CHEMISTRY MAJOR, B.S.–POLYMER TRACK

Chemistry is the scientific study of the composition and properties of matter and the investigation of the laws that govern them. All chemists have a common core of knowledge, learned through a highly structured sequence of undergraduate courses in which the content is divided into the classical subdisciplines. The B.S. chemistry, polymer track degree provides students with the opportunity to specialize in polymer chemistry.

Student Learning Outcomes

Upon completion of the chemistry B.S. program, students are expected to be able to:

• Demonstrate a solid understanding of basic chemical principles (knowledge base in chemistry)
• Demonstrate the ability to solve chemical problems (analytical skills)
• Demonstrate the use of critical and creative thinking skills in conducting research with mentoring from a faculty member (critical thinking skills in chemistry)

Requirements

In addition to the program requirements, students must

• earn a minimum final cumulative GPA of 2.000
• complete a minimum of 45 academic credit hours earned from UNC–Chapel Hill courses
• take at least half of their major core requirements (courses and credit hours) at UNC–Chapel Hill
• earn a minimum cumulative GPA of 2.000 in the major core requirements. Some programs may require higher standards for major or specific courses.

For more information, please consult the degree requirements section of the catalog (http://catalog.unc.edu/undergraduate/degree-requirements/).

This program meets the requirements of the American Chemical Society for the training of professional chemists.

Code    Title                          Hours

Gateway Course

CHEM 101 & 101L  General Descriptive Chemistry I and Quantitative Chemistry Laboratory I  4

Core Requirements

CHEM 102  General Descriptive Chemistry II  3

or CHEM 102H  General Descriptive Chemistry II  3

CHEM 102L  Quantitative Chemistry Laboratory II  1

CHEM 241  Modern Analytical Methods for Separation and Characterization  3

CHEM 241L  Laboratory in Separations and Analytical Characterization of Organic and Biological Compounds  1

or CHEM 245L  Honors Laboratory in Separations and Analytical Characterization of Organic and Biological Compound  1

CHEM 242  Physical Chemistry II  3

CHEM 520L  Polymer Chemistry Laboratory  2

CHEM 550L  Synthetic Chemistry Laboratory I  2

CHEM 261  Introduction to Organic Chemistry I  3

CHEM 262  Introduction to Organic Chemistry II  3

CHEM 262L  Laboratory in Organic Chemistry  1

or CHEM 263L

Three advanced polymer chemistry electives from:

CHEM 420  Introduction to Polymers  3

CHEM 421  Synthesis of Polymers  3

CHEM 422  Physical Chemistry of Polymers  3

CHEM 423  Intermediate Polymer Chemistry  3

CHEM 425  Polymer Materials  3

One advanced chemistry elective from CHEM 395 or any chemistry course numbered higher than CHEM 420 (at least three hours)  3

Additional Requirements

Biol 101  Principles of Biology  3

Math 232  Calculus of Functions of One Variable II  4

Math 233  Calculus of Functions of Several Variables  4

Math 383  First Course in Differential Equations  3

Phys 118  Introductory Calculus-based Mechanics and Relativity  4

Phys 119  Introductory Calculus-based Electromagnetism and Quanta  4

Total Hours  71

H  Honors version available. An honors course fulfills the same requirements as the nonhonors version of that course. Enrollment and GPA restrictions may apply.

F  FY-Launch class sections may be available. A FY-Launch section fulfills the same requirements as a standard section of that course, but also fulfills the FY-SEMINAR/FY-LAUNCH First-Year Foundations requirement. Students can search for FY-Launch sections in ConnectCarolina using the FY-LAUNCH attribute.

Placement (PL) credits (zero hours) for MATH 232, MATH 233, or MATH 383 do not satisfy chemistry major requirements.

Sample Plan of Study

Sample plans can be used as a guide to identify the courses required to complete the major and other requirements needed for degree completion within the expected eight semesters. The actual degree plan may differ depending on the course of study selected (second major, minor, etc.). Students should meet with their academic advisor to create a degree plan that is specific and unique to their interests. The sample plans represented in this catalog are intended for first-year students.
entering UNC–Chapel Hill in the fall term. Some courses may not be offered every term.

The recommended course sequence for the bachelor of science (polymer track) degree is listed below. Courses in chemistry and other courses specifically required (and designated by number) may not be declared Pass/Fail.

Gen Ed courses

Note: CHEM 481 and ALL Math, Phys and Chem courses numbered < 400 must be completed prior to semester 7 to avoid scheduling conflicts preventing 8 semester graduation.

Special Opportunities in Chemistry

Honors in Chemistry

Upon the recommendation of the Department of Chemistry, the B.A. or B.S. degree with a major in chemistry may be awarded with honors in chemistry or highest honors in chemistry.

To attain the honors or highest distinction, the candidate must satisfy the following guidelines:

- Achieve an overall grade point average of 3.30 or higher.
- Achieve a chemistry major grade point average of 3.40 or higher.
- Prior to the final semester during which the honors thesis is completed, conduct two semesters or one semester plus one summer of research in the laboratory in which the thesis work will be completed.

Honors in chemistry is a distinction bestowed on an outstanding student who has completed a research project of considerable merit, as certified by the research advisor and two faculty members appointed by the director of undergraduate studies.

Highest honors in chemistry is a distinction bestowed on a truly exceptional student who has completed a research project of considerable depth and significance that meets the most rigorous
standards of scholarly excellence, as certified by the research advisor and two faculty members appointed by the director of undergraduate studies.

Students who wish to complete an honors thesis should begin planning their course programs and research activities during or before the junior year so that ample time and effort may be devoted to research.

**Departmental Involvement**

Majors are encouraged to participate in Alpha Chi Sigma (chemistry fraternity) and the undergraduate advisory board.

**Laboratory Teaching Internships and Assistantships**

Undergraduates have the opportunity to serve as laboratory teaching assistants for entry-level undergraduate laboratory courses.

**Special Topics**

Special topics not offered through the normal course sequence may be pursued through directed reading and registration in CHEM 396 with the approval of the supervising faculty member, advisor, and vice chair for undergraduate studies. An approved learning contract is required, and students must be registered no later than the end of the second week of classes (fall and spring semesters).

**Undergraduate Awards**

Excellent performances by undergraduates in chemistry are recognized by the department through the following awards:

- Francis P. Venable Medal: A medallion and cash award are presented to the two most outstanding graduating seniors majoring in chemistry in honor of Dr. Francis P. Venable, who was chair of the department, president of the University from 1900 to 1914, and president of the American Chemical Society.
- Emmett Gladstone Rand Premedical Scholarship: This scholarship is presented to exceptionally talented graduating seniors intending to pursue a career in medicine.
- David L. Stern Scholar: Top students from upper-division laboratory courses are chosen for this cash award.
- Jason D. Altom Memorial Award for Undergraduate Research: This award recognizes research potential of an undergraduate chemistry major.
- James H. Maguire Memorial Award: This award recognizes an outstanding and academically gifted junior student majoring in chemistry.
- Tanya R. Ellison Scholarship: A junior female B.S. chemistry major is selected for this cash award on the basis of character and academic commitment.
- Carrie Ann Largent Scholarship: This merit based scholarship is awarded annually to senior chemistry majors.
- Alpha Chi Sigma Sophomore Chemist Award: A cash award is given annually to the top sophomore chemistry student from the previous academic year, as determined by a search committee including members of Alpha Chi Sigma.
- J. Thurman Freeze Scholarship: This scholarship serves to fund summer research between a student's junior and senior years.
- E.C. Markham Summer Research Fund: The department chair selects the recipient of this award, who will use the salary to perform research between the junior and senior years.
- Chapel Family Student Excellence Fund: This award supports undergraduate chemistry majors through research and travel support.
- Matthew Neely Jackson Undergraduate Research Award: This award provides support for undergraduate chemistry majors to conduct faculty-mentored summer research.
- Tommie and Billie Hinton Undergraduate Research Fellowship: This award provides support for undergraduate chemistry majors to conduct faculty-mentored summer research to support the development of gender equality, diversity and inclusiveness within the chemistry department.
- Alan Rauch and Merrill King Undergraduate Student Research Fund: This award supports undergraduate student research in the Department of Chemistry.

**Undergraduate Research**

Undergraduates find research to be an exciting and rewarding experience. Undergraduate research can help them acquire a spirit of inquiry, initiative, independence, sound judgment, patience, persistence, alertness, and the ability to use the chemical literature. Undergraduate research also affords an opportunity to make pioneering discoveries at the forefront of science, using instrumentation and techniques far more sophisticated than those usually encountered in standard laboratory courses.

More than 80 students are involved in undergraduate research projects in chemistry each year. Although successful completion of an undergraduate research project is a requirement for graduation with honors or highest honors (see above), it is not necessary to be a participant in Honors Carolina to undertake a research project.

The usual mechanism for becoming involved in a research project involves making direct contact with faculty researchers to inquire about research opportunities. The Chemistry Student Services Office also maintains a list of undergraduate research opportunities. This process begins well in advance of a preregistration or registration period. Once a research opportunity is identified, a student will register for CHEM 395.

CHEM 395 and CHEM 396 together may be taken for credit as many times as desired but may be counted for no more than nine hours total credit toward graduation in either the B.A. or B.S. traditional and polymer tracks and for no more than six hours in the B.S. biochemistry track. In the B.S. curriculum CHEM 395 may be counted no more than once as an advanced chemistry elective.

**UNC–BEST**

The UNC Baccalaureate Education in Science and Teaching (UNC–BEST) Program is a collaboration between the School of Education and the College of Arts and Sciences and is designed to allow undergraduate science majors interested in teaching high school science the opportunity to earn their science degree and obtain licensure as a North Carolina high school science teacher in four years. UNC–BEST students also fulfill teaching licensure coursework requirements as well as many General Education and elective requirements as they complete courses in teaching and learning.
