The School of Social Work offers programs leading to the M.S.W. and the Ph.D. degrees.

Admission into the M.S.W. program is based on an evaluation of the applicant’s transcripts, references, written statement of interest in the field, prior experience, and readiness to undertake graduate professional education. To be considered for admission, the applicant must have a bachelor’s degree from an accredited college or university, preferably with a broad liberal arts preparation in social and biological sciences and the humanities.

In the admissions process for the Ph.D. program, students are asked to provide evidence of

- A master’s degree in social work from a school accredited by the Council on Social Work Education or, less preferably, in a related discipline
- Academic ability, as demonstrated in academic achievement and Graduate Record Examination (GRE) scores
- Writing ability, as demonstrated in a writing sample
- Commitment to the values, goals, and purposes of the social work profession
- Professional experience in human services, and
- A direction for and commitment to scholarly work congruent with the objectives and resources of the doctoral program.

The M.S.W. Program

Students complete the M.S.W. generalist curriculum of 29 credit hours that covers content related to human behavior and the social environment, institutionalized discrimination, social work practice, social policy, and research. In the evidence-informed practice specialization curriculum, students choose among two concentrations for an additional 33 academic credit hours: the community, management and policy practice concentration (CMPP), and the direct practice concentration (DP). The CMPP concentration prepare students for advanced social work practice related to administration, management, and community and policy practice. The DP concentration prepares students for advanced social work practice with individuals, families, and groups.

In both the M.S.W. generalist and specialization curriculum, students also enroll in field education in addition to their classroom-based coursework. In field education, M.S.W. students are placed in more than 250 government, nonprofit, and other human services agencies each semester of their studies. Through these field placements, students receive hands-on experience working in a wide array of practice areas such as anti-poverty programs, child welfare, community and program development, family violence, healthcare, behavioral health, among others.

Students develop coherent and cohesive plans of study to meet their M.S.W. degree requirements in consultation with faculty advisors. They select courses to meet their individual professional and educational goals, while also meeting the academic requirements of their concentration. In addition, students can explore content outside of their concentration and use elective credits to pursue learning goals related to diverse areas of interest.

The typical time for degree completion is four semesters of full-time study. However, graduates of undergraduate social work programs that are accredited by the Council on Social Work Education who meet specific course and admissions requirements are eligible to apply for the advanced standing program. In the advanced standing program, students fulfill the degree requirements in 12 months beginning in May of each year. In January 2021, the School of Social Work admitted an inaugural cohort of students to a new extended 20-month advanced standing program that begins each spring semester, pending class size.

Additionally, students can earn a M.S.W. degree via a three-year program offered at UNC-Chapel Hill. In the first year, students take two courses each semester. In the second year of this program, students take two courses each semester, participate in a field seminar, and complete 16 hours per week. Their final year, students in this program complete the specialization curriculum.

The School of Social Work also offers one off-campus program that is located in Winston-Salem. Students in this program complete M.S.W. degree requirements over the course of three years. The first two years of M.S.W. study take place at the off-campus program site. In the first year, students take two courses each semester. In the second year of this program, students take two courses each semester, participate in a field seminar, and complete 16 hours per week in a field placement each semester. In the final year, students complete the degree as full-time students on the UNC-Chapel Hill campus.

The Ph.D. Program

The Ph.D. program curriculum is grounded in core courses designed to understand, analyze, and intervene in social problems. Thorough training is offered in theory, research methodology, data analysis, and intervention development and testing. Students design their program of study to focus on a social problem of interest and are matched with faculty mentors to guide them in their work. Students publish, apply for grant funding, and complete a teaching practicum. They have rich opportunities for both independent teaching and research.

Following the faculty member’s name is a section number that students should use when registering for independent studies, reading, research, and thesis and dissertation courses with that particular professor.
