Introduction
The Department of Computer Science offers instruction and performs research in the essential areas of computer science. Majors receive rigorous training in the foundations of computer science and the relevant mathematics, then have ample opportunity to specialize in advanced courses.

Majors can receive credit for practical training as a computing professional through an internship with a company or organization in the computing or information technology fields. Internships typically are paid positions and involve the student working off campus. All internships for credit must be approved in advance by the director of undergraduate studies. Students interested in pursuing such an internship should contact the director of undergraduate studies prior to the start of the internship.

Majors who excel in the program also have the opportunity to perform undergraduate research in computer science. Research projects may be pursued in conjunction with an existing graduate research group in the department and/or may be used as a vehicle for graduating with honors as described below.

Students with no prior programming experience should consider taking one of the introductory courses, COMP 110 or COMP 116. COMP 101 is intended for students who wish to develop a better understanding of computers in a context that does not involve programming. Students with prior programming experience should begin their studies with COMP 210. COMP 380 and COMP 388 are philosophical and moral reasoning Approaches courses that have no programming prerequisite.

Advising
In addition to general advising through the Academic Advising Program, students can consult designated faculty members within the Department of Computer Science who act as departmental advisors for requirements specific to the major or minor. Beyond course selection, advisors are also available for discussing internships, study abroad in computer science, honors projects, and undergraduate research opportunities. See the department Web site (http://www.cs.unc.edu) (see Undergraduate Advising in Undergraduate Programs) for a list of current department advisors and walk-in advising times.

Majors

- Computer Science Major, B.A. (http://catalog.unc.edu/undergraduate/programs-study/computer-science-major-ba/)
- Computer Science Major, B.S. (http://catalog.unc.edu/undergraduate/programs-study/computer-science-major-bs/)

Minor

- Computer Science Minor (http://catalog.unc.edu/undergraduate/programs-study/computer-science-minor/)

Graduate Programs

- M.S. in Computer Science (http://catalog.unc.edu/graduate/schools-departments/computer-science/)
- Ph.D. in Computer Science (http://catalog.unc.edu/graduate/schools-departments/computer-science/)

Professors

Associate Professors

Assistant Professors
Mohit Bansal, Snigdha Chatrvedi, Bo Dai (beginning fall 2020), Parasara Sridhar Duggirala, Shahriar Nirjon, Junier Oliva, Colin Raffel (beginning fall 2020), Shashank Srivastava, Cynthia Sturton.

Research Professors
Ashok Krishnamurthy, Ming C. Lin, David Luebke, Dinesh Manocha, F. Donelson Smith, Russell Taylor II, Mary Whitton.

Research Associate Professors
Jay Aikat, Alexander C. Berg, Martin Styner.

Research Assistant Professor
Brent Munsell.

Adjunct Professors
J. Steven Marron, Diane Pozefsky, Julian Rosenman, Gregory F. Welch.

Adjunct Associate Professors
Stephen Aylward, Tamara Berg, Enrique Dunn, David Gotz.

Adjunct Assistant Professors
Ben Major, Ipek Oguz.

Adjunct Research Professor
Beatriz Paniagua, Turner Whitted.

Teaching Associate Professor
Tessa Joseph-Nicholas.
Teaching Assistant Professors
Kris Jordan, John Majikes.

Adjunct Teaching Assistant Professor
Jorge Silva.

Professors of the Practice
Michael Fern, Michael Reed, Jeff Terrell.

Professors Emeriti

COMP–Computer Science

Undergraduate-level Courses

COMP 50. First-Year Seminar: Everyday Computing. 3 Credits.
The goal of this first-year seminar is to understand the use of computing technology in our daily activities. In this course, we will study various examples of how computing solves problems in different aspects in our daily life. Honors version available
Gen Ed: QI.
Grading status: Letter grade.

COMP 50H. First-Year Seminar: Everyday Computing. 3 Credits.
The goal of this first-year seminar is to understand the use of computing technology in our daily activities. In this course, we will study various examples of how computing solves problems in different aspects in our daily life.
Gen Ed: QI.
Grading status: Letter grade.

COMP 60. First-Year Seminar: Robotics with LEGO®. 3 Credits.
This seminar explores the process of design and the nature of computers by designing, building, and programming LEGO robots. Competitions to evaluate various robots are generally held at the middle and at the end of the semester. Previous programming experience is not required. Honors version available
Gen Ed: QI.
Grading status: Letter grade.

COMP 60H. First-Year Seminar: Robotics with LEGO®. 3 Credits.
This seminar explores the process of design and the nature of computers by designing, building, and programming LEGO robots. Competitions to evaluate various robots are generally held at the middle and at the end of the semester. Previous programming experience is not required.
Gen Ed: QI.
Grading status: Letter grade.

COMP 65. First-Year Seminar: Folding, from Paper to Proteins. 3 Credits.
Explore the art of origami, the science of protein, and the mathematics of robotics through lectures, discussions, and projects involving artistic folding, mathematical puzzles, scientific exploration, and research. Honors version available
Gen Ed: PL.
Grading status: Letter grade.

COMP 65H. First-Year Seminar: Folding, from Paper to Proteins. 3 Credits.
Explore the art of origami, the science of protein, and the mathematics of robotics through lectures, discussions, and projects involving artistic folding, mathematical puzzles, scientific exploration, and research.
Gen Ed: PL.
Grading status: Letter grade.

COMP 80. First-Year Seminar: Enabling Technology--Computers Helping People. 3 Credits.
Service-learning course exploring issues around computers and people with disabilities. Students work with users and experts to develop ideas and content for new technologies. No previous computer experience required. Honors version available
Gen Ed: EE- Service Learning, US.
Grading status: Letter grade.

COMP 80H. First-Year Seminar: Enabling Technology--Computers Helping People. 3 Credits.
Service-learning course exploring issues around computers and people with disabilities. Students work with users and experts to develop ideas and content for new technologies. No previous computer experience required.
Gen Ed: EE- Service Learning, US.
Grading status: Letter grade.

COMP 85. First-Year Seminar: The Business of Games. 3 Credits.
This seminar will study the concepts associated with video gaming by having small teams design a game, build a prototype, and put together a business proposal for the game.
Grading status: Letter grade.

COMP 85H. First-Year Seminar: The Business of Games. 3 Credits.
This seminar will study the concepts associated with video gaming by having small teams design a game, build a prototype, and put together a business proposal for the game.
Grading status: Letter grade.

COMP 88. First-Year Seminar: Special Topics. 3 Credits.
Special topics course. Content will vary each semester.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 2 total completions.
Grading status: Letter grade.

COMP 88H. First-Year Seminar: Special Topics. 3 Credits.
Special topics course. Content will vary each semester.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 6 total credits. 2 total completions.
Grading status: Letter grade.

COMP 101. Fluency in Information Technology. 3 Credits.
The nature of computers, their capabilities, and limitations. How computers work, popular applications, problem-solving skills, algorithms and programming. Lectures and laboratory assignments. Students may not receive credit for this course after receiving credit for COMP 110 or higher.
Requisites: Prerequisite, MATH 110 with a grade of C or better or MATH 130.
Gen Ed: QR.
Grading status: Letter grade.
COMP 110. Introduction to Programming. 3 Credits.
An introduction to programming. Fundamental programming skills, typically using Java or JavaScript. Problem analysis and algorithm design. Students may not receive credit for both COMP 110 and COMP 116. Students may not receive credit for this course after receiving credit for COMP 116 or higher. Honors version available
Requisites: Prerequisite, COMP 101 or Pre- or corequisite, MATH 231.
Gen Ed: QR.
Grading status: Letter grade.

COMP 110H. Introduction to Programming. 3 Credits.
An introduction to programming. Fundamental programming skills, typically using Java or JavaScript. Problem analysis and algorithm design. Students may not receive credit for both COMP 110 and COMP 116. Students may not receive credit for this course after receiving credit for COMP 116 or higher.
Requisites: Prerequisite, COMP 101 or Pre- or corequisite, MATH 231.
Gen Ed: QR.
Grading status: Letter grade.

COMP 116. Introduction to Scientific Programming. 3 Credits.
An introduction to programming for computationally oriented scientists. Fundamental programming skills, typically using MATLAB or Python. Problem analysis and algorithm design with examples drawn from simple numerical and discrete problems. Students can receive credit for only one of COMP 110 and 116.
Requisites: Prerequisite, MATH 231 or 241; a grade of C or better is required.
Gen Ed: QR.
Grading status: Letter grade.

COMP 120. Practical Web Design and Development for Everyone. 3 Credits.
A ground-up introduction to current principles, standards, and best practice in website design, usability, accessibility, development, and management through project-based skills development in HTML5, CSS, and basic JavaScript. Intended for nonmajors.
Grading status: Letter grade.

COMP 180. Enabling Technologies. 3 Credits.
We will investigate ways computer technology can be used to mitigate the effects of disabilities and the sometimes surprising response of those we intended to help. Honors version available
Gen Ed: EE. Service Learning.
Grading status: Letter grade.

COMP 180H. Enabling Technologies. 3 Credits.
We will investigate ways computer technology can be used to mitigate the effects of disabilities and the sometimes surprising response of those we intended to help.
Gen Ed: EE. Service Learning.
Grading status: Letter grade.

COMP 185. Serious Games. 3 Credits.
Concepts of computer game development and their application beyond entertainment to fields such as education, health, and business. Course includes team development of a game. Excludes COMP majors. Honors version available
Gen Ed: EE. Field Work.
Grading status: Letter grade.

COMP 185H. Serious Games. 3 Credits.
Concepts of computer game development and their application beyond entertainment to fields such as education, health, and business. Course includes team development of a game. Excludes COMP majors.
Gen Ed: EE. Field Work.
Grading status: Letter grade.

COMP 190. Topics in Computing. 3 Credits.
Permission of the instructor. Special topics in computing targeted primarily for students with no computer science background. This course has variable content and may be taken multiple times for credit. As the content will vary with each offering, there are no set prerequisites, but permission of the instructor is required.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

COMP 210. Data Structures and Analysis. 3 Credits.
This course will teach you how to organize the data used in computer programs so that manipulation of that data can be done efficiently on large problems and large data instances. Rather than learning to use the data structures found in the libraries of programming languages, you will be learning how those libraries are constructed, and why the items that are included in them are there (and why some are excluded).
Requisites: Prerequisites, COMP 110 and MATH 231; Pre- or corequisite, COMP 283 or MATH 381.
Grading status: Letter grade.

COMP 211. Systems Fundamentals. 3 Credits.
This is the first course in the introductory systems sequence. Students enter the course having taken an introductory programming course in a high-level programming language (COMP 110) and a course in discrete structures. The overarching goal is to bridge the gap between a students’ knowledge of a high-level programming language (COMP 110) and computer organization (COMP 311).
Requisites: Prerequisites, COMP 210; COMP 283 or MATH 381; a grade of C or better is required in both prerequisite courses.
Grading status: Letter grade.

COMP 222. ACM Programming Competition Practice. 1 Credit.
Structured practice to develop and refine programming skills in preparation for the ACM programming competition.
Grading status: Letter grade.

COMP 227. Effective Peer Teaching in Computer Science. 3 Credits.
Fundamentals of computer science pedagogy and instructional practice with primary focus on training undergraduate learning assistants for computer science courses. Emphasis on awareness of social identity in learning, active learning in the computer science classroom, and effective mentorship. All students must be granted a computer science learning assistantship or obtain prior approval to substitute relevant practicum experience prior to enrollment.
Requisites: Prerequisite, COMP 401; a grade of C or better is required.
Gen Ed: EE. Field Work.
Grading status: Letter grade.

COMP 283. Discrete Structures. 3 Credits.
Introduces discrete structures (sets, tuples, relations, functions, graphs, trees) and the formal mathematics (logic, proof, induction) used to establish their properties and those of algorithms that work with them. Develops problem-solving skills through puzzles and applications central to computer science. Honors version available
Requisites: Prerequisite, MATH 231 or MATH 241; a grade of C or better is required.
Grading status: Letter grade.
COMP 283H. Discrete Structures. 3 Credits.
Introduces discrete structures (sets, tuples, relations, functions, graphs, trees) and the formal mathematics (logic, proof, induction) used to establish their properties and those of algorithms that work with them. Develops problem-solving skills through puzzles and applications central to computer science.
Requisites: Prerequisite, MATH 231 or MATH 241; a grade of C or better is required.
Grading status: Letter grade.

COMP 290. Special Topics in Computer Science. 1 Credit.
Non-technical topics in computer science for computer science majors. May not be used to satisfy any degree requirements for a computer science major. This course has variable content and may be taken multiple times for credit.
Repeat rules: May be repeated for credit. 4 total credits. 4 total completions.
Grading status: Letter grade.

COMP 293. Internship in Computer Science. 3 Credits.
Permission of instructor and director of undergraduate studies required. Computer science majors only. A signed learning contract is required before a student may register. Work experience in non-elementary computer science.
Requisites: Prerequisites, MATH 231 or 241; COMP 401, 410, and 411; a grade of C or better is required in COMP 401, 410, and 411.
Grading status: Pass/Fail.

COMP 301. Foundations of Programming. 3 Credits.
Students will learn how to reason about how their code is structured, identify whether a given structure is effective in a given context, and look at ways of organizing units of code that support larger programs. In a nutshell, the primary goal of the course is to equip students with tools and techniques that will help them not only in later courses in the major but also in their careers afterwards.
Requisites: Prerequisites, COMP 210; COMP 283 or MATH 381; a grade of C or better is required in both prerequisite courses.
Grading status: Letter grade.

COMP 311. Computer Organization. 3 Credits.
Introduction to computer organization and design. Students will be introduced to the conceptual design of a basic microprocessor, along with assembly programming. The course includes fundamental concepts such as binary numbers, binary arithmetic, and representing information as well as instructions. Students learn to program in assembly (i.e., machine) language. The course covers the fundamentals of computer hardware design, transistors and logic gates, progressing through basic combinational and sequential components, culminating in the conceptual design CPU.
Requisites: Prerequisite, COMP 211; a grade of C or better is required.
Grading status: Letter grade.

COMP 325. How to Build a Software Startup. 3 Credits.
Explores real-world skills for successfully developing and launching a software startup in an experiential learning environment. Customer outreach and feedback, market analysis, business model development, agile product development, with mentors from the entrepreneurship community.
Gen Ed: EE: Field Work.
Grading status: Letter grade.

COMP 380. Introduction to Digital Culture. 3 Credits.
An introduction to digital technology and computer science issues in society. Topics may include Internet history, privacy, security, usability, graphics, games, computers in the media, development, economics, social media, AI, IP, computer and Internet ethics, global ethics, current legal issues, etc. Honors version available
Gen Ed: PH.
Grading status: Letter grade.

COMP 380H. Introduction to Digital Culture. 3 Credits.
An introduction to digital technology and computer science issues in society. Topics may include Internet history, privacy, security, usability, graphics, games, computers in the media, development, economics, social media, AI, IP, computer and Internet ethics, global ethics, current legal issues, etc.
Gen Ed: PH.
Grading status: Letter grade.

COMP 390. Computer Science Elective Topics. 3 Credits.
Elective topics in computer science for computer science majors. May not be used to satisfy any degree requirements for a computer science major. This course has variable content and may be taken multiple times for credit.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

COMP 393. Software Engineering Practicum. 1-3 Credits.
Students develop a software program for a real client under the supervision of a faculty member. Projects may be proposed by the student but must have real users. Course is intended for students desiring practical experiences in software engineering but lacking the experience required for external opportunities. Majors only.
Requisites: Prerequisites, COMP 401, 410, 411; a grade of C or better is required in COMP 401, 410, and 411.
Gen Ed: EE: Field Work.
Repeat rules: May be repeated for credit. 6 total credits. 6 total completions.
Grading status: Letter grade.

Advanced Undergraduate and Graduate-level Courses

COMP 401. Foundation of Programming. 4 Credits.
Required preparation, a first formal course in computer programming (e.g., COMP 110, COMP 116). Advanced programming: object-oriented design, classes, interfaces, packages, inheritance, delegation, observers, MVC (model view controller), exceptions, assertions. Students may not receive credit for this course after receiving credit for COMP 301. Honors version available
Requisites: Prerequisite, MATH 231 or MATH 241; a grade of C or better is required.
Gen Ed: QR.
Grading status: Letter grade.
COMP 401H. Foundation of Programming. 4 Credits.
Required preparation, a first formal course in computer programming (e.g., COMP 110, COMP 116). Advanced programming: object-oriented design, classes, interfaces, packages, inheritance, delegation, observers, MVC (model view controller), exceptions, assertions. Students may not receive credit for this course after receiving credit for COMP 301.
Requisites: Prerequisite, MATH 231 or MATH 241; a grade of C or better is required.
Gen Ed: QR.
Grading status: Letter grade.

COMP 410. Data Structures. 3 Credits.
The analysis of data structures and their associated algorithms. Abstract data types; lists, stacks, queues, trees, and graphs. Sorting, searching, hashing. Students may not receive credit for this course after receiving credit for COMP 210.
Requisites: Prerequisites, MATH 231 or 241, and COMP 401; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 411. Computer Organization. 4 Credits.
Digital logic, circuit components. Data representation, computer architecture and implementation, assembly language programming. Students may not receive credit for this course after receiving credit for COMP 311.
Requisites: Prerequisite, MATH 231 or 241,and COMP 401; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 426. Modern Web Programming. 3 Credits.
Developing applications for the World Wide Web including both client-side and server-side programming. Emphasis on Model-View-Controller architecture, AJAX, RESTful Web services, and database interaction.
Requisites: Prerequisites, COMP 211 and 301; or COMP 401 and 410; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 431. Internet Services and Protocols. 3 Credits.
Application-level protocols HTTP, SMTP, FTP, transport protocols TCP and UDP and the network-level protocol IP. Internet architecture, naming, addressing, routing, and DNS. Sockets programming. Physical-layer technologies, Ethernet, ATM, and wireless.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 433. Mobile Computing Systems. 3 Credits.
Principles of mobile applications, mobile OS, mobile networks, and embedded sensor systems. Coursework includes programming assignments, reading from recent research literature, and a semester-long project on a mobile computing platform (e.g., Android, Arduino, iOS, etc.).
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 435. Computer Security Concepts. 3 Credits.
Introduction to topics in computer security including confidentiality, integrity, availability, authentication policies, basic cryptography and cryptographic protocols, ethics, and privacy. A student may not receive credit for this course after receiving credit for COMP 535.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 447. Quantum Computing. 3 Credits.
Recommended preparation, some knowledge of basic linear algebra. An introduction to quantum computing. Basic math and quantum mechanics necessary to understand the operation of quantum bits. Quantum gates, circuits, and algorithms, including Shor's algorithm for factoring and Grover's search algorithm. Entanglement and error correction. Quantum encryption, annealing, and simulation. Brief discussion of technologies.
Requisites: Prerequisites, MATH 232, and PHYS 116 or 118.
Grading status: Letter grade
Same as: PHYS 447.

COMP 455. Models of Languages and Computation. 3 Credits.
Introduction to the theory of computation. Finite automata, regular languages, pushdown automata, context-free languages, and Turing machines. Undecidable problems.
Requisites: Prerequisites, COMP 110, 166, or 401; and COMP 283 or MATH 381; a grade of C or better in both courses is required.
Grading status: Letter grade.

COMP 475. 2D Computer Graphics. 3 Credits.
Fundamentals of modern software 2D graphics: geometric primitives, scan conversion, clipping, transformations, compositing, texture mapping. Advanced topics may include gradients, antialiasing, filtering, parametric curves, and geometric stroking.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 486. Applications of Natural Language Processing. 3 Credits.
Students with graduate standing in SILS may take the course without the prerequisite. Explores current and future uses of natural language technologies. Topics vary and may include translation, generation, deception, health informatics, ethics and evaluation, and student-selected areas of interest.
Requisites: Prerequisite, COMP 110, 116, or 410.
Grading status: Letter grade
Same as: INLS 512.

COMP 487. Information Retrieval. 3 Credits.
Study of information retrieval and question answering techniques, including document classification, retrieval and evaluation techniques, handling of large data collections, and the use of feedback.
Grading status: Letter grade
Same as: INLS 509.

COMP 488. Data Science in the Business World. 3 Credits.
Students will acquire hands-on data science skills enabling them to solve real-world business problems. Since data science is an interdisciplinary field, business and computer science students learn and work together in this course. Leveraging each other's skills and knowledge, students create data-driven business insights using modern analytics.
Grading status: Letter grade
Same as: BUSI 488.

COMP 495. Mentored Research in Computer Science. 3 Credits.
Independent research conducted under the direct mentorship of a computer science faculty member. This course cannot be counted toward the completion of the major or minor. For computer science majors only. Permission of instructor required.
Gen Ed: EE- Mentored Research.
Repeat rules: May be repeated for credit. 6 total credits. 2 total completions.
Grading status: Letter grade.
COMP 496. Independent Study in Computer Science. 3 Credits.
Permission of the department. Computer science majors only. For advanced majors in computer science who wish to conduct an independent study or research project with a faculty supervisor. May be taken repeatedly for up to a total of six credit hours.
Repeat rules: May be repeated for credit. 6 total credits. 2 total completions.
Grading status: Letter grade.

COMP 520. Compilers. 3 Credits.
Requisites: Prerequisites, COMP 210, 211, 301, 311, and 455; or COMP 401, 410, 411, and 455; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 521. Files and Databases. 3 Credits.
Placement of data on secondary storage. File organization. Database history, practice, major models, system structure and design.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 523. Software Engineering Laboratory. 4 Credits.
Organization and scheduling of software engineering projects, structured programming, and design. Each team designs, codes, and debugs program components and synthesizes them into a tested, documented program product.
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; as well as at least two chosen from COMP 426, 431, 433, 520, 521, 530, 535, 575, 580; a grade of C or better in COMP 210, 211, 301, and 311 or COMP 401, 410, and 411 is required.
Gen Ed: CI, EE: Mentored Research.
Grading status: Letter grade.

COMP 524. Programming Language Concepts. 3 Credits.
Concepts of high-level programming and their realization in specific languages. Data types, scope, control structures, procedural abstraction, classes, concurrency. Run-time implementation.
Requisites: Prerequisites, COMP 210, 211, 301, 311, and 455; or COMP 401, 410, and 411; as well as at least two chosen from COMP 426, 431, 433, 520, 521, 530, 535, 575, 580; a grade of C or better in COMP 210, 211, 301, and 311 or COMP 401, 410, and 411 is required.
Grading status: Letter grade.

COMP 530. Operating Systems. 3 Credits.
Types of operating systems. Concurrent programming. Management of storage, processes, devices. Scheduling, protection. Case study. Course includes a programming laboratory. Honors version available
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; a grade of C or better in all prerequisites is required.
Grading status: Letter grade.

COMP 530H. Operating Systems. 3 Credits.
Types of operating systems. Concurrent programming. Management of storage, processes, devices. Scheduling, protection. Case study. Course includes a programming laboratory.
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; a grade of C or better in all prerequisites is required.
Grading status: Letter grade.

COMP 533. Distributed Systems. 3 Credits.
Distributed systems and their goals; resource naming, synchronization of distributed processes; consistency and replication; fault tolerance; security and trust; distributed object-based systems; distributed file systems; distributed Web-based systems; and peer-to-peer systems.
Requisites: Prerequisite, COMP 431, 524, or 530; a grade of C or better is required; permission of the instructor for students lacking the prerequisite.
Grading status: Letter grade.

COMP 535. Introduction to Computer Security. 3 Credits.
Principles of securing the creation, storage, and transmission of data and ensuring its integrity, confidentiality and availability. Topics include access control, cryptography and cryptographic protocols, network security, and online privacy.
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; as well as COMP 550, and COMP 283 or MATH 381; a grade of C or better is required in all prerequisites.
Grading status: Letter grade.

COMP 541. Digital Logic and Computer Design. 4 Credits.
This course is an introduction to digital logic as well as the structure and electronic design of modern processors. Students will implement a working computer during the laboratory sessions.
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; a grade of C or better in all prerequisites is required.
Grading status: Letter grade.

COMP 550. Algorithms and Analysis. 3 Credits.
Requisites: Prerequisites, COMP 210, 211, and 301; or 410; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 555. Bioalgorithms. 3 Credits.
Bioinformatics algorithms. Topics include DNA restriction mapping, finding regulatory motifs, genome rearrangements, sequence alignments, gene prediction, graph algorithms, DNA sequencing, protein sequencing, combinatorial pattern matching, approximate pattern matching, clustering and evolution, tree construction, Hidden Markov Models, randomized algorithms.
Requisites: Prerequisites, COMP 401, 410, and MATH 231 or 241; or BIOL 452; or MATH 553; or BIOL 525; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 555. Bioalgorithms. 3 Credits.
Bioinformatics algorithms. Topics include DNA restriction mapping, finding regulatory motifs, genome rearrangements, sequence alignments, gene prediction, graph algorithms, DNA sequencing, protein sequencing, combinatorial pattern matching, approximate pattern matching, clustering and evolution, tree construction, Hidden Markov Models, randomized algorithms.
Requisites: Prerequisites, COMP 401, 410, and MATH 231 or 241; or BIOL 452; or MATH 553; or BIOL 525; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 560. Artificial Intelligence. 3 Credits.
Introduction to techniques and applications of modern artificial intelligence. Combinatorial search, probabilistic models and reasoning, and applications to natural language understanding, robotics, and computer vision.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401 and 410; as well as MATH 231; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.
COMP 562. Introduction to Machine Learning. 3 Credits.
Machine learning as applied to speech recognition, tracking, collaborative filtering and recommendation systems. Classification, regression, support vector machines, hidden Markov models, principal component analysis, and deep learning.
Requisites: Prerequisites, COMP 401, 410, MATH 233, 347, and STOR 435; a grade of C or better is required in all prerequisite courses; permission of the instructor for students lacking the prerequisites.
Grading status: Letter grade.

COMP 572. Computational Photography. 3 Credits.
The course provides a hands on introduction to techniques in computational photography--the process of digitally recording light and then performing computational manipulations on those measurements to produce an image or other representation. The course includes an introduction to relevant concepts in computer vision and computer graphics.
Requisites: Prerequisites, COMP 401, 410, and MATH 547 or 577; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 575. Introduction to Computer Graphics. 3 Credits.
Hardware, software, and algorithms for computer graphics. Scan conversion, 2-D and 3-D transformations, object hierarchies. Hidden surface removal, clipping, shading, and antialiasing. Not for graduate computer science credit.
Requisites: Prerequisites, COMP 401, 410, 411, and MATH 547 or MATH 577; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 576. Mathematics for Image Computing. 3 Credits.
Mathematics relevant to image processing and analysis using real image computing objectives and provided by computer implementations.
Requisites: Prerequisites, COMP 116 or 210 or 401, and MATH 233; a grade of C or better is required in all prerequisites.
Grading status: Letter grade
Same as: BMME 576.

COMP 580. Enabling Technologies. 3 Credits.
We will investigate ways computer technology can be used to mitigate the effects of disabilities and the sometimes surprising response of those we intended to help.
Requisites: Prerequisites, COMP 210, 211, and 301; or COMP 401 and 410; a grade of C or better is required in all prerequisites.
Gen Ed: EE: Service Learning.
Grading status: Letter grade

COMP 581. Introduction to Robotics. 3 Credits.
Hands-on introduction to robotics with a focus on the computational aspects. Students will build and program mobile robots. Topics include kinematics, actuation, sensing, configuration spaces, control, and motion planning. Applications include industrial, mobile, personal, and medical robots. Honors version available
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 581H. Introduction to Robotics. 3 Credits.
Hands-on introduction to robotics with a focus on the computational aspects. Students will build and program mobile robots. Topics include kinematics, actuation, sensing, configuration spaces, control, and motion planning. Applications include industrial, mobile, personal, and medical robots.
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411; a grade of C or better is required in all prerequisite courses.
Grading status: Letter grade.

COMP 585. Serious Games. 3 Credits.
Concepts of computer game development and their application beyond entertainment to fields such as education, health, and business. Course includes team development of a game. Honors version available
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411, and at least two chosen from COMP 426, 431, 433, 520, 521, 523, 530, 535, 575; a grade of C or better in all prerequisite courses.
Gen Ed: EE: Field Work.
Grading status: Letter grade.

COMP 585H. Serious Games. 3 Credits.
Concepts of computer game development and their application beyond entertainment to fields such as education, health, and business. Course includes team development of a game. Honors version available
Requisites: Prerequisites, COMP 210, 211, 301, and 311; or COMP 401, 410, and 411, and at least two chosen from COMP 426, 431, 433, 520, 521, 523, 530, 535, 575; a grade of C or better in all prerequisite courses.
Gen Ed: EE: Field Work.
Grading status: Letter grade.

COMP 590. Topics in Computer Science. 3 Credits.
Permission of the instructor. This course has variable content and may be taken multiple times for credit. Different sections may be taken in the same semester. Honors version available
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

COMP 590H. Topics in Computer Science. 3 Credits.
Permission of the instructor. This course has variable content and may be taken multiple times for credit. Different sections may be taken in the same semester.
Repeat rules: May be repeated for credit; may be repeated in the same term for different topics; 12 total credits. 4 total completions.
Grading status: Letter grade.

COMP 630. Operating System Implementation. 3 Credits.
Students will learn how to write OS kernel code in C and a small amount of assembly. Students will implement major components of the OS kernel, such as page tables, scheduling, and program loading.
Requisites: Prerequisite, COMP 530; a grade of B+ or better is required; permission of the instructor for students lacking the prerequisite.
Grading status: Letter grade.

COMP 631. Computer Networks. 3 Credits.
Required preparation, a first course in operating systems, a first course in networking (e.g., COMP 431 and 530), and knowledge of probability and statistics. Topics in computer networks, including link layer protocols, switching, IP, TCP and congestion control. Additional topics may include peer-to-peer infrastructures, network security, and multimedia applications.
Grading status: Letter grade.
COMP 633. Parallel and Distributed Computing. 3 Credits.
Required preparation, a first course in operating systems and a first
course in algorithms (e.g., COMP 530 and 550). Principles and practices
of parallel and distributed computing. Models of computation. Concurrent
programming languages and systems. Architectures. Algorithms and
applications. Practicum.
Grading status: Letter grade.

COMP 635. Wireless and Mobile Communications. 3 Credits.
This course builds an understanding of the core issues encountered in
the design of wireless (vs. wired) networks. It also exposes students to
fairly recent paradigms in wireless communication.
Requisites: Prerequisite, COMP 431.
Grading status: Letter grade.

COMP 636. Distributed Collaborative Systems. 3 Credits.
Design and implementation of distributed collaborative systems.
Collaborative architectures, consistency of replicated objects,
collaborative user-interfaces, application and system taxonomies,
application-level multicast, performance, causality, operation
transformation, and concurrency and access control.
Requisites: Prerequisite, COMP 431 or 530; permission of the instructor
for students lacking the prerequisite.
Grading status: Letter grade.

COMP 6351. Computational Geometry. 3 Credits.
Required preparation, a first course in algorithms (e.g., COMP 550).
Design and analysis of algorithms and data structures for geometric
problems. Applications in graphics, CAD/CAM, robotics, GIS, and
molecular biology.
Grading status: Letter grade.

COMP 655. Cryptography. 3 Credits.
Introduction to design and analysis of cryptographic algorithms. Topics
include basis of abstract algebra and number theory, symmetric and
asymmetric encryption algorithms, cryptographic hash functions,
message authentication codes, digital signature schemes, elliptic curve
algorithms, side-channel attacks, selected advanced topics
Requisites: Prerequisites, COMP 455 and STOR 435; permission of the
instructor for students lacking the prerequisites.
Grading status: Letter grade.

COMP 662. Scientific Computation II. 3 Credits.
Theory and practical issues arising in linear algebra problems derived
from physical applications, e.g., discretization of ODEs and PDEs. Linear
systems, linear least squares, eigenvalue problems, singular value
decomposition.
Requisites: Prerequisite, MATH 661.
Grading status: Letter grade
Same as: MATH 662, ENVR 662.

COMP 665. Images, Graphics, and Vision. 3 Credits.
Required preparation, a first course in data structures and a first course in
discrete mathematics (e.g., COMP 410 and MATH 383). Display devices
and procedures. Scan conversion. Matrix algebra supporting viewing
transformations in computer graphics. Basic differential geometry.
Coordinate systems, Fourier analysis, FDFT algorithm. Human visual
system, psychophysics, scale in vision.
Gen Ed: QI.
Grading status: Letter grade.

COMP 672. Simulation Modeling and Analysis. 3 Credits.
Introduces students to modeling, programming, and statistical analysis
applicable to computer simulations. Emphasizes statistical analysis
of simulation output for decision-making. Focuses on discrete-event
simulations and discusses other simulation methodologies such as
Monte Carlo and agent-based simulations. Students model, program, and
run simulations using specialized software. Familiarity with computer
programming recommended.
Requisites: Prerequisites, STOR 555 and 641.
Grading status: Letter grade
Same as: STOR 672.

COMP 690. Special Topics in Computer Science. 1-4 Credits.
This course has variable content and may be taken multiple times for
credit. COMP 690 courses do not count toward the major or minor.
Repeat rules: May be repeated for credit; may be repeated in the same
term for different topics; 8 total credits. 2 total completions.
Grading status: Letter grade.

COMP 691. Honors Thesis in Computer Science. 3 Credits.
For computer science majors only and by permission of the department.
Individual student research for students pursuing an honors thesis
in computer science under the supervision of a departmental faculty
adviser.
Gen Ed: EE- Mentored Research.
Grading status: Letter grade.

COMP 692. Honors Thesis in Computer Science. 3 Credits.
Permission of the department. Required of all students in the honors
program in computer science. The construction of a written honors thesis
and an oral public presentation of the thesis are required.
Gen Ed: EE- Mentored Research.
Grading status: Letter grade.
