-of-public-health/place-based-health-concentration/) concentration is designed for professionals who wish to engage and collaborate with diverse communities to promote access to services and care, economic security, home stability, higher quality social systems, and optimal health. This concentration is available only in a residential format, as a full-time or part-time course of study. Please note that this concentration is based in Asheville, NC through the Mountain Area Health Education Center (MAHEC) (https://mahec.net/).

The Global Health (https://sph.unc.edu/resource-pages/master-of-public-health/global-health-concentration/) concentration is designed to train current and aspiring professionals to advance the health and well-being of populations in diverse global settings. Through this concentration, students will partner with governmental and non-governmental organizations, research institutions, and the private sector to develop and analyze public health programs and projects that are aligned with local cultures, contexts, and resources. This concentration is
available only in a residential format, as a full-time or part-time course of study.

PHLP also offers three graduate-level academic certificate programs: the certificate in field epidemiology (https://sph.unc.edu/phlp/phlp-degrees-and-certificates/certificate-in-field-epidemiology/), the certificate in global health (https://sph.unc.edu/phlp/phlp-degrees-and-certificates/phlp-online-global-health-certificate/), and the certificate in public health leadership (https://sph.unc.edu/phlp/phlp-degrees-and-certificates/phlp-public-health-leadership-certificate/). These graduate certificate programs are offered only in an online format as administered by PHLP.

**Professors of the Practice**

Anna P. Schenck, Director, Public Health Leadership Program; Health Outcomes, Public Health Quality and Quality of Care, Cancer Prevention and Treatment, Research Methods for Public Health Practice, Aging, Associate Dean for Public Health Practice, Online Education; Certificate Administrator Public Health Leadership Online Certificate Program

Vaughn Upshaw, Concentration Lead (Leadership in Practice); Public Health Leadership, Online Education

**Professors**

Rohit Ramaswamy, Continuous Quality Improvement, Implementation Science, Online Education

Sue Tolleson-Rinehart, Population Health for Clinician, Health Policy

**Associate Professors**

Kauline Cipriani, Public Health Leadership, Diversity and Inclusion

Lori Carter-Edwards, Public Health Leadership, Online Education

Lori A. Evarts, Director Graduate Studies; Project Management, Team Effectiveness, Clinical Research, Leadership, Online Education

**Assistant Professors**

Karine Dubé, Public Health Leadership, Online Education

Cynthia Feltner, Concentration Lead (Population Health for Clinicians); Medicine

Tamarie Macon, Place-Based Health, Rural Health

Aimee McHale, Public Health Leadership, Online Education

Dana Rice, Public Health Leadership, Online Education

Sarah Brill Thach, Place-Based Health, Rural Health

**Adjunct Professors**

Timothy Gabel, Population Health for Clinicians

Russell Harris, Public Health Leadership

Daniel Jonas, Population Health for Clinicians, Health Services Research, Comparative Effectiveness

Linda Kinsinger, Public Health Leadership

Amy Lanou, Place-Based Health

J. Lloyd Michener, Population Health for Clinicians

Virginia Moyer, Population Health for Clinicians

Medge Owen, Public Health Leadership

Marcus Plescia, Public Health Leadership

Greg Randolph, Population Health for Clinicians, Quality Improvement

Kevin Sowers, Population Health for Clinicians

Paula Brown Stafford, Public Health Leadership

Hugh Tilson, Public Health Practice, Leadership, Epidemiology

Anthony Viera, Population Health for Clinicians

Sanjay Zodpey, Public Health Leadership

Adam Zolotor, Population Health for Clinicians

**Adjunct Associate Professors**

Ameena Batada, Place-Based Health, Rural Health

Martha Carlough, Population Health for Clinicians

Anthony Charles, Population Health for Clinicians

Nancy McGee, Public Health Leadership

Sandy Moulton, Leadership, Practicum Placements

Jacqueline Olich, Practicum Placements, Leadership, Global Online

Deborah Porterfield, Population Health for Clinicians

Richard Scoville, Population Health for Clinicians

**Adjunct Assistant Professors**

Kathryn Andolsek, Population Health for Clinicians

Jim Bowles, Public Health Practice

Marcella H. Boynton, Population Health for Clinicians

Russell Coletti, Population Health for Clinicians

Sheri Denslow, Place-Based Health

Pamela Dickens, Public Health Leadership

Donna Dinkin, Public Health Leadership

Diane Davis, Public Health Leadership

Bahar Emily Esmaili, Public Health Leadership

Marie Lina Excellent, Public Health Leadership

Kim Faurot, Population Health for Clinicians

W. Oscar Fleming, Public Health Leadership

Jill Fromewick, Public Health Leadership, Rural Health

Jared Gallaher, Public Health Leadership

Erica Gregory, Population Health for Clinicians

Jennifer Griffin, Epidemiology, Global Health, Online Education

Mamie Sackey Harris, Public Health Leadership, Global

Lisa Macon Harrison, Public Health Leadership

Sheila Higgins, Public Health Nursing

Elizabeth High, Public Health Leadership

Fabrice Julien, Place-Based Health

Leila C. Kahwati, Public Health Leadership

Katherine Kirkland, Public Health Nursing

Manish Kumar, Public Health Leadership, Professional Development

Brettania Lopes, Public Health Leadership

Rebecca Maine, Public Health Leadership

Karen Mastroianni, Public Health Nursing

Paul Meade, Public Health Leadership

Vanessa Miller, Public Health Leadership

Charles Mike Newton-Ward, Public Health Marketing, Online Education

Christine Pettitt-Schieber, Public Health Leadership

Sean Philpott-Jones, Global Health

Trista Reid, Public Health Leadership

Ghazaleh Samandari, Public Health Leadership, Global Online

Jennifer Sanchez-Flack, Place-Based Health

Tanvi Shah, Public Health Leadership

Michael Steiner, Population Health for Clinicians

Amy Befflower Thomas, Public Health Leadership

Gretchen Van Vliet, Public Health Leadership, Global Health

Meera Viswanathan, Public Health Leadership

Donna Warner, Public Health Leadership

Rachel A. Wilford, Public Health Leadership

Louise Winstanly, Public Health Leadership, Ethics, Global Health

Jacqueline Wynn, Public Health Leadership

Susan Zelt, Public Health Leadership, Practicum Placement, Research Design and Management

**Adjunct Instructors**

Carol Breland, Public Health Leadership, Online Education
The Public Health Leadership Program uses the PUBH abbreviation for course listings. PUBH courses are open to any student unless the individual course indicates permission of instructor is required. Visit the Web site (http://www.sph.unc.edu/phlp/) for additional information.

Advanced Undergraduate and Graduate-level Courses

PUBH 420. The HIV/AIDS Course. 1 Credit.
This course offers participants a multidisciplinary perspective on HIV/AIDS – its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Pass/Fail.

PUBH 610. Introductory Spanish for Health Professionals. 3 Credits.
This course is intended for students who know no Spanish or so little that they feel the need to start over. Students with more than two semesters of college Spanish are not eligible. The course covers the curriculum of first-semester Spanish taught within a health context, with a focus on speaking.
Grading status: Letter grade.

PUBH 613. Intermediate Spanish for Health Care I. 3 Credits.
This intermediate course is the equivalent of the third semester of college Spanish. Students will hone their listening and speaking skills in class primarily through role-playing activities and class discussion. Activities center on an original film set in a health clinic in North Carolina.
Grading status: Letter grade
Same as: AHSC 613I, NURS 613I, SOWO 613I.

PUBH 614I. Intermediate Spanish for Health Care II. 3 Credits.
Permission of the instructor. This primarily e-learning course provides public health students with the opportunity to improve their oral communication skills in Spanish at the intermediate level via DVD, Web, and workbook. Instructor-led. Online course.
Requisites: Prerequisite, PUBH 613.
Grading status: Pass/Fail
Same as: AHSC 614I, NURS 614I, SOWO 614I.

PUBH 615. Advanced Spanish for Health Care I. 3 Credits.
Required preparation, third semester Spanish or equivalent. This advanced course reviews the grammar of the third and fourth semester of college Spanish. Students hone their listening and speaking skills through role-playing activities and class discussion. Activities center on an original film set in a Latino-run health clinic.
Grading status: Letter grade
Same as: AHSC 615I, NURS 615I, SOWO 615I.

PUBH 616I. Health Care Informatics. 2 Credits.
Course designed to provide a multimodal learning experience that prepares health sciences students to learn to become proficient at selecting/using technology for organizing, analyzing, and managing information in health care settings.
Grading status: Letter grade.

PUBH 690. Special Topics in Public Health Leadership. 1-3 Credits.
Permission of the instructor. Sections will focus on specific topics of current interest to health workers. Fliers describing the section offering will be distributed prior to registration each semester. Lecture hours per week dependent upon credit.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

PUBH 696. Independent Study. 1-3 Credits.
Independent Study to address goals and objects of student. Prior faculty agreement is required. Registration for an independent study course must be completed after the learning contract has been approved and no later than the last day of "late registration" (the end of the first week of classes in F/S).
Grading status: Letter grade.

Graduate-level Courses

PUBH 701. Cost-Effectiveness in Health and Medicine. 2 Credits.
Overview of economic evaluations of public health and health care interventions, understanding basic methods of cost-effectiveness analyses (CEA) and use of CEA to inform resource allocation decisions. Critically appraise CEA for internal validity and applicability. Explore controversial CEA issues, including methodology controversies and ethical issues for the prioritization of resources.
Grading status: Letter grade.

PUBH 702. Systematic Review. 1 Credit.
Course gives students background in assessing and conducting systematic reviews. Focuses on 1) reading, discussing, and critiquing systematic reviews on various topics; 2) reading background and methods articles on systematic reviews; 3) developing a focused question for systematic review; and 4) working on the systematic review over the semester.
Grading status: Letter grade.

PUBH 704. Foundations of Global Health. 2-3 Credits.
Students will gain a broader understanding of population-based global health issues. Critically examines global health topics with learning from on-line modules and learning assignments and interactive seminars with student presentations.
Grading status: Letter grade.

PUBH 705. One Health: Philosophy to Practical Integration. 1-3 Credits.
This course explores the intersection of human, animal, and environmental health and facilitates the understanding of health as an inexorably linked system requiring multidisciplinary collaborative efforts. The One Health concept demonstrates the importance of a holistic approach to disease prevention and the maintenance of human, animal, and environmental health.
Grading status: Letter grade
Same as: ENVR 705.

PUBH 706. Advanced Health Policy for Clinicians. 3 Credits.
An introduction to the fundamental organization, behavior, financing, and challenges of the health system of the United States. The course treats the entire edifice of American health care as "the American health system," and intends to examine it in toto, including by comparing it to other national health systems, and in part, by examining critical components of the system. Students must be enrolled in the Population Health for Clinicians Concentration or permission of the instructor.
Grading status: Letter grade.
PUBH 710. Introduction to Global Health Ethics. 1 Credit.
This course is designed to give students the skills to identify and effectively address ethical issues that arise in global health research and practice.
Grading status: Letter grade.

PUBH 711. Critical Issues in Global Health. 3 Credits.
Explores contemporary issues/controversies in global health through an interdisciplinary perspective; examines complexity of social, economic, political, and environmental factors affecting global health; analyzes global health disparities through a social justice lens; and exposes students to opportunities in global health work and research.
Grading status: Letter grade.

PUBH 712. Global Health Ethics. 3 Credits.
This course will introduce students to the theoretical and practical aspects of public health ethics. Develop student's analytical skills to evaluate ethical issues related to public health policy, prevention, treatment, and research. Topics include: ethical reasoning; concepts of justice; principles of interacting with communities; professional conduct and research. Online course.
Grading status: Letter grade.

PUBH 714. Introduction to Monitoring and Evaluation of Global Health Programs. 3 Credits.
Fundamental concepts/tools for monitoring/evaluating public health programs including HIV/AIDS/STDs, maternal/child health, environment, and nutrition. Concepts and practices in M&E will be covered: logic models, theory of change, indicators, data collection methods, process evaluation, research design, and mixed methods. Small group work to create M&E plan for global health case-study. Online course.
Grading status: Letter grade.

PUBH 716. Applied Quality Improvement Methods for Healthcare and Public Health. 3 Credits.
The course objective is to develop, implement, and test a solution to improve health care or public health delivery, using a model called the Model for Improvement (or MFI). The model uses three questions to scope the improvement project and four steps, Plan-Do-Check-Act, to implement and test solutions.
Grading status: Letter grade
Same as: MHCH 816, HPM 716.

PUBH 718. Designing Public Health Systems. 3 Credits.
Using powerful tools from engineering and management, this course equips students to conceptualize, design, and analyze public health and healthcare delivery systems for successful implementation.
Grading status: Letter grade.

PUBH 719. Introduction to Implementation Research and Practice in Public Health. 3 Credits.
This course introduces the concepts, frameworks, and methods of implementation research and practice. By the end of this course, students will be able to explain the rationale for this field, identify guiding frameworks, assess multilevel barriers and facilitators, and address barriers and facilitators with implementation strategies tailored to specific contexts.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 9 total credits. 99 total completions.
Grading status: Letter grade
Same as: HPM 719.

PUBH 720. The HIV/AIDS Course. 1 Credit.
This course offers participants a multidisciplinary perspective on HIV/AIDS – its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Letter grade.

PUBH 725. The HIV/AIDS Course Online. 1 Credit.
This online course offers a multidisciplinary perspective on HIV/AIDS – its etiology, immunology, epidemiology, and impact on individuals and society. How HIV/AIDS is framed by a society determines not only how affected persons are treated but also the degree to which the rights of the individual are upheld.
Grading status: Letter grade.

PUBH 729. Migration and Health. 3 Credits.
This course explores the linkage between migration and health by taking into account existing models and frameworks that assess the dynamics of an increasingly mobile society. The course evaluates trends in health outcomes among migrants, social determinants of health that affect new migrants and migrant health across the life course. Other elements: labor migration and occupational health; place-based health; access to health coverage; health service provision to migrants.
Grading status: Letter grade.

PUBH 730. Leading Quality Improvement in Public Health. 3 Credits.
Overview of quality improvement (QI) and its important relationship to leadership. Focus on practical skills with sufficient theory to understand the origins of the philosophy and processes encompassed by QI. For working practitioners with current or future management/leadership responsibilities within their organizations.
Grading status: Letter grade.

PUBH 731. Public Health Social Marketing. 3 Credits.
Course will orient students to market-based strategies, models, and tactics for improving individual and community health status within the framework of marketing, strategic communication, and advocacy. Online course.
Grading status: Letter grade.

PUBH 734. Place-based Theory in Public Health. 2 Credits.
Concepts of place-based PH including community beliefs, behaviors, system structures, culture, art, geography and how they provide assets/ barriers for the community's health will be addressed. The impact of rurality, person, race, poverty, gender, ethnicity, culture, behavior and society on health outcomes, will be examined and the concept of place-based from public health, sociology, anthropology and economic perspectives. Students will explore/integrate concepts with visits to and experiences with people and health institutions in Western NC.
Grading status: Letter grade.

PUBH 736. Individual Transformation Applied to Public Health and Place. 2 Credits.
Students work through the place-based principle of understanding oneself, one's values and place in and relationship to identity and values of the community. Students assess personality, leadership style and its application to improve public health. Students will examine social location, implicit bias, their effects on public health and one's personal health. Students will assimilate personality preference, personal strengths and weaknesses, group inclusion, change leadership style into understanding how to engage effectively in groups and communities.
Grading status: Letter grade.
PUBH 737. Place-based Research & Evaluation Methods. 2 Credits.
A research workshop teaching foundational tools and uses of research methods and how to appropriately apply them to improve the community health and place.
Grading status: Letter grade.

PUBH 738. Place-based Community Transformation. 3 Credits.
Community engagement and CBPRRA principles will be applied to the health promotion program planning process, from situation analysis/needs assessment to program evaluation, including Results-Based Accountability (RBA). This course will show students how to follow principles of collaboration to build interdisciplinary teams using the Communities of Solution model, discuss the ethics of community engagement and the role of policy in place-based approaches to public health. Students will work on a community-collaborative project to apply course concepts.
Requisites: Prerequisites, SPHG 711, 712 and 713.
Grading status: Letter grade.

PUBH 739. Place-Based Systems Transformation. 3 Credits.
This course will discuss and review health transformation as it relates to complex and rapidly changing health care systems (noting areas of disparity), food access, environmental systems and structural policy, intercultural interactions, structural bias, and historical context in WNC. We will evaluate WNC health systems and how health transformation is changing these health care systems and the place of public health to help improve the process.
Grading status: Letter grade.

PUBH 740. Implementation of Place-based Theory and Design in Public Health. 3 Credits.
Students will apply place-based theory to design community-based intervention and engage with local community partners to develop multi-sectoral strategies and employ qualitative techniques to understand community concerns regarding the public health issue. Students will determine key stakeholders, bring them together and create a community of solution to address the public health issue, while discussing financial development and sustainability for the proposed community interventions.
Grading status: Letter grade.

PUBH 741. Quantitative Methods for Health Care Professionals I. 4 Credits.
Course is designed to meet the needs of health care professionals to appraise the design and analysis of medical and health care studies and who intend to pursue academic research careers. Covers basics of statistical inference, analysis of variance, multiple regression, categorical data analysis. Permission of instructor.
Grading status: Letter grade.

PUBH 742. Quantitative Methods for Health Care Professionals II. 4 Credits.
Continuation of PUBH 741. Main emphasis is on logistic regression; other topics include exploratory data analysis and survival analysis.
Requisites: Prerequisite, PUBH 741; Permission of the instructor for students lacking the prerequisite.
Grading status: Letter grade.

PUBH 743. Climate Change and Human Health. 3 Credits.
This course will produce foundational knowledge for public health professionals to understand and help mitigate the global and regional human health impacts of climate change. This course leverages the expertise of experts in Asheville at the National Centers for Environmental Information and the Climate Program Office within the National Oceanic and Atmospheric Administration (NOAA).
Requisites: Prerequisites, SPHG 711, 712, and 713.
Grading status: Letter grade.

PUBH 745. Leadership Across the Program Development Continuum. 3 Credits.
Introduces concepts and methods for leading community health improvement efforts; implementing public health programs; evaluating their process and effectiveness. Grounded in public health practice, students will complete the course with the skills necessary to lead the design of a community health assessment and improvement process, and conceptualize and develop a program and evaluation plan. Working in interdisciplinary teams, students discuss and practice skills for building effective teams and accomplishing individual and group objectives through teamwork.
Grading status: Letter grade.

PUBH 746. Applied Public Health Leadership in Program Planning and Evaluation. 3 Credits.
SPH majors or permission of the instructor. Fundamentals of public health program planning and monitoring, with emphasis on applications in community settings and proposal development for program funding.
Grading status: Letter grade
Same as: PHNU 746.

PUBH 747. Project Management Principles and Practices. 3 Credits.
Graduate students only. Provides an overview of knowledge and skills required for effective project/team leadership and management. Includes modules on leadership, management techniques, application of continuous quality improvement, and organizational designs that complement team-based organizations. Online course.
Grading status: Letter grade.

PUBH 748. Leadership in Health Policy for Social Justice. 3 Credits.
This course will provide students with the knowledge and skills to develop policies that address public health challenges, with an emphasis on improving health equity, promoting social justice, and creating systems in which the human right to health is given full effect.
Grading status: Letter grade.

PUBH 749. MPH Year & Career. 1 Credit.
Designed for students in the Population Health for Clinicians concentration in the MPH program who are actively working on their practicum/master's paper. Ten required evening sessions are scheduled in the fall and ten required evening sessions are scheduled in the spring.
Repeat rules: May be repeated for credit. 2 total credits. 2 total completions.
Grading status: Letter grade.

PUBH 750. Strategies of Prevention for Clinicians. 3 Credits.
Designed for those interested in the clinical arena. Establishes a framework for examining prevention activities for clinicians, and then considers a number of important health problems and the evidence for applying prevention strategies to these health problems. Encourages active student participation and involves a multidisciplinary faculty. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.
PUBH 751. Critical Appraisal of Health Literature I. 2 Credits.
Emphasizes the process of critical appraisal of existing medical research literature, with examples from a variety of subject areas. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.

PUBH 752. Critical Appraisal of Health Literature II. 1 Credit.
Emphasizes the process of critical appraisal of existing medical research literature, with examples from a variety of subject areas. Student presentations of structured critical appraisals constitute about 50 percent of sessions. Students must be enrolled in the Population Health for Clinicians Concentration or have permission of the instructor to enroll.
Grading status: Letter grade.

PUBH 754. Research Frameworks and Methods for Assessing and Improving Population Health. 3 Credits.
This course is designed to provide students with the fundamental research and analytic methods needed by public health leaders to assess the effectiveness, efficiency, and equity of healthcare in order to improve population health. The focus will be on research skills needed by practitioners with the objective of improving health outcomes.
Grading status: Letter grade.

PUBH 755. Translating Evidence into Practice for Population Health. 2 Credits.
The course provides an engaging, intellectual environment for students to discuss conceptual frameworks, study designs, and population outcome measures for closing the gap between evidence and daily practice across important population subgroups and in diverse clinical settings. Students complete a series of assignments, including a final paper and presentation.
Grading status: Letter grade.

PUBH 760. Clinical Measurement and Evaluation. 3 Credits.
Focuses on work, workplace exposures and hazards, and their effect on health. Interdisciplinary approaches to risk identification, reduction, and communication will be emphasized within regulatory and ethical contexts.
Grading status: Letter grade
Same as: EPID 711.

PUBH 763. The Politics of Health Reform, Quality, Outcomes, and Effectiveness. 3 Credits.
Systematic analysis of recent reforms to the U.S. health care system, including passage and initial implementation of the Affordable Care Act, with particular attention to how reform is intended to improve access, quality, equity, and effectiveness and whether reform can accomplish this while controlling cost.
Grading status: Letter grade

PUBH 764. Interdisciplinary Seminar in Refugee Health and Wellness. 1-3 Credits.
Academic year-long seminar for health profession students to engage in inter-professional teams, providing health care access and mental health assessment, case management, and health promotion to refugees resettled in the Triangle. Graduate course open to undergraduates. MUST enroll in both fall and spring semesters.
Repeat rules: May be repeated for credit. 3 total credits. 3 total completions.
Grading status: Letter grade.

PUBH 767. Team Leadership in Research Navigation. 3 Credits.
Team leadership and management practices with an emphasis on successful team leadership in clinical research. Team effectiveness strategies provide framework for development of successful leadership of teams undertaking clinical research.
Grading status: Letter grade.

PUBH 781. Community Engagement and Leadership in Health. 3 Credits.
Students will gain a basic understanding of how to be leaders in applying principles of community engagement in public health programs and organizational settings by engaging different stakeholder sectors, promoting multi-level cohesion among different audiences, communicating strategies, and collaboratively designing community engagement and implementation plans.
Grading status: Letter grade.

PUBH 782. The Public Health Impact of Criminalizing the Marginalized. 2 Credits.
This course will define criminalization and describe how this phenomenon disproportionately impacts the health of marginalized populations. Students will analyze the social construction of illicit behavior and subsequent criminal involvement and use the principles of life course theory and social ecological framework to explore associations between what is criminalized and health outcomes. The course will also describe the impact of criminalization on emerging health policy and introduce public health tools needed to address these challenges.
Requisites: Pre- or corequisite, SPHG 711, SPHG 712, and SPHG 713; permission from instructor for students lacking the prerequisite.
Grading status: Letter grade.

PUBH 783. Mass Incarceration & Public Health. 2 Credits.
This course examines the public health implications of mass incarceration in the US. Using a public health prevention framework, students will investigate the intersection of the criminal justice system with health outcomes. Students will identify alternative strategies grounded in public health, social justice and human rights principles to create healthier communities.
Requisites: Prerequisite, SPHG 711, 712, 713 preferred but not required; contact instructor for permission if SPHG 711, 712, 713 have not been undertaken.
Grading status: Letter grade.

PUBH 784. Project Management Strategy and Application. 3 Credits.
This course presents classic project management concepts and methods, applicable to research, public health, healthcare, information science and other team projects, with an aim to develop a toolbox of strategies to effectively manage projects using globally accepted theoretical frameworks; practice is gained via assignments, cases, lectures, and course project.
Grading status: Letter grade.

PUBH 790. Fundamentals of Public Health Leadership. 3 Credits.
This course is designed to gain a deeper insight into their own and others’ leadership styles, behaviors, and emotional intelligence. Students will engage in a day-long active-learning workshop every other week and access videos, readings and assignments online. Students will engage with the instructor and peers in person via reflection journals, large and small group activities, leadership assessments. Students will produce a leadership development plan and generate a set of professional goals.
Grading status: Letter grade.
PUBH 791. Core Principles in Public Health Leadership. 3 Credits.
Course will introduce students to leadership theories and research, provide a context for leadership in public health, and help students learn core leadership skills.
Grading status: Letter grade.

PUBH 805. Public Health in the Global Context: Service Learning with Vulnerable U.S. Populations. 1 Credit.
A spring break interdisciplinary service-learning trip to rural Tyrrell County, NC to learn about the social determinants of health and to promote health and reduce risks. Health professional students from nursing, physical therapy, public health, and social work form interdisciplinary teams to provide population-centered services to residents of this county.
Grading status: Letter grade.

PUBH 810. Population Health: Interprofessional Management in a Changing Healthcare System. 3 Credits.
Admission to SPH graduate program required for course enrollment. Course experience will involve medicine, nursing, pharmacy, and social work students engaging together to learn skills and knowledge to apply population health principles. Key themes include inter-professional collaboration and teamwork, identification and stratification of populations-at-risk, and discussion of evidence-based care planning/coordination.
Grading status: Letter grade.

PUBH 811. Population Health in Health Care: Field Experience. 3 Credits.
This inter-professional field-based course offers opportunities to engage with students from medicine, nursing, pharmacy, and social work to learn skills and knowledge to apply population health principles in a primary healthcare setting. Students will work on team-based projects in primary care settings.
Requisites: Prerequisite, PUBH 810; permission of instructor for students lacking the prerequisite.
Grading status: Letter grade.

PUBH 886. Field Practicum in Public Health. 1-6 Credits.
The practicum or field experience is intended to provide the student an opportunity to integrate course work in a new or different type of health-related setting. This experience will be completed after most regular course work. The practicum cannot be only an observational experience.
Grading status: Letter grade.

PUBH 890. Special Topics in Public Health Leadership. 1-3 Credits.
Permission of the instructor. A major paper on a problem relevant to public health practice. This study may extend over more than one semester. Credit is assigned accordingly.
Repeat rules: May be repeated for credit.

Master of Public Health (M.P.H.) Leadership in Practice Concentration
Designed to teach professionals how to apply leadership principles in a public health context, the Leadership in Practice concentration (https://sph.unc.edu/resource-pages/master-of-public-health-2/leadership-in-practice-concentration/) offers the knowledge and skills needed to lead teams, projects, organizations and systems in eliminating inequities and improving conditions in local and global communities. As a graduate with expertise in design thinking, evidence-based decision-making and mobilization for large-scale change, you’ll help empower populations to live their best lives — no matter their location.

Competencies
Students will develop the following Leadership in Practice competencies, building on the foundational public health knowledge they attain in the Gillings M.P.H. Integrated Core courses.

LIP01. Prioritize public health values and ethics in a philosophy of leadership relevant to adaptive public health challenges.

LIP02. Demonstrate effective communication skills to promote a compelling public health agenda.

LIP03. Facilitate inclusive engagement and collaborative decision-making across professions and with diverse stakeholders to lead in public health practice.

LIP04. Design transformational systems and innovative approaches to ensure effective public health practice.
LIP05. Integrate research and practice-based evidence to continuously improve the quality of public health practice.

LIP06. Develop structures of accountability to promote good governance and stewardship of resources to improve population health.

**Master of Public Health (M.P.H.) Population Health for Clinicians Concentration**

Critical health challenges facing communities around the world cannot be solved in clinical settings alone. The Population Health for Clinicians concentration ([https://sph.unc.edu/resource-pages/master-of-public-health-2/population-health-for-clinicians-concentration/](https://sph.unc.edu/resource-pages/master-of-public-health-2/population-health-for-clinicians-concentration/)) empowers graduates to provide excellent care to individuals and also improve systems of care for the benefit of all. Building on a decades-long collaboration between the UNC Schools of Medicine and Public Health, this program is widely regarded as one of the best opportunities for clinicians to gain mastery in public health and population science.

the residential M.P.H. is a two-step process. Please apply separately to (1) SOPHAS and (2) UNC–Chapel Hill (via the Graduate School application). Visit https://gradschool.sites.unc.edu/master-of-public-health/ for more details. If you are interested in the online M.P.H., please visit the MPH@UNC (https://onlinemph.unc.edu/) website and fill out an inquiry form.

Degree Milestones

Practicum

A practicum is a planned, mentored, and evaluated work experience (paid or unpaid) that enables students to integrate and apply their Gillings M.P.H. training in a professional public health setting.

To satisfy degree requirements, a Gillings M.P.H. practicum must:

- Be public health practice, research, and/or policy focused.
- Be mentored by a supervisor (preceptor) with an advanced degree in public health or related field or equivalent experience with expertise in the practicum project area.
- Take place in a location approved for student travel (UNC Travel Policy (https://global.unc.edu/travel-global-operations/travel-policies/), and the student must complete UNC Gillings International Pre-Departure Travel Requirements (https://sph.unc.edu/global-health/global-travel-toolkit-2/) prior to travel if applicable.
- Comprise a minimum of 200 hours (equivalent to five weeks of full-time work).

Gillings M.P.H. students must complete SPHG 701, SPHG 711, SPHG 712, SPHG 713, SPHG 721, and SPHG 722 and have their learning agreement approved by their practicum lead prior to beginning their practicum. For more information, please visit our M.P.H. Practicum (https://sph.unc.edu/resource-pages/master-of-public-health/mph-practicum/) web page.

Comprehensive Exam

A milestone degree requirement for all graduate students at UNC–Chapel Hill, including M.P.H. students at the Gillings School of Public Health, is the comprehensive exam. The comprehensive exam will cover the public health foundational knowledge and competencies covered in the M.P.H. Core courses: SPHG 701, 711, 712, 713, 721, 722. Students will have an opportunity to demonstrate synthesis and higher order learning of the 22 core competencies achieved in the M.P.H. Core courses during the exam. The exam will be administered and graded by Gillings faculty and clear instructions on how to prepare for and complete the comprehensive exam will be provided. For residential students, the comprehensive exam will typically be offered in the fall of the student’s second year in the M.P.H. program. Students in the MPH@UNC program or those who may be moving through the program at a different pace may take the exam in the spring administration. Students must take the comprehensive exam at the next administration after they have successfully completed the M.P.H. core courses. Should students not successfully pass the comprehensive exam a remediation plan will be developed. Students cannot retake the comprehensive exam for 90 days after the initial

### Competencies

Students will develop the following Place-Based Health competencies, building on the foundational public health knowledge they attain in the Gillings M.P.H. Integrated Core courses.

**PBH01.** Analyze the concept of place in the context of key public health issues locally in Western NC and adapt these concepts to communities in state, regional, national, and global settings.

**PBH02.** Integrate place-based sociological, anthropological, educational, economic, environmental, and other theoretical perspectives with public health practice.

**PBH03.** Expand personal leadership skills to engage and motivate individuals, teams, and communities for health.

**PBH04.** Design applied research studies to investigate a question of public health importance.

**PBH05.** Apply the principles of community change models to support and promote healthy and safe physical and social environments and advocate for health equity.

**PBH06.** Apply the principle of systems and design thinking in the framework of local health systems to promote health and social equity.

### Admissions

Please visit Applying to the Gillings School (https://sph.unc.edu/students/how-to-apply/) first for details and information. Application to the residential M.P.H. is a two-step process. Please apply separately to (1) SOPHAS and (2) UNC–Chapel Hill (via the Graduate School application). Visit https://gradschool.sites.unc.edu/master-of-public-health/ for more details. If you are interested in the online M.P.H., please visit the MPH@UNC (https://onlinemph.unc.edu/) website and fill out an inquiry form.

A practicum is a planned, mentored, and evaluated work experience (paid or unpaid) that enables students to integrate and apply their Gillings M.P.H. training in a professional public health setting.

To satisfy degree requirements, a Gillings M.P.H. practicum must:

- Be public health practice, research, and/or policy focused.
- Be mentored by a supervisor (preceptor) with an advanced degree in public health or related field or equivalent experience with expertise in the practicum project area.
- Take place in a location approved for student travel (UNC Travel Policy (https://global.unc.edu/travel-global-operations/travel-policies/), and the student must complete UNC Gillings International Pre-Departure Travel Requirements (https://sph.unc.edu/global-health/global-travel-toolkit-2/) prior to travel if applicable.

### Comprehensive Exam

A milestone degree requirement for all graduate students at UNC–Chapel Hill, including M.P.H. students at the Gillings School of Public Health, is the comprehensive exam. The comprehensive exam will cover the public health foundational knowledge and competencies covered in the M.P.H. Core courses: SPHG 701, 711, 712, 713, 721, 722. Students will have an opportunity to demonstrate synthesis and higher order learning of the 22 core competencies achieved in the M.P.H. Core courses during the exam. The exam will be administered and graded by Gillings faculty and clear instructions on how to prepare for and complete the comprehensive exam will be provided. For residential students, the comprehensive exam will typically be offered in the fall of the student’s second year in the M.P.H. program. Students in the MPH@UNC program or those who may be moving through the program at a different pace may take the exam in the spring administration. Students must take the comprehensive exam at the next administration after they have successfully completed the M.P.H. core courses. Should students not successfully pass the comprehensive exam a remediation plan will be developed. Students cannot retake the comprehensive exam for 90 days after the initial
exam and must be registered in at least one credit while taking the comprehensive exam.

**Culminating Experience**

Each student completes a 3-credit culminating experience and produces a high-quality written product that is completed at end of the program of study. The high-quality written product demonstrates a synthesis of two foundational and two concentration-specific competencies appropriate to the student's educational and professional goals. This culminating experience ideally is delivered in a manner that is useful to external stakeholders, such as nonprofit or governmental organizations, and could take the form of a course-based capstone project or master's paper but will be tailored to the concentration a student chooses.

**Academic Advising and Faculty Mentoring**

We are committed to providing quality academic advising and mentoring for all students. We ensure that M.P.H. students get the guidance they need with several components: 1) an orientation program that provides an overview of the types and sources of M.P.H. advising; 2) cohort advising sessions to disseminate information that is relevant to course planning and registration; 3) faculty mentoring that provides students with tailored support for their academic, professional, personal development, and practicum support.

M.P.H. students will complete a 15-credit-hour Integrated Core taught by an interdisciplinary team of instructors. The 6-credit first semester focuses on understanding public health issues, and the second semester, 8-credit focuses on creating solutions to those issues. Lastly, students will complete a 1-credit Practicum Assignments and Interprofessional Practice Activities course in the second year.

All M.P.H. students complete COMPASS (Core Online Modules to Promote and Accelerate Student Success). These brief, self-paced online modules are open for students prior to their first academic year. Students can complete any and all parts of COMPASS up to and including the first week of class.

**Electives**

Students in the M.P.H. program are required to take 9 credits. Students are expected to use their electives in a thoughtful way to strengthen their public health knowledge/skills and are encouraged to consult with their academic coordinator early prior to the registration period for this purpose. In addition to those courses offered in the Gillings School there are many appropriate electives elsewhere in the University.

For information on policies and procedures, please visit the Gillings School Student Handbook (https://sph.unc.edu/students/gillings-school-student-handbook/) website.
